

Contents of Part I

0.	Introduction	7
1.	Copying Processes	9
1.1.	Office Copying	9
1.1.1.	Electrophotography	9
1.1.1.1.	Photoreceptor	10
1.1.1.2.	Corotron Charging	14
1.1.1.3.	Light Exposure	15
1.1.1.4.	Image Development	16
1.1.1.5.	Image Transfer and Fusing	19
1.1.1.6.	Photoreceptor Cleaning and Erase	20
1.1.1.7.	Other Electrophotographic Imaging Systems	20
1.1.2.	Thermographic Printing	23
1.1.2.1.	Thermal Print Transducers	24
1.1.2.2.	Resistive Ribbon Technology	27
1.1.2.3.	Imaging Materials and Mechanisms	28
1.1.2.4.	Comparison of Thermal Technologies	32
1.1.3.	Ink-Jet Printing	33
1.1.3.1.	Continuous Ink Jet	35
1.1.3.2.	Impulse (Drop-on-Demand) Ink Jet	38
1.1.3.3.	Ink-Jet Nozzle Orifice	42
1.1.3.4.	Ink-Jet Inks	43
1.1.3.5.	Color Printing with Ink Jets	44
1.2.	Technical Copying	51
1.2.1.	Diazotyping	52
1.2.1.1.	Photolysis	52
1.2.1.2.	Coupling Reaction	53
1.2.1.3.	Production of Diazotyping Material	54
1.2.1.4.	Processing	54
1.2.2.	Other Photochemical Systems	55
1.2.3.	Silver Process	56
1.2.3.1.	Black and White Copying Materials Based on Silver Diffusion Transfer Technology	58
1.2.3.2.	Color-Copying Materials Based on Dye Diffusion Chemistry	62
1.3.	Microfilms and Microfiches	67
1.3.1.	Diazotyping	67
1.3.2.	Vesicular Film	68
2.	Imaging in Graphic Arts	69

2.1. Graphic Arts Photography	69
2.1.1. Classes of Photomaterials Used in Prepress Production	69
2.1.2. Flow Scheme of Graphic Prepress Process	70
2.2. Basics of the Use of Light-Sensitive Nonsilver Materials in Graphic Arts	74
2.2.1. Application	74
2.2.2. Chemical Fundamentals	76
2.2.2.1. Photosolubilizing Systems	76
2.2.2.2. Photoinsolubilizing (Photocuring) Systems	77
2.2.2.3. Photophysical Principles of Image Generation	80
2.3. Color Proofing	82
2.3.1. Basics	82
2.3.2. Applications	82
2.3.3. Overlay Systems	83
2.3.4. Single-Sheet Systems	84
2.3.4.1. Precolored Systems	84
2.3.4.2. Systems with Colors Generated During Processing	85
2.3.5. Digital Proofing	87
2.4. Platemaking	88
2.4.1. Lithography (Planographic Printing, Offset)	88
2.4.1.1. Substrates	89
2.4.1.2. Coating and Further Processing	91
2.4.1.3. Processing of Presensitized Plates	91
2.4.2. Letterpress and Flexography	100
2.4.2.1. Structure of Photopolymeric Letterpress and Flexographic Plates ...	100
2.4.2.2. Production and Requirements of Photopolymer Letterpress and Flexographic Plates	102
2.4.2.3. Chemistry of Photopolymerizable Printing Sheets	103
2.4.2.4. Future Developments	105
2.4.3. Gravure Printing	105
2.4.3.1. Conventional Method of GravurePlatemaking	106
2.4.3.2. Electromechanical Gravure Platemaking	108
2.4.3.3. Electron-Beam and Laser Gravure	109
2.4.4. Screen Printing	110
2.4.4.1. The Screen	111
2.4.4.2. The Stencil	111
3. Imaging for Electronics	113
3.1. Photoresists	113
3.1.1. Industrial Applications of Photoresists	115
3.1.2. Function and Chemistry of Photoresists	116
3.1.2.1. Positive Photoresists	116
3.1.2.2. Negative Photoresists	118
3.1.3. Testing Methods	120
3.1.4. Economic Aspects and Suppliers of Photoresists	121
3.1.5. Occupational Health and Environmental Protection	122

3.2. Printed Circuits (Printed Circuit Boards)	122
3.2.1. Methods of Producing Printed Circuit Boards	123
3.2.2. Masking Techniques	123
3.2.2.1. Exposure Masks	123
3.2.2.2. Screen Printing	123
3.2.2.3. Photoprinting	124
3.2.2.4. Other Techniques	124
3.2.3. Economic Aspects	125
3.2.4. Occupational Health and Environmental Protection	125
3.3. Microelectronic Devices	125
3.3.1. Integrated Circuit Manufacturing	125
3.3.2. Photoprocess	127
3.3.3. Techniques for Submicron Lithography	130
4. Photochemical Machining	135
4.1. Artwork Generation and Phototool Production	136
4.2. Materials	137
4.3. Photoresist Systems	137
4.4. Etching Technology	138
4.5. Process Capability	139
4.6. Economic Aspects	140
4.7. Products	140
5. References	141

