1 Morphological Findings in the Coronary Arteries in Fatal Coronary Artery Disease

W. C. Roberts

Introduction 1

Number of Major Epicardial Coronary Arteries Severely Narrowed in the Various "Coronary Events" 2

Quantitative Approach to Atherosclerotic Coronary Artery Disease: Amounts of Narrowing in Each 5-mm Segment of Each of the Four Major Coronary Arteries 3

Distribution of Severe Narrowing in Each of the Three Longest Epicardial Coronary Arteries in Fatal Coronary Artery Disease 6

Clinical Usefulness of the Quantitative Approach to Coronary Artery Disease 7

Significance of Coronary Arterial Thrombus in Transmural Acute Myocardial Infarction 11

Cardiac Morphological Findings in Acute Myocardial Infarction Treated with Thrombolytic Therapy 14

Composition of Atherosclerotic Plaques in Fatal Coronary Artery Disease 15

Effects of Percutaneous Transluminal Coronary Angioplasty on Atherosclerotic Plaques and Relation of Plaque Composition and Arterial Size to Outcome 16

Morphological Findings in Saphenous Veins Used as Coronary Arterial Bypass Conduits 17

2 The L-Arginine:Nitric Oxide Pathway in Physiology and Pathology

S. Moncada and E. A. Higgs

Introduction 21

The Constitutive Nitric Oxide Synthase	21
The Vasculature	21
The Platelet	23
The Nervous System	24
The Inducible Nitric Oxide Synthase	25
The Macrophage	25
The Neutrophil	26
Other Cells and Tissues	27
Immunologically Induced Formation of Nitric Oxide In Vivo	28
Inhibition by Glucocorticoids of Immunologically Induced	
Formation of Nitric Oxide	29
Conclusions	30
3 Endothelial Activation: Its Role in Inflammation, Vascular Injury and Atherogenesis	
<i>R. S. Cotran</i>	
Introduction	37
Endothelial Activation In Vivo	39
Endothelial Activation and Endothelial Injury	40
Endothelial Activation and Atherogenesis	41
Conclusions and Summary	42
4 Basic Fibroblast Growth Factor in Vascular Development and Atherogenesis	
<i>W. Casscells</i>	
Introduction	45
Vascular Injury in Atherosclerosis	46
Vascular Balloon Injury and Restenosis	47
Platelet-Derived Growth Factors	48
Fibroblast Growth Factors	49
Expression of bFGF in Vascular Development and Injury	49
Prospects for Anti-bFGFs	51
Targeted Toxin Therapy	53
5 The Monocyte and Endothelial Injury in Atherogenesis	
<i>R. G. Gerrity</i>	
Monocytes and Lesion-Susceptible Areas	61
Morphology of Lesion-Susceptible Areas	62
Endothelial Transport and Intimal Accumulation in S-Areas ..	63
Monocyte Recruitment in Lesion-Susceptible Areas	65
6 Lp [a]: A Lipoprotein Class with Atherothrombotic Potential	
<i>A. M. Scanu</i>	
Introduction	71
Structural Properties of Lp [a]	71
Lp [a] Physiology	72
Lp [a] as a Cardiovascular Pathogen	73
Atherogenic Potential	73
Thrombogenic Potential	74
Considerations on the Thrombo-atherogenicity of Lp [a]	74

