## Introduction

---

1 Growth and Tissues . . . . .	1
2 General Characteristics of Vascular Plants . . . . .	2
3 Succinct Classification of Vascular Plants . . . . .	3
4 The Two Phases of Sporophyte Development . . . . .	5

---

## Part I Embryogeny and Post-embryonic Ontogeny

---

### 1 Segmentation and First Edification of the Sporophyte

---

1.1 Embryogeny in Atmospheric Medium . . . . .	8
1.1.1 The Environment of the Zygote . . . . .	8
1.1.1.1 The Prothallus is Free . . . . .	9
1.1.1.2 The Prothallus is Enclosed . . . . .	10
The Prothallus is Acrescent . . . . .	10
The Prothallus is Resorbed . . . . .	11
1.1.2 The Regularity of the Segmentation . . . . .	11
1.1.3 Seed Plants and Plants Without Seeds . . . . .	11
1.2 Embryogeny of Pteridophytes . . . . .	12
1.2.1 Early Segmentations of the Zygote . . . . .	13
1.2.2 Embryogeny of Psilotales . . . . .	15
1.2.3 Embryogeny of Lycopodineae . . . . .	16
1.2.3.1 Aliguleae ( <i>Lycopodium-Phylloglossum</i> ) . . . . .	16
Type <i>Lycopodium selago</i> . . . . .	17
Type <i>Lycopodium clavatum</i> . . . . .	18
Type <i>Lycopodium cernuum</i> . . . . .	23
1.2.3.2 Liguleae . . . . .	23
Genus <i>Selaginella</i> . . . . .	23
Genus <i>Isoetes</i> . . . . .	26
1.2.4 Embryogeny of Equisetales . . . . .	26
1.2.5 Embryogeny of Ferns . . . . .	28
1.2.5.1 Eusporangiate Ferns . . . . .	28
1.2.5.2 Leptosporangiate Ferns . . . . .	32

1.2.6	Conclusions . . . . .	35
1.3	Embryogeny of Prephanerogams . . . . .	39
1.3.1	Embryogeny of Cycadales . . . . .	39
1.3.2	Embryogeny of Ginkgoales . . . . .	43
1.3.3	Conclusions . . . . .	43
1.4	Embryogeny of Gymnosperms . . . . .	49
1.4.1	The Formation of the Proembryo . . . . .	49
1.4.2	The Formation of the Suspensor and the Embryo . . . . .	57
1.4.3	Conclusions . . . . .	60
1.5	Embryogeny of Preangiosperms . . . . .	66
1.5.1	Fertilization in Gnetales . . . . .	66
1.5.2	Embryogeny of <i>Ephedra</i> . . . . .	69
1.5.3	Embryogeny of <i>Welwitschia</i> . . . . .	72
1.5.4	Embryogeny of <i>Gnetum</i> . . . . .	75
1.5.5	Conclusions . . . . .	75
1.6	Embryogeny of Angiosperms . . . . .	77
1.6.1	The Proembryo . . . . .	77
1.6.1.1	Edification of the Proembryo of <i>Myosurus minimus</i> (SOUEGES, 1911) . . . . .	77
1.6.1.2	Variants and Their Signification . . . . .	79
1.6.2	The Embryo . . . . .	82
1.6.2.1	Dicotyledons: Edification of the Embryo of <i>Myosurus minimus</i> . . . . .	82
1.6.2.2	Monocotyledons: Edification of the Embryo of <i>Sagittaria sagittaeifolia</i> . . . . .	84
1.6.2.3	Significance of the "Cotyledon" of the Monocotyledons . . . . .	85
1.6.3	Some Cytological Data on the Embryogeny of Angiosperms . . . . .	87
1.6.3.1	The Zygote . . . . .	87
1.6.3.2	The Suspensor . . . . .	88
1.6.3.3	The Embryo . . . . .	90
1.6.3.4	The Plantlet in the Mature Seed . . . . .	94
1.7	General Considerations on the Embryogeny of Vascular Plants . . . . .	96
1.7.1	The Geometry of Segmentation and its Results . . . . .	96
1.7.2	Predestination or Epigenesis . . . . .	98
1.7.3	Segmentation and Organogenesis . . . . .	98
1.7.4	Formation of Organogenic Cells, Cytological Results of Embryogenesis . . . . .	99
1.7.5	Dedifferentiation at the Origin of Ontogenesis . . . . .	99

