

Contents

Preface	VII
Chapter 1 Basic principles of Rubber chemistry	1
1.1 Basic Terms	1
1.2 Macromolecules, Polymers and Monomers	1
1.3 The Synthesis of Polymers	2
1.4 Molecular Weight of Polymers	3
1.5 Homopolymers, Copolymers and Terpolymers	4
1.6 Plastomers, Elastomers, Thermoplastic Elastomers and thermosets	5
1.7 Crystalline and Amorphous Structure of Polymers	7
Chapter 2 Fundamentals of Compounding, Forming, Vulcanizing and Finishing of Elastomeric Products	8
2.1 Introduction	8
2.2 Fillers	9
2.3 Plasticizers	10
2.4 Age Resistors	10
2.5 Vulcanizing Ingredients	11
2.6 Special-Purpose Ingredients	13
2.7 Mixing Equipment and procedures	14
2.8 Forming Operations	16
2.9 Vulcanization Techniques	17
2.9.1 Press Vulcanization	17
2.9.2 Open Vulcanization	19
2.9.3 Continuous Vulcanization	19
2.9.4 Cold Vulcanization	20
2.10 Postcure	20
2.11 Finishing Operations	21
2.12 Quality Control	21
Chapter 3 Nomenclature and Classification of Elastomers	22
3.1 Introduction	22
3.2 Nomenclature of Crude Rubbers According to ISO 1629	22
3.3 Nomenclature of Crude Rubbers According to ASTM D 1418	24
3.4 Generic Names of Elastomers	24
3.5 Classification of Elastomers	24
3.5.1 Chemical Saturation of the Polymer Chain	25
3.5.2 Oil Resistance	26
3.5.3 Flame Resistance	27
3.5.4 Service Performance	27
3.6 Prices of Elastomers	27

Chapter 4	Unique Properties of Elastomers	28
4.1	Introduction	28
4.2	Hardness	28
4.3	Tensile Properties	29
4.4	Tear Resistance	29
4.5	Friction and Abrasion	30
4.6	Set, Stress Relaxation and Creep	30
4.7	Rebound Resilience	31
4.8	Hysteresis and Heat Buildup	31
4.9	Permeability to Gases and Vapors	32
4.10	Resistance to Explosive Decompression	32
4.11	Thermal Conductivity	33
4.12	Coefficient of thermal Expansion	33
4.13	Joule Effect	33
4.14	Property Changes at Elevated Temperatures	34
4.15	Property Changes at Low Temperatures	34
4.16	Temperature Limits of Elastomers	35
4.17	Electrical and Electrostatic Properties	36
4.18	Chemical Properties	36
	References	37
Chapter 5	Environmental Aging of Elastomers	38
5.1	Introduction	38
5.2	Deterioration by Ozone Under Tension	38
5.3	Deterioration by Corona	39
5.4	Deterioration by Ozone in Warm Humid Air (Frosting)	39
5.5	Deterioration by Ozone Under Dynamic Strain (Fatigue)	40
5.6	Deterioration by Heat and Oxygen	40
5.7	Deterioration by Sunlight and Oxygen	40
5.8	Deterioration by Metal-Catalyzed Oxidation	41
5.9	Deterioration by Hydrolysis	41
5.10	Deterioration by Atomic Radiation	41
5.11	Deterioration by Microorganisms	43
5.12	Damage from Insects	44
5.12.1	Prevention of Damage from Insects	44
5.13	Damage from Rodents	45
5.13.1	Prevention of Damage from Rodents	45
5.14	Guidelines for Storage of Vulcanized Rubbers	46
	References	46
Chapter 6	Effects of Selected Contiguous Materials on Elastomers	47
6.1	Introduction	47
6.2	Physical and Chemical Effects of Fluids on Elastomers	47
6.2.1	Chemical Effects	47
6.2.2	Physical Effects	48

