CONTENTS

1 Introduction 1

1.1 What is Scientific Visualization? 1
1.2 History and Background 3
1.3 Current Activities in Scientific Visualization 5
1.3.1 USA 5
1.3.2 UK 6
1.3.3 Europe 7
1.4 Background to the AGOCG Workshop 8
1.5 Introduction to the Book 9
1.6 Recommendations of the Workshop 10
1.7 Key References 12

2 Framework 15

2.1 Introduction 15
2.2 Scope 16
2.3 High Level Models 16
2.3.1 Model of Creative Thinking 16
2.3.2 Model of Scientific Investigation 17
2.3.3 Detailed Model of Visualization 18
2.4 Framework Model 19
2.5 Module Model 20
2.5.1 Overview 20
2.5.2 Details of Data Types 21
2.5.3 Details of Modules 24
2.6 Functionality Aspects 30
2.6.1 Functional Richness 30
2.6.2 Data Import and Export 30
2.6.3 Data Accuracy and Errors 31
2.6.4 Presentation of Metric Information 31
2.6.5 Distributed Architecture 32
2.7 Qualitative Aspects 33
2.7.1 Responsiveness 33

digitalisiert durch DEUTSCHE NATIONAL BIBLIOTHEK

2.7.2 Human-Computer Interface 33
2.7.3 Appropriateness 34
2.7.4 Costs versus Benefits 34
2.8 Implementation 34
2.9 Key References 34

3 Visualization Techniques 37

3.1 Introduction 37
3.2 Elements of a Visualization Technique 38
3.2.1 Building an Empirical Model 38
3.2.2 Representation as an Abstract Visualization Object 39
3.2.3 Realization of the Visualization Object 39
3.3 Classification 40
3.4 Techniques for Point Data 44
3.5 Techniques for Scalar Entities 46
3.5.1 One-Dimensional Domain 46
3.5.2 Two-Dimensional Domain 49
3.5.3 Three-Dimensional Domain 57
3.6 Techniques for Vector Entities 60
3.6.1 Two-Dimensional Vector Fields 62
3.6.2 Three-Dimensional Vector Fields 64
3.7 Techniques for Tensor Fields 64
3.8 Image Processing Techniques 65
3.8.1 Introduction 65
3.8.2 Image Enhancement 66
3.8.3 Feature Extraction and Segmentation 68
3.8.4 Transformations 68
3.8.5 Image Processing Techniques 69
3.9 Animation 69
3.9.1 Animation Techniques 69
3.9.2 Video 70
3.10 Interaction Techniques 72
3.10.1 General Viewing 72
3.10.2 Display Techniques 72
3.10.3 Parameters 73
3.10.4 Associated Data (such as Colourmaps) 73
3.10.5 Selection 74
3.10.6 Annotation 74
3.11 Perception of 3D 75
3.11.1 Context 75

3.11.2 Perspective and Lighting and Shading 77
3.11.3 Stereo Views 80
3.12 Conclusions and Future Trends 82
3.13 Key References 83

4 Data Facilities 87

4.1 Introduction 87
4.2 Data Sources 88
4.3 Data Classification 88
4.3.1 External and Internal Data 88
4.3.2 Original and Derived Data 89
4.3.3 Basic Primitive Elements and Logical Sets 89
4.3.4 Geometric and Property Data 90
4.3.5 Record Data 90
4.3.6 Relationships 92
4.4 Management of Data 92
4.4.1 Data Description and Manipulation Languages 94
4.4.2 Archiving 96
4.5 Data Transformation 97
4.5.1 Data Normalization 97
4.5.2 Filtering 97
4.5.3 Smoothing 98
4.5.4 Grid Rezoning 98
4.5.5 Coordinate Transformation 98
4.5.6 Linear Transformation 98
4.5.7 Geometric transformation 99
4.5.8 Segmentation 99
4.5.9 Feature Detection, Enhancement and Extraction 99
4.5.10 Colour Table Manipulation and Feature Mapping 100
4.6 Data Compression 100
4.6.1 Data Integrity 100
4.6.2 Compression Techniques 101
4.6.3 Standards 101
4.7 Data Formats 102
4.7.1 Generic Data Formats 103
4.7.2 Application-Specific Data Formats 104
4.7.3 Image/Picture Data Formats 105
4.7.4 Data Format Conversion Tools 107
4.7.5 Standards 108
4.8 Recommendations 109
4.9 Key References 109

5 Human-Computer Interface 113

5.1 Introduction 113
5.2 User Issues 115
5.2.1 Cognitive Issues 117
5.2.2 Perceptual Issues 118
5.2.3 Human Factors 120
5.2.4 Organizational Issues 121
5.3 System Issues 122
5.3.1 Flexibility 123
5.3.2 Separation of Logical and Physical Models 123
5.3.3 Virtual and Physical Interaction Devices 124
5.3.4 Dialogue Management 125
5.3.5 Context Sensitive Help 126
5.4 Conclusions and Recommendations 127
5.5 Key References 128

6 Applications 133

6.1 Introduction 133
6.2 Chapter Structure 133
6.3 Cartography 135
6.4 Study of Statistical Indicators 138
6.5 Remote Sensing 141
6.6 Analysis of Archaeological Data 143
6.7 Physical Chemistry and Drug Design 144
6.8 Biochemistry 147
6.9 Materials Research 150
6.10 Medical Science 152
6.11 Archaeological Reconstruction 154
6.12 Meteorology 156
6.13 Ice Stream Visualization 160
6.14 Oceanography 162
6.15 Oil Reservoir Engineering 164
6.16 Computational Fluid Dynamics 166
6.17 Dynamics of Systems 168
6.18 Program Visualization 171
6.19 Conclusions 173
6.20 Key References 174

7 Products 175

7.1 Introduction 175
7.2 Visualization Software Categories 176

7.2.1 Graphics Libraries and Presentation Packages 176
7.2.2 Turnkey Visualization Systems 177
7.2.3 Application Builders 178
7.2.4 Categories explored in this Chapter 179
7.3 Examples of Software Products 180
7.3.1 Factors 180
7.3.2 Examples of Turnkey Visualization Systems 182
7.3.3 Examples of Application Builders 195
7.4 Benchmarking and Validation 202
7.5 Future Trends 203
7.6 Conclusions 204
7.7 Key References 205

8 Conclusions 207

8.1 Summary - and where to get further information 207
8.2 Methodology and Reference Model 208
8.3 Techniques 208
8.4 Data Facilities 208
8.5 Human-Computer Interface 209
8.6 Applications 210
8.7 Products 211
8.8 Infrastructure Support 212
8.9 Other uses of Visualization Tools 213
8.10 Virtual Reality Systems 213
8.11 Importance of Scientific Visualization 214
8.12 References 214

APPENDICES

A Enabling Technologies 217

A.1 Hardware 217
A.1.1 Hardware platforms for ViSC 217
A.1.2 Graphics input for ViSC 218
A.1.3 Graphics output for ViSC 221
A.2 Graphics software for ViSC 223
A.2.1 2D Graphics Systems 224
A.2.2 3D Graphics Systems 224
A.2.3 Window Systems 226
A.3 User Interface Toolkits 227
A.4 Database Systems 228

A.4.1 Basics 228
A.4.2 Database Management System Products 230
A.5 ViSC Generic Data Formats 232
A.5.1 HDF 233
A.5.2 NetCDF 234
A.6 Key References 236

B Glossary 237

B.1 Visualization Terms 237
B.2 Abbreviations and Acronyms 241

C Bibliography 249

Index 273