1.7.6	The Embryonic Differentiation . . . . .	100
	References . . . . .	100

## **2 Meristems and the Indefinite Ontogeny of Plants**

---

2.1	Apical Meristems . . . . .	105
2.1.1	Ontogenetic Function of Apical Meristems . . . . .	105
2.1.2	Histological Structure of Shoot Apical Meristems . . . . .	106
2.1.2.1	Successive Concepts . . . . .	106
	The "Apical Cell", Single Initial . . . . .	106
	The Histogens . . . . .	106
	SCHMIDT'S Interpretation . . . . .	108
	The Initiating Ring (Anneau Initial) and the Critic of the Apical Initiation . . . . .	109
2.1.2.2	Shoot Apical Meristems of Pteridophytes . . . . .	110
	Advanced Pteridophytes . . . . .	110
	Primitive Pteridophytes . . . . .	111
2.1.2.3	Apical Meristems of Prephanerogams (Prespermaphytes) . .	116
2.1.2.4	Apical Meristems of Gymnosperms . . . . .	118
2.1.2.5	Apical Meristems of Angiosperms . . . . .	121
2.1.3	Histological Structure of Root Meristems . . . . .	130
2.1.3.1	Pteridophytes . . . . .	130
2.1.3.2	Phanerogams . . . . .	132
2.1.4	Cytological Structure of Apical Meristems . . . . .	140
2.1.4.1	Primary Meristematic Cells . . . . .	140
2.1.4.2	Rib (Medullary) Meristem Cells . . . . .	144
2.1.5	Functioning of Shoot Apical Meristems . . . . .	150
2.1.6	Organization of the Primary Structure of the Leafy Stem . .	152
2.1.6.1	Initiation of Leaves . . . . .	152
2.1.6.2	Formation of Leaf Buttresses . . . . .	153
2.1.6.3	Evolution of the Leaf Base . . . . .	153
2.1.6.4	The Two Ontogenic Composing Parts of the Stem . . . . .	157
2.1.6.5	The Organization of Leaf Segments . . . . .	160
2.1.6.6	Components of the "Primary Structure" . . . . .	162
2.1.7	Establishment of the Primary Structure of the Root . . . . .	163
2.2	Secondary Meristems . . . . .	165
2.2.1	Origin and Function of Secondary Meristems . . . . .	165
2.2.2	The "Prodesmogen" and the Vascular Cambium . . . . .	165
2.2.3	The Phellogen (Cork Cambium) . . . . .	169
2.2.3.1	The First Phellogen Layer . . . . .	169
2.2.3.2	Renewal of the Phellogen . . . . .	172

2.2.4	The Cambium of Monocotyledons . . . . .	173
2.2.5	Cytological Features of Secondary Meristems . . . . .	174
2.2.6	Cytology and Meristematic Potentialities . . . . .	181
2.2.7	Distribution of Secondary Meristems in Vascular Plants . .	182
	References . . . . .	182

