Tools and Probes

<i>E. Palecek, F. Jelen, E. Minářová, K. Nejedlý, J. Palecek, P. Pecinka, J. Ricicová, M. Vojtíšková and D. Zachová</i> Osmium tetroxide complexes: Single-strand selective probes of the DNA structure in vitro and in cells	1
---	---

<i>R.P. May</i> Neutron solution-scattering investigations of large protein-nucleic acid complexes	23
--	----

<i>H. Sklenar and W. Schulz</i> Modelling base sequence effects in DNA and RNA.....	43
--	----

DNA Structure

<i>U. Heinemann, C. Alings, M. Bansal and M. Hahn</i> Local structural features of DNA as revealed by single-crystal X-ray diffraction methods	53
--	----

<i>S. Diekmann and A.A. Travers</i> Formation of B'-DNA structure by homopolymer dA:dT tracts	63
--	----

<i>K. Rippe, V.V. Kuryavyi, E. Westhof and T.M. Jovin</i> Polymorphism and possible biological functions of parallel- stranded DNA	81
--	----

<i>D.R. Duckett, A.I.H. Murchie, R.M. Clegg, S. Diekmann, E. von Kitzing and D.M.J. Lilley</i>	
Analysing the structure of DNA junctions	109

DNA-Protein Interactions

<i>D. Suck</i>	
Protein-nucleic acid structure analysis by X-ray crystallography	
A critical review	127

<i>S.E.V. Phillips, C.W.G. Boys, Y.-Y. He, I. Manfield, T. McNally, O. Navratil, I.G. Old, K. Phillips, J.B. Rafferty, W.S. Somers, S. Strathdee, I. Saint-Girons and P.G. Stockley</i>	
Structure and function of <i>E. coli</i> met repressor	143

<i>W. Gläsner, F. Hennecke and H.-J. Fritz</i>	
Enzymatic properties and biological functions of Vsr DNA mismatch endonuclease	165

<i>R. Baumeister and W. Hillen</i>	
Tet repressor- <i>tet</i> operator interactions derived from mutants with new recognition specificities	175

<i>D.G. Knorre</i>	
Reactive oligonucleotide derivatives as a tool to study protein- nucleic acid interactions	185

<i>D. Porschke</i>	
Structure and dynamics of nucleic acids and of protein-nucleic acid complexes	193

Transcription and RNA Polymerase

A. Bell, R. Williams, K. Gaston and S. Busby

Molecular interactions during transcription activation
by the cyclic AMP receptor protein..... 205

H. Heumann, P. Schickor, T. Hermann, E. Palecek and W. Metzger

Protein-DNA interface of the complex of T7 A1 promoter and
DNA-dependent RNA polymerase from *E. coli* 223

N. Shimamoto, H. Kabata, O. Kurosawa and M. Washizu

Visualization of single molecule of RNA polymerase and its
application for detecting sliding motion on T7 DNA
dielectrophoretically manipulated 241

RNA and RNA-Protein Interactions

E. Westhof and F. Michel

Some tertiary motifs of RNA foldings..... 255

J.D. Puglisi, R. Tan, A.D. Frankel and J.R. Williamson

Structure and function of HIV TAR RNA 269

*J. Cavarelli, B. Rees, M. Ruff, A. Poterszman, J.C. Thierry
and D. Moras*

Class II aminoacyl-tRNA synthetases seen through the crystal
structure of the complex between yeast tRNA^{Asp} aspartyl
tRNA synthetase 287

<i>C. Oubridge, T.H. Jessen, J. Li, C.H. Teo, C. Pritchard, P.R. Evans and K. Nagai</i> A model of the interaction between the U1 A small nuclear ribonucleoprotein and U1 small nuclear RNA stem/loop II	299
<i>H.F. Noller, T. Powers, P.N. Allen, D. Moazed and S. Stern</i> rRNA and translation	313
<i>G. Ott and M. Sprinzl</i> Ternary complexes of bacterial aminoacyl-tRNAs with elongation factor Tu and GTP	323
<i>C.L. Will, B. Kastner and R. Lührmann</i> The spliceosomal snRNP proteins and their contributions to snRNP morphology and function.....	343
<i>S.F.J. Le Grice, N. Richter-Cook, N.M. Cirino, K.J. Howard, B.M. Wöhrl, C. Barat, T. Naas, O. Schatz and J.L. Darlix</i> Role of HIV reverse transcriptase subunits in enzyme structure and function	369
<i>W. Doster, S. Cusack, F. Nardi and M. Settles</i> Plasticity of proteins and tRNA investigated by inelastic neutron scattering.....	391
<i>D. Riesner, T. Baumstark, F. Qu, T. Klahn, P. Loss, V. Rosenbaum, M. Schmitz and G. Steger</i> Physical basis and biological examples of metastable RNA structures	401
<i>C. K. Biebricher</i> Replication of short-chained RNA species by Q β replicase	437

<i>R. Bald, K. Brumm, B. Buchholz, J.P. Fürste, R.K. Hartmann, A. Jäschke, R. Kretschmer-Kazemi Far, S. Lorenz, E. Raderschall, J. Schlegl, T. Specht, M. Zhang, D. Cech and V.A. Erdmann</i>	
New possibilities in RNA research through RNA engineering.....	449