6.3	Prediction of the Fluid Resistance of Elastomers	48
6.3.1.	Like Dissolves Like	49
6.3.2	Solubility Parameter	50
6.3.3	Aniline Point	51
6.3.4	Elastomer Compatibility Index (ECI) Using Standard Test Elastomers	51
6.4	Review of Standard Test Liquids	54
6.4.1	NACE Test Inhibitors	56
6.5.	Review of Lubricants and Working Fluids	57
6.5.1	Base Fluids	57
6.5.1.1	Origin	57
6.5.1.2	Fire Resistance	59
6.5.1.3	Biodegradability	59
6.5.2	Additives	60
6.6	Effects of Vegetable-Oil-Based Fluids on Elastomers	61
6.7	Effects of Mineral-Oil-Based Fluids on Elastomers	62
6.7.1	Oil-in-Water Emulsions	64
6.7.2	Water-in-Oil Emulsions	64
6.8	Effects of Synthetic Hydrocarbon Fluids on Elastomers	65
6.8.1	Polyalphaolefins (PAOs)	65
6.8.2	Alkylated Aromatics	67
6.9	Effects of Polyalkylene-Glycol-Based Fluids on Elastomers	68
6.9.1	HFC Fluids	69
6.10	Effects of Synthetic Organic Esters on Elastomers	69
6.11	Effects of Phosphate Esters on Elastomers	70
6.12	Effects of Silicon-Containing Fluids on Elastomers	71
6.12.1	Silicone Oils	71
6.12.2	Silicate Esters	71
6.13	Effects of Fluorine-Containing Fluids on Elastomers	71
6.13.1	Polyperfluoroalkyl Ethers	71
6.13.2	Polychlorotrifluoroethylene	71
6.14	Effects of Polyphenylethers on Elastomers	72
6.15	Effects of HFAS Fluids on Elastomers	72
6.16	Effects of Chlorinated Hydrocarbons on Elastomers	72
6.17	Effects of Brake Fluids on Elastomers	72
6.17.1	Glycol-Based Brake Fluids	73
6.17.2	Silicone-Based Brake Fluids	73
6.17.3	Mineral-Oil-Based Brake Fluids	73
6.18	Effects of Greases on Elastomers	74
6.19	Elastomer Selection for Synthetic Fluids	74
6.20	Review of Hydrocarbon and Alternative Fuels	75
6.20.1	Gasolines	75
6.20.2	Gasoline Additives	76
6.20.3	Pure Methanol	76
6.20.4	Pure Ethanol	77

6.20.5	Diesel Fuels	77
6.20.6	Jet Fuels	78
6.21	Effects of Hydrocarbon and Alternative Fuels on Elastomers	78
6.21.1	Gasolines and Gasohols	78
6.21.2	Sour Gasoline	79
6.21.3	Pure Methanol	79
6.21.4	Pure Ethanol	81
6.21.5	Fuel Permeation	81
6.21.6	Diesel Fuels	81
6.21.7	Jet Fuels	81
6.22	Review of Organic Refrigerants	82
6.22.1	Effects of Halocarbons on the Ozone Layer	84
6.23	Effects of Organic Refrigerants on Elastomers	84
6.24	Effects of Organic Solvents on Elastomers	85
6.25	Effects of Water and Steam on Elastomers	86
6.26	Effects of Acids on Elastomers	87
6.26.1	Inorganic Acids	88
6.26.2	Organic Acids	88
6.27	Effects of Bases on Elastomers	89
6.27.1	Inorganic Bases	89
6.27.2	Organic Bases	89
6.28	Effects of Gases on Elastomers	89
6.29	Effects of Oil-field Environments on Elastomers	90
6.30	Effects of Contiguous Surfaces of Rigid Materials	92
	References	92
Chapter 7	Effects of Elastomers on Selected Contiguous Materials	94
7.1	Effects of Elastomers on Metals	94
7.2	Effects of Elastomers on Plastics	94
7.3	Effects of Elastomers on Paints	95
7.4	Effects of Elastomers on Refrigerants and Insulating Oils	96
7.5	Effects of Elastomers on Food and Drinks	96
7.6	Effects of Elastomers on Explosives	96
7.7	Effects of Elastomers on Vacuum Conditions	96
7.8	Effects of Elastomers on Meters	97
Chapter 8	Types of Crude Rubbers – Chemistry, Compounding, Vulcanizate properties and Applications	98
8.1	Introduction	98
8.2	Natural Rubbers (NR)	98
8.2.1	Chemistry	98
8.2.2	Compounding	98
8.2.3	Vulcanizate properties	99
8.2.4	Applications	99
8.3	Synthetic Polyisoprene Rubbers (IR)	100
8.3.1	Chemistry	100

8.3.2	Compounding	100
8.3.3	Vulcanizate Properties	100
8.3.4	Applications	100
8.4.	Styrene-Butadiene Rubbers (SBR)	101
8.4.1	Chemistry	101
8.4.2	Compounding	101
8.4.3	Vulcanizate Properties	102
8.4.4	Applications	102
8.5	Polybutadiene Rubbers (BR)	102
8.5.1	Chemistry	102
8.5.2	Compounding	102
8.5.3	Vulcanizate Properties	103
8.5.4	Applications	103
8.6	Polynorbornene Rubber	103
8.6.1	Chemistry	103
8.6.2	Compounding	104
8.6.3	Vulcanizate Properties	104
8.6.4	Applications	106
8.7	Butyl Rubbers (IIR)	106
8.7.1	Chemistry	106
8.7.2	Compounding	106
8.7.3	Vulcanizate Properties	107
8.7.4	Applications	108
8.7.5	Cross-linked Butyl Rubbers	108
8.8	Halobutyl Rubbers (BIIR and CIIR)	108
8.8.1	Chemistry	108
8.8.2	Compounding	109
8.8.3	Vulcanizate Properties	109
8.8.4	Applications	109
8.9	Ethylene-Propylene Rubbers (EPM and EPDM)	110
8.9.1	Chemistry	110
8.9.2	Compounding	111
8.9.3	Vulcanizate Properties	111
8.9.4	Applications	112
8.10	Chemically Cross-linked Polyethylene (PE)	112
8.10.1	Chemistry	112
8.10.2	Compounding	113
8.10.3	Vulcanizate Properties	113
8.10.4	Applications	113
8.11	Acrylonitrile-Butadiene Rubbers (NBR)	113
8.11.1	Chemistry	113
8.11.2	Compounding	114
8.11.3	Vulcanizate Properties	115
8.11.4	Applications	115
8.11.5	Carboxilated Nitrile Rubbers (XNBR)	115

