<b>1</b>	<b>Transformation of Steels During Cooling</b>	
	By H. P. Hougardy	1
1.1	Introduction	1
1.2	Constitution of Iron Alloys	1
1.3	Kinetics of Transformation	3
1.3.1	Principles	3
1.3.2	Microstructures of Steels	4
1.3.2.1	Types of Microstructure	4
1.3.2.2	Ferrite and Pearlite	4
1.3.2.3	Martensite	5
1.3.2.4	Bainite	7
1.3.2.5	Influence of Transformation Temperature	11
1.3.2.6	Tempering	11
1.3.3	Mechanical Properties of Microstructures	12
1.3.4	Transformation Diagrams	12
1.3.4.1	Austenitization	12
1.3.4.2	Isothermal Transformation	14
1.3.4.3	Transformation During Continuous Cooling	15
1.4	Factors Influencing the Transformation	15
1.4.1	Austenitizing Conditions	15
1.4.2	Cooling Rate	15
1.4.3	Alloying Elements	15
1.5	Description of Transformation in Components	16
1.6	Calculation of Transformation and Properties	17
	References	17
<b>2</b>	<b>Mechanical Properties of Ferrous and Nonferrous Alloys After Quenching</b>	
	By H. J. Spies	19
2.1	Objectives of Quenching	19
2.2	Influence of Heat Treatment Structures on the Mechanical Properties	21
2.2.1	Ferrous Materials	21
2.2.2	Precipitation-Hardenable Aluminium Alloys	29
2.3	Characterization of Transformation Behaviour	33
	References	39

<b>3</b>	<b>Thermo- and Fluiddynamic Principles of Heat Transfer During Cooling</b>	
	By F. Mayinger . . . . .	41
3.1	Phenomena of Heat Transfer During Immersion Cooling . . . . .	41
3.2	Single Phase Convection . . . . .	48
3.2.1	Heat Transfer Equations for Forced Convection . . . . .	53
3.2.2	Heat Transfer Equations for Natural Convection . . . . .	54
3.3	Two Phase Heat Transfer . . . . .	55
3.3.1	Free Convection Boiling . . . . .	55
3.3.2	Forced Convection Boiling . . . . .	57
3.3.3	Heat Transfer with Film Boiling . . . . .	63
3.3.4	Transition Boiling . . . . .	65
3.3.5	Critical Heat Flux . . . . .	66
3.3.6	Immersion Cooling . . . . .	67
	List of Symbols . . . . .	69
	List of Subscripts . . . . .	70
	References . . . . .	71
<b>4</b>	<b>Heat Transfer During Cooling of Heated Metallic Objects with Evaporating Liquids</b>	
	By R. Jeschar, E. Specht and Chr. Köhler . . . . .	73
4.1	Mechanism of Heat Transfer . . . . .	73
4.2	Film Quenching . . . . .	75
4.3	Immersion Quenching . . . . .	81
4.4	Spray Quenching . . . . .	89
	References . . . . .	92
<b>5</b>	<b>Wetting Kinematics</b>	
	By H. M. Tensi . . . . .	91
5.1	Introduction . . . . .	93
5.2	Definition of the Wetting Process . . . . .	93
5.3	Model of Vapour Blanket Breakdown During Immersion Cooling of Metallic Bodies . . . . .	97
5.4	Effect of Wetting Process on Cooling Behaviour . . . . .	99
5.5	Impact of Quenchant Properties on Wetting Process . . . . .	102
5.6	Impact of Sample Properties on Wetting Process . . . . .	110
5.7	Summary . . . . .	114
5.8	List of Symbols . . . . .	115
	References . . . . .	116
<b>6</b>	<b>Residual Stresses After Cooling</b>	
	By E. Macherauch and O. Vöhringer . . . . .	117
6.1	Introduction . . . . .	117
6.2	Some Fundamentals . . . . .	119
6.2.1	Definitions of Residual Stresses . . . . .	119
6.2.2	Quenching of Steel Cylinders . . . . .	123
6.2.3	Transformation Processes of Austenitized Steels During Quenching . . .	127

