Summary	7
1. Derivation of the four axioms for abstract Quantum Theory	8
1.1 Basic definitions for Quantum Logic	8
1.2 Composition in Quantum Logic	15
1.3 Orthogonal mappings $O(t)$ of the Hilbert space into itself	17
2. Quantum Logic is the foundation of physics	18
3. Quantum Logic is the foundation of mathematics	26
3.1 Generalization of some results in Linear Algebra	49
4. Quantum Logic is the foundation of computer-science	53
Literature	58
