

# Table of Contents

<b>1</b>	<b>History and Nomenclature</b>	<b>1</b>
1.1	History	1
1.2	Nomenclature	2
	References	3
<b>2</b>	<b>Clinical Aspects</b>	<b>4</b>
2.1	Prevalence	4
2.1.1	Worldwide Distribution	6
2.1.2	Sex Incidence	7
2.2	Course	7
2.2.1	Onset, Phases, and Morphological Characteristics	7
2.2.2	Infantile Phase	8
2.2.3	Childhood Phase	10
2.2.4	Adolescent/Young Adult Phase	11
2.2.5	Onset at Elder Age	12
2.3	Prognosis	12
2.3.1	Phases and Prognostic Problems	12
2.3.2	Cases Healed After the Infantile Phase	13
2.3.3	Clearing of the Disease	14
2.4	Basic Clinical Features	16
2.4.1	Primary Trait	16
2.4.2	Prurigo	17
2.4.3	Lichenification	18
2.4.4	Eczematous Lesions	19
2.4.5	Correlation Between Itch and Major Features	20
2.5	Morphology and Distribution	21
2.5.1	Sites of Predilection	21

2.5.2	Head and Face . . . . .	22
2.5.3	Body . . . . .	23
2.5.4	Hands . . . . .	23
2.5.5	Feet . . . . .	25
2.6	Other Essential Features . . . . .	26
2.6.1	Dry Skin . . . . .	26
2.6.2	Photosensitivity . . . . .	27
2.7	Special Clinical Types . . . . .	28
2.7.1	Follicular Type . . . . .	28
2.7.2	Inhalative (Hand) Eczema . . . . .	28
2.8	Correlations Between Distribution and Pathomechanism . . . . .	28
2.9	Complications Caused by Living Agents . . . . .	28
2.9.1	Staphylococcal Infections . . . . .	29
2.9.2	Viral Infections . . . . .	31
2.9.3	Dermatophytosis and Candida . . . . .	33
2.9.4	Scabies and House Dust Mite . . . . .	33
2.9.5	Pityrosporon Orbiculare . . . . .	34
2.10	Complication of the Malfunctioning Immunomechanisms . . . . .	34
2.10.1	Atopic Erythroderma . . . . .	34
2.10.2	Some Types of Cutaneous Lymphoma . . . . .	34
2.10.3	Alopecia Areata and Vitiligo . . . . .	34
2.11	Other Complications . . . . .	35
2.11.1	Atopic Cataract . . . . .	35
2.12	Associated Conditions; Proven Correlations . . . . .	35
2.12.1	Atopic Correlations . . . . .	35
2.12.2	Bronchial Asthma . . . . .	36
2.12.3	Atopic Rhinoconjunctivitis . . . . .	37
2.12.4	Oral Symptoms . . . . .	38
2.12.5	Gastrointestinal Symptoms . . . . .	38
2.13	Xerosis-Ichthyosis Group . . . . .	39
2.14	Probable Correlations . . . . .	41
2.14.1	Drug Reactions of the Immediate Type . . . . .	41
2.14.2	Systemic Diseases (Related to Impaired Cell-Mediated Immunity) . . . . .	41
2.14.3	Certain Types of Urticaria . . . . .	43
2.15	Possible Correlations . . . . .	44
2.15.1	Some Genetic Disorders with Eczematous Lesions . . . . .	44