### **3 Cytology of the Processes of Differentiation and Dedifferentiation During the Ontogeny of Vascular Plants**

---

3.1	The Plasticity of Plant Cells . . . . .	188
3.2	General Cytological Scheme of Differentiation . . . . .	191
3.2.1	Development of the Nucleus, the Cytoplasm and Vacuoles .	192
3.2.2	Development of the Chondriome . . . . .	192
3.2.3	Development of the Cell Wall . . . . .	198
3.2.3.1	Relations Between Cytoplasm and Cell Wall . . . . .	200
3.2.3.2	Heterogeneity of the Cell Wall Structure: Cell Wall Layers .	204
3.2.3.3	Origin of the Cell Wall and the Middle Lamella . . . . .	204
3.2.3.4	The Primary Cell Wall . . . . .	207
3.2.3.5	The Secondary Cell Wall . . . . .	210
3.2.3.6	Changes in the Secondary Cell Wall . . . . .	212
3.3	The Course of the Differentiation . . . . .	213
3.3.1	The First Phase . . . . .	213
3.3.2	The Second Phase . . . . .	214
3.4	The Main Types of Tissues . . . . .	216
3.5	Processes of Dedifferentiation in the Course of Ontogeny .	218
3.5.1	Circumstances of Dedifferentiation . . . . .	218
3.5.2	The Phases of Dedifferentiation . . . . .	218
3.5.3	Dedifferentiation and Mode of Growth . . . . .	222
	References . . . . .	224

---

## **Part II Histological Differentiation of Vascular Plants**

---

### **4 Parenchyma**

---

4.1	General Characteristics . . . . .	228
4.2	Main Types of Parenchyma . . . . .	228
4.2.1	Assimilatory Parenchyma . . . . .	229
4.2.2	Storage Parenchyma . . . . .	235
4.3	Intercellular Relations and Morphology of Cells . . . . .	238
4.4	Secondary Parenchyma . . . . .	241
4.5	Parenchyma in the Series of Vascular Plants . . . . .	241
	References . . . . .	241

	A. Epidermis . . . . .	242
5.1	Histological, Ontogenic and Chemical Characteristics . . .	242
5.2	Epidermal Cells . . . . .	243
5.2.1	Common Epidermal Cells . . . . .	245
5.2.2	Stomatal Cells (Guard Cells) . . . . .	248
5.2.2.1	Cell Wall Differentiation of Stomatal Cells . . . . .	250
5.2.2.2	Ontogenesis and Classification of Stomata . . . . .	250
5.2.2.3	Ultrastructure of Stomatal Cells . . . . .	254
5.2.2.4	Cytophysiology of Stomata . . . . .	258
5.2.3	Trichomes . . . . .	262
5.2.3.1	Protective Trichomes . . . . .	262
5.2.3.2	Secretory or Glandular Trichomes . . . . .	266
5.2.3.3	Development of Trichomes . . . . .	266
5.2.4	Secretory Epidermis . . . . .	266
5.2.5	Lithocysts . . . . .	268
5.2.6	Other Types of Epidermal Cells . . . . .	270
5.3	Multiseriate Epidermis . . . . .	272
5.4	Cytophysiological Problems Related to the Differentiation of Epidermis . . . . .	273
5.5	Epidermal Productions in Vascular Plants . . . . .	274
	B. Cork (Phellem) . . . . .	275
5.6	Origin of Cork: Primary and Secondary Cork . . . . .	275
5.7	Differentiation of Cork Cells . . . . .	276
5.8	Primary Cork . . . . .	278
5.9	Secondary Cork (Peridermal Cork) . . . . .	279
5.10	Storied Cork of Arborescent Monocotyledons . . . . .	280
5.11	Lenticels . . . . .	281
	References . . . . .	285

**6 Phloem**

---

6.1	Characteristic Cell Element: The "Sieve Cell" . . . . .	287
6.1.1	Cell Wall Differentiations . . . . .	287
6.1.2	The Contents of Sieve Cells . . . . .	291
6.1.2.1	The Nucleus . . . . .	291
6.1.2.2	Plastids and Mitochondria . . . . .	294
6.1.2.3	The "Slime Bodies" or P-Proteins . . . . .	296
6.1.2.4	Cytoplasm and Vacuoles . . . . .	310
6.2	Relations Between Sieve Cells, and Between Sieve Cells and Adjacent Cells . . . . .	321

