<b>1. How to Produce Gas from Coal?</b> .....	1
1.1 What and Where Is Coal? .....	1
1.1.1 Reserves and Resources? .....	1
1.1.2 Properties of Different Types of Coal .....	2
1.1.3 Exploration, Mining and Coal Preparation .....	3
1.2 Coal Gasification .....	6
1.2.1 History .....	6
1.2.2 Methods of Coal Gasification .....	7
1.2.3 Selection of Suitable Processes .....	7
1.2.4 Fundamentals of Coal Gasification .....	9
1.3 Technology of Gasification Processes .....	15
1.3.1 Moving Bed Gasification .....	16
1.3.2 Fluidized Bed Gasification .....	27
1.3.3 Entrained Flow Gasification .....	32
1.3.4 Slurry Gasification .....	37
1.4 Interim Summary .....	41
<b>2. How to Purify and to Condition Methanol Synthesis Gas?</b> ....	44
2.1 Why and to What Extent Is Gas Purification Required? .....	44
2.2 Principles of Gas Purification .....	45
2.2.1 Adsorption .....	45
2.2.2 Absorption .....	51
2.2.3 Mechanical/Physical Gas Purification .....	55
2.3 Different Types of Gas Purification Processes .....	58
2.3.1 Physical Purification Processes .....	58
2.3.2 Chemical Purification Processes .....	71
2.3.3 Processes Using Mixed Solvents .....	77
2.3.4 COS-Shift to Assist Gas Purification .....	84
2.4 Conditioning of Methanol Synthesis Gas .....	87
2.4.1 Conditioning to Improve the Stoichiometric Number ..	87
2.4.2 Conditioning to Improve the Syngas Yield .....	93
<b>3. How to Synthesize Methanol and Alcohol Mixtures?</b> .....	102
3.1 Methanol – Its History, Its Properties and What Becomes of It	102
3.1.1 History of Methanol .....	102

3.1.2	The Use of Methanol .....	104
3.1.3	Physical Properties .....	104
3.1.4	Chemical Properties .....	106
3.1.5	Toxicity .....	107
3.2	Fundamentals of Methanol Synthesis .....	107
3.2.1	Physical Basis .....	107
3.2.2	Methanol Yield from Syngas .....	110
3.2.3	Catalysts for Methanol Synthesis .....	112
3.2.4	Selection of Reaction Conditions .....	115
3.3	Synthesis Loop and Its Various Appearances .....	119
3.3.1	The Loop .....	119
3.3.2	Methanol Syntheses Using Fixed Bed Catalysts .....	121
3.3.3	Other Methanol Syntheses .....	128
3.4	Production of Mixed Alcohols .....	130
3.4.1	Why Mixed Alcohols and Which Ones? .....	130
3.4.2	Different Types of Mixed Alcohols Processes .....	130
<b>4.</b>	<b>How to Obtain Pure Methanol? .....</b>	<b>133</b>
4.1	Why Refining Methanol? .....	133
4.2	Basic Methanol Distillation Systems .....	135
4.3	Production of Grade AA Methanol .....	138
4.4	Purification of Mixed Alcohols .....	144
<b>5.</b>	<b>How to Process By-Products and Wastes? .....</b>	<b>146</b>
5.1	Water and Aqueous Condensates .....	146
5.1.1	Treatment of Aqueous Condensates .....	147
5.1.2	Removal and Recovery of Sulfur and Ammonia .....	152
5.1.3	Biological Treatment .....	155
5.2	Hydrocarbon Condensates .....	157
5.3	Waste Gases .....	158
5.3.1	Recovery of Elemental Sulfur .....	159
5.3.2	Design Variations of the CLAUS Process .....	161
5.3.3	Production of Sulfuric Acid .....	162
5.3.4	Tailgas Clean-up .....	164
<b>6.</b>	<b>How to Supply Utilities to a Coal-to-Methanol Plant? .....</b>	<b>170</b>
6.1	Air Separation Units .....	170
6.2	Steam and Electric Power .....	173
6.3	Water and Boiler Feed Water .....	176
6.4	Cooling Systems .....	180
6.5	Inert Gas .....	181
6.6	Instrument and Operating Air .....	182

6.7 Other Off-Sites ..... 182

7. What Could a Methanol Plant Look Like? ..... 183

    7.1 Methanol from Lignite – Application of the LURGI Pressure  
        Gasification Process ..... 183

    7.2 Description of the Process Concept ..... 185

8. Future Outlook ..... 197