Diagnostic Considerations	75
Approaches to Correct High Plasma Levels of Lp[a]	75
7 Modified Lipoproteins and Atherogenesis	
<i>J. A. Berliner, M. Territo, A. Amdalibi, M. Navab, F. Liao, S. Cushing, S. Imes, J. Kim, B. Van Lenten, A. J. Lusis and A. M. Fogelman</i>	
Introduction	77
Methods	78
Results	78
Discussion	80
8 The Molecular Biology of Apolipoprotein B	
<i>J. Scott</i>	
Introduction	83
Hepatic Apo B Metabolism	83
Structure and Function of Hepatic Apo B-100	85
Apo B-100 as a Ligand for the LDL Receptor and a Heparin-Binding Protein	85
Apo B as a Lipid-Binding Protein	86
Apo B-100 and Lipoprotein Assembly	87
Intestinal Apo B-48 Metabolism	89
Structure and Biosynthesis of Apo B-48	89
Regulation of RNA Editing	91
Conclusions	91
9 Structure and Evolution of the Apolipoprotein and Lipase Gene Families	
<i>L. Chan, W. Hide, Yau-Wen Yang and Wen-Hsiung Li</i>	
Introduction	93
Methods	93
The Soluble Apolipoprotein Multigene Family	94
Evolution of Apo A-I and Apo E	95
Structure and Evolution of the Lipase Gene Family	99
Conservation and Structure	101
Catalytic Residues and Lipid-Binding Regions	101
N-Glycosylation Sites	103
Cysteine Residues	103
Exon/Intron Structure	104
Domains and Exons	104
Catalytic Function	104
Concluding Remarks	105
10 A Gin to Arg Substitution in the Adducin Family of Proteins is a Necessary but not Sufficient Factor for High Blood Pressure in Rats of the Milan Hypertensive Strain	
<i>F. E. Baralle</i>	
Introduction	109

Results	110
Isolation and Partial Identification of a Rat Adducin	
Genomic Clone	110
Isolation of Rat Spleen cDNA Clones	110
The Adducin 63 Sequence	111
Partial Sequences from Human Erythrocyte Adducin	113
Similarities of Adducin 63 to Other Protein Sequences	114
Tissue Distribution of Adducin-Like mRNA	114
Brain Adducin cDNA Alternative Splicing	115
Difference Between MHS and MNS Adducin 63	116
Discussion	116
11 Genetic Control of Plasma Lipid, Lipoprotein and Apolipoprotein Levels: From Restriction Fragment Length Polymorphisms to Specific Mutations	
<i>S. Humphries, A. Dunning, Chun-Fang Xu and P. Talmud</i>	
Background	121
The Apo B Protein	122
The Apo B Gene	123
Apo B Protein Polymorphism	126
Linkage Disequilibrium	127
Apo B Gene Sequencing	128
Conclusions	130
12 Receptor Regulation of Lipoprotein Metabolism	
<i>U. Beisiegel</i>	
Introduction	135
Separate Pathways for Exogenous and Endogenous Lipids	136
Postulating a Chylomicron Remnant Receptor	138
Studies on Chylomicron Remnant Catabolism	139
Characterization of LRP as the Potential Chylomicron Remnant Receptor	140
Structural Features of LRP	140
Regulation of LRP	141
Conclusion	141
13 The High-Density Lipoprotein Receptor	
<i>J. F. Oram</i>	
Introduction	145
High-Density Lipoprotein Receptor Hypothesis	146
Methods	147
High-Density Apolipoproteins Stimulate Translocation and Efflux of Intracellular Sterol	149
Intracellular Signals in High-Density Apolipoprotein-Mediated Sterol Translocation and Efflux	149
The High-Density Lipoprotein Receptor	150
Clinical Implications	151

14 High-Density Lipoprotein Cholesterol, Triglycerides and Coronary Heart Disease <i>R. Patsch and G. Miesenboeck</i>	153
15 Apolipoproteins, Reverse Cholesterol Transport and Coronary Heart Disease <i>G. Assmann, A. von Eckardstein and H. Funke</i>	
Introduction	159
The Role of the Apo A1/C3/A4 Gene in Association Studies and Cosegregation Studies	160
The Role of Apo A-I Mutants	160
Molecular Defects in HDL Cholesterol Deficiency Syndromes	162
Fish-Eye Disease	163
Apo A-I (202 Frameshift)	163
Familial LCAT Deficiency	163
Conclusions	165
16 Cholesterol-Lowering Clinical Trials: Where Do We Go From Here? <i>A. M. Gotto Jr</i>	
Introduction	167
Some Previous Venues	167
Future Directions	176
Subject Index	177