2.15.2	Adult Celiac Disease/Dermatitis Herpetiformis	44
2.15.3	Other Conditions	44
2.16	Coexistence of AD with Common Skin Diseases	46
	References	46
<b>3</b>	<b>Itch</b>	<b>56</b>
3.1	Short Survey	56
3.1.1	Itch and Pain	57
3.1.2	Mediator of Itch	57
3.1.3	Nonchemical Stimuli	59
3.1.4	Itch and Late Cutaneous Reactions	60
3.2	Role of Itch in AD	61
3.2.1	Itch as the Essential Symptom of AD	63
	References	66
<b>4</b>	<b>Histopathological and Laboratory Findings</b>	<b>70</b>
4.1	Histopathological Findings	70
4.2	Laboratory Findings	71
	References	72
<b>5</b>	<b>Pathomechanism: Genetic and Immunological Factors</b>	<b>74</b>
5.1	Genetic Factors	74
5.1.1	Mode of Inheritance	74
5.1.2	Transmission of IgE and Other Features	76
5.1.3	Practical Consequences for the Clinician	78
5.2	Atopic Allergens	78
5.2.1	General Remarks	78
5.2.2	Skin Testing	80
5.2.3	Inhalants: Pollen	85
5.2.4	Inhalants: Animal Hair	86
5.2.5	Inhalants: Human Dandruff	87
5.2.6	Inhalants: House Dust and House Dust Mites	88
5.2.7	Inhalants: Molds	89
5.2.8	Other Inhalants	95
5.2.9	Inhalants Eliciting Contact Reaction	95

5.3	Foods . . . . .	96
5.3.1	General Remarks . . . . .	96
5.3.2	Food Reactivity . . . . .	98
5.3.3	Frequent Food Allergens . . . . .	100
5.3.4	Skin Reactivity . . . . .	102
5.3.5	Challenge Tests . . . . .	104
5.3.6	Late and Non-IgE-Mediated Food Reactions . . . . .	105
5.3.7	Concluding Remarks . . . . .	107
5.4	Other Allergens from Living Agents . . . . .	108
5.4.1	Staphylococci and Other Bacteria . . . . .	108
5.4.2	Dermatophytes and Candida . . . . .	110
5.4.3	Scabies Mite, Insects, and Helminths . . . . .	110
5.5	The Atopic Antibody . . . . .	111
5.5.1	General Remarks . . . . .	111
5.5.2	IgE in AD . . . . .	113
5.5.3	RAST . . . . .	116
5.5.4	Non-IgE Antibodies . . . . .	117
5.5.5	Evaluation of Immediate Type Skin Reactions . . . . .	118
5.6	Contact Reactivity . . . . .	120
5.6.1	Allergic Contact Dermatitis . . . . .	120
5.6.2	Irritative Contact Dermatitis . . . . .	123
5.7	Delayed (Tuberculin-Type) Reactivity . . . . .	124
5.7.1	In Vivo Reactivity . . . . .	124
5.7.2	In Vitro Reactivity . . . . .	125
5.7.3	Leukocytes and Monocytes . . . . .	128
5.7.4	Antigen-Presenting Cells . . . . .	129
5.7.5	Skin Infiltrate . . . . .	130
5.7.6	Anti-Infectious Resistance . . . . .	130
5.7.7	Cell-Mediated Immunity in Respiratory Atopies . . . . .	131
5.8	Other Reaction Types . . . . .	132
5.9	Concluding Remarks . . . . .	133
	References . . . . .	134
<b>6</b>	<b>Pathomechanism: Cells and Mediators . . . . .</b>	<b>155</b>
6.1	Mast Cells and Histamine . . . . .	155
6.1.1	Mast Cells . . . . .	155
6.1.2	Histamine . . . . .	156
6.1.3	Histamine Inhibition . . . . .	157