6.2.1	Differentiation of Sieve Plates . . . . .	321
6.2.2	Differentiation in Lateral Walls . . . . .	328
6.3	Companion Cells . . . . .	328
6.4	The Phloem Parenchyma . . . . .	335
6.4.1	“Vertical” Phloem Parenchyma (Axial Parenchyma) . . . .	336
6.4.2	“Horizontal” Phloem Parenchyma (Ray Parenchyma) . . .	336
6.4.3	Phloem Parenchyma Pits . . . . .	337
6.4.4	Some Cytochemical Data . . . . .	337
6.5	Phloem Fibres . . . . .	340
6.6	Primary Phloem . . . . .	342
6.6.1	Protophloem . . . . .	342
6.6.2	Metaphloem . . . . .	345
6.7	Secondary Phloem . . . . .	348
6.7.1	Secondary Phloem of Gymnosperms . . . . .	348
6.7.2	Secondary Phloem of Dicotyledons . . . . .	352
6.7.2.1	Various Cell Types and Their Arrangement . . . . .	352
6.7.2.2	The Sieve Cell in the Series of Dicotyledons . . . . .	358
6.8	The Phloem in the Series of Vascular Plants . . . . .	360
6.9	Histology and Cytology of the Phloem and Mechanisms of Translocation . . . . .	362
	References . . . . .	364

## 7 Xylem (Vascular Tissues)

---

7.1	Characteristic Elements: Tracheids and Vessel Members . .	369
7.1.1	General Structures of the Cell Walls of Differentiated Tracheids and Vessel Members . . . . .	370
7.1.2	Xylem Pits . . . . .	373
7.1.3	Cell Wall Differentiation of Tracheids and Vessel Elements	378
7.1.3.1	Infrastructural Cytology of Secondary Cell Wall Elaborations: Transversal Growth, Dictyosomes, Endoplasmic Reticulum, Microtubules, Intercellular Connections . . . . .	380
7.1.3.2	Cytology of Perforation Processes Between Vessel Elements	384
7.1.3.3	Partial Hydrolysis in Bordered Pits Between Vessels or Between Tracheids . . . . .	386
7.1.3.4	Infrastructural Cytochemistry of the Lignification . . . . .	386
7.1.4	Nucleus and Cytoplasm Degeneration . . . . .	388
7.1.5	Tertiary Thickenings and “Warty Layer” . . . . .	394
7.2	Xylem Fibres . . . . .	396
7.2.1	General Features and Various Categories . . . . .	396
7.2.2	Cytological Data, Seasonal Variations and Life Duration . .	398

7.3	Xylem Parenchyma . . . . .	402
7.3.1	Vertical Xylem Parenchyma . . . . .	402
7.3.2	Horizontal Xylem Parenchyma (Xylem Rays) . . . . .	404
7.3.3	Cytology and Seasonal Behaviour of Xylem Parenchyma . . . . .	406
7.3.3.1	Seasonal Parenchymatous Productions of the Cambium . . . . .	406
7.3.3.2	Ultrastructural Cytology of the Differentiation of Xylem Parenchyma . . . . .	408
7.3.4	Tyloses . . . . .	417
7.4	Primary Xylem . . . . .	419
7.4.1	Protoxylem . . . . .	419
7.4.2	Metaxylem . . . . .	420
7.5	Secondary Xylem . . . . .	421
7.5.1	Distinctive Characters . . . . .	421
7.5.2	General Features . . . . .	421
7.5.3	Gymnosperm Wood . . . . .	424
7.5.3.1	Tracheids . . . . .	424
7.5.3.2	Vertical Parenchyma and Resin Ducts . . . . .	426
7.5.3.3	Horizontal Parenchyma . . . . .	428
7.5.4	Ligneous Dicotyledon Wood . . . . .	428
7.5.4.1	Distribution and Size of Vessels . . . . .	430
7.5.4.2	Distribution of the Vertical Parenchyma . . . . .	432
7.5.4.3	Structure of the Xylem Rays . . . . .	434
7.5.4.4	Disposition of Terminal Walls of Vertical Parenchyma Cells . . . . .	435
7.5.5	Histology and Mechanical Properties of Woods . . . . .	436
7.6	The Xylem and the Systematics of Vascular Plants . . . . .	436
7.7	The Xylem and the Phylogenetic Trends of Vascular Plants . . . . .	440
	References . . . . .	441