Contents of Part II

1. Magnetic Recording	161
1.1. General Aspects of Magnetic Recording	162
1.1.1. Recording Principles	162
1.1.2. Recording Systems	163
1.1.3. Encoding Strategies	164
1.1.4. Read-Out Signals	164
1.1.5. Recording Densities	165
1.1.6. Future Developments	168
1.2. Magnetic Tape Mastering and Duplicated Tape and Disk Production ..	169
1.2.1. Direct Recording Duplication	169
1.2.2. Anhyseretic Bias Field Duplication	170
1.2.3. Mirror Master Tape	171
1.2.4. Thermal Magnetic (TMD) Duplication	172
1.3. Longitudinal Magnetic Recording Materials	173
1.3.1. Material Specifications	173
1.3.2. Production Processes	177
1.3.3. γ -Iron(III) Oxides	179
1.3.4. Metallic Iron	180
1.3.5. Chromium Dioxide	181
1.3.6. Metal Alloy Films	181
1.3.7. Barium Ferrites	182
1.4. Perpendicular Magnetic Recording Materials	182
1.4.1. Magnetic Heads	183
1.4.2. Development History	184
1.4.3. Material Specifications	185
1.4.4. Deposition Techniques	187
1.4.5. Microstructure	187
1.4.6. Micromagnetism	188
1.4.7. Co-Cr/Ni-Fe Alloy Bilayers	188
1.4.8. Barium Ferrites	189
1.4.9. Future Developments	191
1.5. Magnetic Bubble Domain Recording Materials	191
1.5.1. Applications	193
1.5.2. Material Specifications	193
1.5.3. Deposition Technique for Garnet Materials	194
1.5.4. Propagation-Detection by Permalloy (NiFe) Films	195
1.5.5. Ion-Implantation Devices	196

1.5.6.	Current-Access Devices.....	198
1.5.7.	Future Developments	198
1.6.	Economic Aspects of Magnetic Recording	198
1.6.1.	Audio Recording	198
1.6.2.	Video Recording	200
1.6.3.	Data Recording	200
1.6.4.	Production Processes	202
2.	Optical Recording	203
2.1.	General Aspects of Optical Recording	206
2.1.1.	Recording Principles	206
2.1.2.	Optical Heads.....	207
2.1.3.	Encoding Strategies.....	209
2.1.4.	Read-Out Signals.....	210
2.1.5.	Recording Systems	211
2.1.6.	Future Developments	212
2.2.	Optical Disc Mastering and Replicated Stamper Production	213
2.2.1.	Photoresist Development Mastering.....	214
2.2.2.	Ablative Dye Mastering	217
2.2.3.	Direct Metal Mastering	217
2.2.4.	Metal Replicas and Electroplated Stampers	218
2.2.5.	Polymer Replicas and Stampers	218
2.3.	Read-Only Optical Recording Materials	220
2.3.1.	Production Processes.....	220
2.3.2.	Material Specifications	221
2.3.3.	Molding Processes.....	225
2.3.4.	Photoreplication Process.....	227
2.3.5.	Metallization	230
2.3.6.	Protective Coating.....	231
2.3.7.	Nonstandard Replication Processes	232
2.4.	Write-Once Optical Recording Materials	233
2.4.1.	Material Specifications	233
2.4.2.	Deposition Techniques	236
2.4.3.	Tellurium Alloys	236
2.4.4.	Organic Dyes	238
2.4.5.	Metal Particle Colloids	240
2.4.6.	Metal-Polymer Bilayers.....	240
2.4.7.	Phase Change Alloys.....	241
2.4.8.	Alloying Bilayers	242
2.4.9.	Agglomeration	243
2.4.10.	Surface Texture	243
2.5.	Reversible Optical Recording Materials	244
2.5.1.	Magneto-Optic Alloys.....	244
2.5.2.	Phase Change Alloys.....	252
2.5.3.	Dye-in-Polymer Mixtures	256

2.5.4.	Liquid Crystals	260
2.5.5.	Photochromics	262
2.5.6.	Photochemical Hole Burning	263
2.6.	Economic Aspects of Optical Recording	263
2.6.1.	CD-Audio	263
2.6.2.	CD-ROM	265
2.6.3.	Laser Discs (Video)	265
2.6.4.	Write-Once Discs	266
2.6.5.	Rewritable Discs	266
2.6.6.	Production Processes	267
3.	References	269
