Preface	vii
CHAPTER 1	
Time-Varying Electromagnetic Fields	1
Introduction	1
1.1. Maxwell's Equations	1
1.2. Conservation Laws	4
1.3. Scalar and Vector Potentials	8
1.4. Plane Electromagnetic Waves in a Nonconducting Medium	10
1.5. Plane Waves in a Conducting Medium	28
CHAPTER 2	
Hyperbolic Partial Differential Equations in Two Independent Variables	32
Introduction	32
2.1. General Solution of the Wave Equation	33
2.2. D'Alembert's Solution of the Cauchy Initial Value Problem	35
2.3. Method of Characteristics for a Single First-Order Equation	40
2.4. Method of Characteristics for a First-Order System	48
2.5. Second-Order Quasilinear Partial Differential Equation	50
2.6. Domain of Dependence and Range of Influence	55
2.7. Some Basic Mathematical and Physical Principles	56
2.8. Propagation of Discontinuities	60
2.9. Weak Solutions and the Conservation Laws	63
2.10. Normal Forms for Second-Order Partial Differential Equations	69
2.11. Riemann's Method	74
2.12. Nonlinear Hyperbolic Equations in Two Independent Variables	82
CHAPTER 3	
Hyperbolic Partial Differential Equations in More Than Two Independent Variables	91
Introduction	91
3.1. First-Order Quasilinear Equations in n Independent Variables	91
3.2. First-Order Fully Nonlinear Equations in n Independent Variables	94

3.3.	Directional Derivatives in n Dimensions	95
3.4.	Characteristic Surfaces in n Dimensions	99
3.5.	Maxwell's Equations	105
3.6.	Second-Order Quasilinear Equation in n Independent Variables	107
3.7.	Geometry of Characteristics for Second-Order Systems	112
3.8.	Ray Cone, Normal Cone, Duality	118
3.9.	Wave Equation in n Dimensions	120
Appendix: Similarity Transformations and Canonical Forms		127
	Introduction	127
3A.1.	Geometric Considerations	128
3A.2.	Orthogonal Transformations and Eigenvectors in Relation to Similarity Transformations	130
3A.3.	Diagonalization of A'	133
CHAPTER 4		
Variational Methods		135
	Introduction	135
4.1.	Principle of Least Time	136
4.2.	One-Dimensional Calculus of Variations, Euler's Equation	137
4.3.	Generalization to Functionals with More Than One Dependent Variable	144
4.4.	Special Case	145
4.5.	Hamilton's Variational Principle and Configuration Space	146
4.6.	Lagrange's Equations of Motion	148
4.7.	D'Alembert's Principle, Constraints, and Lagrange's Equations	151
4.8.	Nonconservative Force Field, Velocity-Dependent Potential	158
4.9.	Constraints Revisited, Undetermined Multipliers	165
4.10.	Hamilton's Equations of Motion	167
4.11.	Cyclic Coordinates	169
4.12.	Principle of Least Action	171
4.13.	Lagrange's Equations of Motion for a Continuum	174
4.14.	Hamilton's Equations of Motion for a Continuum	178
CHAPTER 5		
Canonical Transformations and Hamilton–Jacobi Theory		181
	Introduction	181
Part I. Canonical Transformations		181
5.1.	Equations of Canonical Transformations and Generating Functions	181
5.2.	Some Examples of Canonical Transformations	186
Part II. Hamilton–Jacobi Theory		187
	Introduction	187
5.3.	Derivation of the Hamilton–Jacobi Equation for Hamilton's Principle Function	188
5.4.	S Related to a Variational Principle	189
5.5.	Application to Harmonic Oscillator	190
5.6.	Hamilton's Characteristic Function	191

5.7. Application to n Harmonic Oscillators	193
5.8. Hamilton–Jacobi Theory Related to Characteristic Theory	193
5.9. Hamilton–Jacobi Theory and Wave Propagation	197
5.10. Hamilton–Jacobi Theory and Quantum Mechanics	203
CHAPTER 6	
Quantum Mechanics—A Survey	206
Introduction	206
CHAPTER 7	
Plasma Physics and Magnetohydrodynamics	231
Introduction	231
7.1. Fluid Dynamics Equations—General Treatment	232
7.2. Application of Fluid Dynamics Equations to Magnetohydrodynamics	235
7.3. Application of Characteristic Theory to Magnetohydrodynamics	239
7.4. Linearization of the Field Equations	243
CHAPTER 8	
The Special Theory of Relativity	254
Introduction	254
8.1. Collapse of the Ether Theory	256
8.2. The Lorentz Transformation	258
8.3. Maxwell’s Equations with Respect to a Lorentz Transformation	262
8.4. Contraction of Rods and Time Dilation	263
8.5. Addition of Velocities	265
8.6. World Lines and Light Cones	267
8.7. Covariant Formulation of the Laws of Physics in Minkowski Space	270
8.8. Covariance of the Electromagnetic Equations	274
8.9. Force and Energy Equations in Relativistic Mechanics	278
8.10. Lagrangian Formulation of Equations of Motion in Relativistic Mechanics	283
8.11. Covariant Lagrangian	285
Bibliography	289
Index	291