## **8 Supporting Tissues**

---

	A. Collenchyma . . . . .	446
8.1	Cytological Structures of the Differentiated Collenchyma Cells . . . . .	446
8.1.1	Structure of the Cell Wall . . . . .	446
8.1.2	The Protoplasma of Collocytes . . . . .	456
8.2	Origin and Setting in Place of the Collenchyma . . . . .	457
8.3	Differentiation of the Collocytes . . . . .	460
8.4	Anatomical Localization . . . . .	463
8.5	Mechanical Properties . . . . .	464
8.6	Collenchyma in the Series of Vascular Plants . . . . .	464

	B. Sclerenchyma . . . . .	465
8.7	General Characteristics and Various Types . . . . .	465
8.8	Sclerenchyma of "First Formation" . . . . .	466
8.8.1	Compact Sclerenchymatous Tissues . . . . .	466
8.8.2	Sclereids . . . . .	468
8.9	Origin and Differentiation of the Cells of First Formation Sclerenchyma . . . . .	471
8.9.1	Differentiation of Compact Sclerenchyma . . . . .	471
8.9.1.1	Differentiation of the Protoplasm . . . . .	471
8.9.1.2	Differentiation of Cell Walls . . . . .	474
8.9.2	Differentiation of Sclereids . . . . .	475
8.10	Late Sclerenchyma or Sclerenchyma of "Second Formation" . . . . .	476
8.11	Mechanical Properties . . . . .	480
	References . . . . .	480

## **9 Secretory Cells and Secretory Tissues**

9.1	Concept and Various Types . . . . .	482
9.2	Secretory Epidermis . . . . .	483
9.3	Secretory Trichomes . . . . .	485
9.4	Nectaries . . . . .	494
9.5	Hydathodes . . . . .	501
9.6	Secretory Cavities . . . . .	504
9.6.1	Schizogenous Cavities . . . . .	504
9.6.2	Schizolysigenous Cavities . . . . .	506
9.7	Secretory Canals . . . . .	507
9.8	Sites of Synthesis, Transport and Cytological Mechanisms of Excretion . . . . .	509
9.9	Isolated Secretory Cells . . . . .	518
9.10	Tanniferous Cells . . . . .	519
9.11	Pseudolaticifers . . . . .	522
9.11.1	Concept . . . . .	522
9.11.2	Anatomical Distribution and Arrangements . . . . .	522
9.11.3	Origin and Mode of Growth . . . . .	523
9.11.4	Systematic Repartition . . . . .	524
9.11.5	Infrastructures of Pseudolaticifers . . . . .	525
9.11.5.1	Vacuolar Apparatus . . . . .	525
9.11.5.2	Other Organelles . . . . .	526
9.11.5.3	Secretion Grains and Latex . . . . .	526
9.11.5.4	Mechanisms of Cell Wall Perforation . . . . .	528

9.12	True Laticifers . . . . .	533
9.12.1	Origin and Development . . . . .	533
9.12.2	Differentiation and Cytological Structures . . . . .	535
9.12.2.1	Ancient Works in Light Microscopy . . . . .	535
9.12.2.2	Cell Wall Differentiation . . . . .	537
9.12.2.3	Origin of the Vacuolar Apparatus . . . . .	538
9.12.2.4	Cytology of the Latex Secretions . . . . .	541
9.12.2.5	Autophagic Phenomena in Differentiated Laticifers . . . . .	543
9.12.2.6	Behaviour of Other Organelles . . . . .	545
9.12.3	Anatomical Localizations . . . . .	550
9.12.4	Composition and Physical State of the Latex . . . . .	552
9.12.5	Possible Functions of Laticifers . . . . .	553
	References . . . . .	553