6.3	Stresses During Quenching of Cylinders with Ideal Linear-Elastic Deformation Behaviour . . . . .	133
6.3.1	Shrinking Stresses Due to Local and Temporal Differences in Thermal Shrinking . . . . .	133
6.3.2	Transformation Stresses Due to Local and Temporal Stresses in Phase Transformations . . . . .	135
6.3.3	Superposition of Shrinking and Transformation Stresses . . . . .	136
6.4	Residual Stresses After Quenching of Cylinders with Real Elastic-Plastic Deformation Behaviour . . . . .	137
6.4.1	Plastic Deformations Due to Shrinking and Phase Transformations . . . . .	137
6.4.2	General Aspects of Shrinking, Transformation and Hardening Residual Stresses . . . . .	139
6.4.3	Characteristic Examples of Stresses and Residual Stresses in Differently Quenched Plain Carbon and Low Alloy Steels . . . . .	147
6.5	Residual Stresses After Quenching of Carburized Steels . . . . .	155
6.5.1	Some Fundamentals . . . . .	155
6.5.2	Characteristic Examples . . . . .	161
6.6	Residual Stresses After Quenching of Steels with Induction Heated Surface Layers . . . . .	168
6.6.1	Quenching Without Transformation . . . . .	168
6.6.2	Quenching Combined with Transformation . . . . .	169
6.7	Residual Stresses After Self-Quenching of Steels with Laser-Heated Surface Layers . . . . .	174
6.7.1	Quenching After Austenitizing . . . . .	174
6.7.2	Quenching After Melting . . . . .	178
	References . . . . .	180
<b>7</b>	<b>Effect of Workpiece Surface Properties on Cooling Behaviour</b>	
	By F. Moreaux and G. Beck . . . . .	182
7.1	Effect of Quenching Conditions on Liquid Vaporization Types . . . . .	182
7.1.1	Transition Between Film-Boiling and Nucleate-Boiling . . . . .	183
7.1.2	Instability of Film-Boiling in Sub-Cooled Water . . . . .	184
7.1.3	Cooling Law Calculation . . . . .	189
7.2	Influence on the Workpiece Surface's Thermophysical Properties . . . . .	191
7.2.1	Influence of the Initial Workpiece-Liquid Contact on the Cooling Process . . . . .	191
7.2.2	Surface Thermal Resistance Effect on the Cooling Process . . . . .	196
7.2.3	Influence of the Surface Condition on the Cooling Process . . . . .	200
7.3	Quenching Control by Adding a Solute to the Water . . . . .	200
7.3.1	Aqueous Solutions of Inorganic Solutes . . . . .	200
7.3.2	Organic Polymer Aqueous Solution . . . . .	202
	References . . . . .	206
<b>8</b>	<b>Determination of Quenching Power of Various Fluids . . . . .</b>	<b>208</b>
8.1	Methods and Standards for Laboratory Tests of Liquid Quenchants By H. M. Tensi . . . . .	208
8.1.1	Laboratory Test for Industrial Quenching Oils . . . . .	209

8.1.2	Laboratory Test for Industrial Polymer Quenchants	210
8.1.3	Representation of Results	218
	References	218
	List of Symbols	219
8.2	Concept of the Grossmann's $H$ -Value and its Shortcomings	
	By B. Liščić	219
8.2.1	Theoretical Background and Definition of the "Quenching Severity $H$ "	219
8.2.2	The Use and Evaluation of $H$ -Values	221
8.2.3	Shortcomings of the $H$ -Value	227
8.3	Practical Problems when Measuring Temperature Within Quenching Specimens	
	By B. Liščić	232
8.4	Measurement and Recording of the Quenching Intensity in Workshop Practice Based on Heat-Flux-Density	
	By B. Liščić	234
8.4.1	Concept and Aims of the Temperature Gradient Method	234
8.4.2	Description of the Method	235
8.5	Definition and Evaluation of the Quenching Intensity	
	By B. Liščić	243
8.6	Possibilities of Automatic Control of the Quenching Process	
	By B. Liščić	244
	References	247
<b>9</b>	<b>Types of Cooling Media and Their Properties</b>	
	By W. Luty	248
9.1	Required Properties	248
9.2	General Classification and Comparison of Quenchants	249
9.3	Water as a Quenching Medium	254
9.3.1	General Characteristic	254
9.3.2	Effect of the Temperature of Quenching Water upon its Quenching Power	256
9.3.3	Effect of Agitation Rate	258
9.3.4	Effect of Water Contamination	259
9.4	Water Solutions of Non-Organic Salts and Alkali	260
9.5	Water-Oil Emulsions	263
9.6	Aqueous Polymer Solutions	266
9.6.1	General Characteristic	267
9.6.2	Performance Characteristics	274
9.6.3	How to Use Polymer Quenchants	277
9.7	Mineral Quenching Oils	280
9.7.1	Composition of Quenching Oils	281
9.7.2	Classification and General Description of Quenching Oils	285
9.7.3	Physical and Chemical Properties	287
9.7.4	Quenching Power of Oils	291
9.7.5	Effects of Oils Temperature and Agitation	295
9.7.6	Contamination of Quenching Oils with Water	297
9.7.7	Ageing Process in Quenching Oils	300
9.7.8	Hot Quenching Oils	301

9.7.9	Vacuum Quenching Oils	304
9.7.10	Fire Hazard and Safety Precautions	305
9.8	Saltbaths used in Martempering and Austempering	307
9.8.1	General Description	307
9.8.2	Salpetre Salts	309
9.8.3	Martempering and Austempering in Molten Alkalis and Alkali-Salt-Baths	313
9.8.4	Safety Precautions when Using Salpetre Baths	315
9.9	Gas Quenching	316
9.9.1	Air Quenching	316
9.9.2	In Situ Gas Quenching in Vacuum Furnaces	317
9.10	Fluidized Quenching Beds	324
9.10.1	Fluidization Effect	324
9.10.2	General Description	325
9.10.3	Effect of Technological Factors on the Quenching Power	327
9.10.4	The Range of Application of Fluidized Beds	334