6.2	Eosinophils and Their Products . . . . .	158
6.3	Cyclic Nucleotides . . . . .	159
6.3.1	Introduction . . . . .	159
6.3.2	Conditions in Atopy/AD . . . . .	160
6.3.3	Concluding Remarks . . . . .	162
6.4	Eicosanoids . . . . .	162
6.4.1	Prostaglandins . . . . .	163
6.5	Complement . . . . .	163
6.6	Other Mediators . . . . .	164
6.6.1	Acetylcholine . . . . .	164
6.6.2	Kinins . . . . .	164
6.6.3	Miscellaneous . . . . .	165
	References . . . . .	165
<b>7</b>	<b>Pathomechanism: The Altered Skin . . . . .</b>	<b>172</b>
7.1	Itch . . . . .	172
7.2	Alteration of Skin Structure and Some Consequences . . . . .	172
7.2.1	Epidermodermal Changes . . . . .	173
7.3	Water Exchange . . . . .	173
7.3.1	Sweat Secretion . . . . .	174
7.3.2	Transepidermal Water Loss . . . . .	176
7.3.3	Sebum Excretion . . . . .	178
7.3.4	Skin Dryness . . . . .	180
7.4	Paradoxical Vascular Responses . . . . .	181
7.4.1	White Dermographism . . . . .	181
7.4.2	Nicotinate Reactions . . . . .	182
7.4.3	Delayed Blanch and Comments . . . . .	184
7.4.4	Further Vascular Changes . . . . .	188
7.5	Other Alterations . . . . .	189
7.5.1	Pilomotor Reaction . . . . .	189
7.5.2	Endocrine Alterations . . . . .	190
7.6	Concluding Remarks . . . . .	190
	References . . . . .	191

<b>8</b>	<b>Pathomechanism: Attempt at Synthesis</b> . . . . .	197
8.1	Animal Models . . . . .	197
8.2	Attempt at Synthesis . . . . .	198
	References . . . . .	201
<b>9</b>	<b>Factors Influencing the Course of AD</b> . . . . .	203
9.1	Seasonal Dependence . . . . .	203
9.2	Climatic Factors . . . . .	205
9.3	Some Environmental Factors . . . . .	206
9.4	Socioeconomic Environment . . . . .	206
9.5	Occupation . . . . .	207
9.6	Psychological Factors . . . . .	209
9.7	Other Factors . . . . .	210
9.7.1	Military Service and Sports . . . . .	210
9.7.2	Hormonal Influences . . . . .	211
9.7.3	Infections . . . . .	212
9.7.4	Problems with Schooling in Young AD Patients . . . . .	213
	References . . . . .	213
<b>10</b>	<b>Diagnosis and Grading (Severity)</b> . . . . .	216
10.1	Diagnostic Criteria . . . . .	216
10.2	Differential Diagnosis . . . . .	218
10.3	Grading (Severity) . . . . .	219
	References . . . . .	221
<b>11</b>	<b>Prophylaxis</b> . . . . .	223
11.1	Food Avoidance . . . . .	223
11.1.1	Sensitization in Utero . . . . .	224
11.1.2	Breast Feeding . . . . .	224
11.1.3	Avoidance Diets . . . . .	226
11.2	Inhalant Allergens . . . . .	228
11.3	Occupational Prophylaxis . . . . .	229

11.4	Other Measures . . . . .	230
	References . . . . .	231
<b>12</b>	<b>Management of AD . . . . .</b>	<b>235</b>
12.1	Specific and Immunological Therapy . . . . .	235
12.2	General Measures . . . . .	237
12.2.1	Climatotherapy . . . . .	237
12.2.2	Hospitalization . . . . .	238
12.3	Systemic Therapy . . . . .	238
12.3.1	Antipruritics . . . . .	238
12.3.2	Anti-Inflammatory Agents . . . . .	240
12.3.3	Light Therapy . . . . .	240
12.3.4	Chromones . . . . .	241
12.3.5	Essential Fatty Acids . . . . .	242
12.3.6	Anti-Infectious Agents . . . . .	242
12.4	Topical Therapy . . . . .	243
12.4.1	Antipruritics and Tars . . . . .	243
12.4.2	Topical Corticosteroids . . . . .	246
12.4.3	Treatment of Acute Eczematous Reaction . . . . .	248
12.4.4	Measures Against Dryness . . . . .	248
12.4.5	Antibacterial and Antimycotic Agents . . . . .	249
12.4.6	Special Points for Infantile Eczema . . . . .	250
12.4.7	Newer Topical Therapy . . . . .	251
12.5	Concluding Remarks . . . . .	252