8.11.6	NBR/PVC Blends	116
8.12	Hydrogenated Acrylonitrile-Butadiene Rubbers (HNBR)	116
8.12.1	Chemistry	116
8.12.2	Compounding	117
8.12.3	Vulcanizate Properties	117
8.12.4	Applications	118
8.13	Chloroprene Rubbers (CR)	118
8.13.1	Chemistry	118
8.13.2	Compounding	119
8.13.3	Vulcanizate Properties	119
8.13.4	Applications	120
8.14	Chlorinated Polyethylene Rubbers (CM)	120
8.14.1	Chemistry	120
8.14.2	Compounding	121
8.14.3	Vulcanizate Properties	121
8.14.4	Applications	122
8.15	Chlorosulphonated Polyethylene Rubbers (CSM)	122
8.15.1	Chemistry	122
8.15.2	Compounding	122
8.15.3	Vulcanizate Properties	123
8.15.4	Applications	124
8.15.5	Alkylated Chlorosulphonated Polyethylene Rubbers (ACSM)	124
8.16	Polyacrylate Rubbers (ACM)	124
8.16.1	Chemistry	124
8.16.2	Compounding	126
8.16.3	Vulcanizate Properties	126
8.16.4	Applications	127
8.17	Ethylene-Acrylic Rubbers (AEM)	127
8.17.1	Chemistry	127
8.17.2	Compounding	128
8.17.3	Vulcanizate Properties	128
8.17.4	Applications	128
8.18	Ethylene-Vinyl Acetate Rubbers (EAM)	128
8.18.1	Chemistry	128
8.18.2	Compounding	129
8.18.3	Vulcanizate Properties	129
8.18.4	Applications	130
8.19	Fluorocarbon Rubbers (FPM)	130
8.19.1	Chemistry	130
8.19.2	Compounding	131
8.19.3	Vulcanizate Properties	132
8.19.4	Applications	134
8.20	Perfluorocarbon Rubbers (FFKM)	134
8.20.1	Kalrez Perfluoroelastomer Parts	134

8.20.2	Dai-el Perfluor	135
8.20.3	Applications	136
8.21	Tetrafluoroethylene-Propylene Rubbers (TFE/P)	136
8.21.1	Chemistry	136
8.21.2	Compounding	137
8.21.3	Vulcanizate Properties	137
8.21.4	Applications	138
8.22	Silicone Rubbers (Q)	138
8.22.1	Chemistry	138
8.22.2	Compounding	139
8.22.3	Vulcanizate Properties	140
8.22.4	Applications	141
8.22.5	Fluorosilicone Rubbers (FMQ and FVMQ)	141
8.23	Polyurethane Rubbers (AU/EU)	142
8.23.1	Chemistry	142
8.23.2	Compounding	144
8.23.3	Vulcanizate Properties	145
8.23.4	Applications	146
8.24	Epichlorohydrin Rubbers (CO, ECO and GECO)	146
8.24.1	Chemistry	146
8.24.2	Compounding	147
8.24.3	Vulcanizate Properties	148
8.24.4	Applications	149
8.25	Propylene Oxide Rubbers (GPO)	149
8.25.1	Chemistry	149
8.25.2	Compounding	150
8.25.3	Vulcanizate Properties	150
8.25.4	Applications	150
8.26	Polysulphide Rubbers (T)	151
8.26.1	Chemistry	151
8.26.2	Solid Polysulphide Rubbers	152
8.26.3	Liquid Polysulphide Polymers	154
8.26.4	Vulcanizate Properties	155
8.26.5	Applications	156
8.27	Polyphosphazene Rubbers (FZ and PZ)	156
8.27.1	Chemistry	156
8.27.2	Polyfluoroalkoxyphosphazene Rubber (FZ)	157
8.27.3	Polyaryloxyphosphazene Rubber (PZ)	157
8.28	Selection of the Basic Rubber	158
Chapter 9	Thermoplastic Elastomers (TPEs)	171
9.1	Introduction	171
9.2	Advantages and Disadvantages of TPEs	171
9.3	Types of TPEs	172
9.4	Morphology of Block Copolymers	172

9.5	Thermoplastic Polyurethane Elastomers (YAU and YEU)	173
9.5.1	Chemistry	173
9.5.2	Properties of End products	174
9.5.3	Applications	174
9.6	Ether-Ester Block Copolymers (YBPO)	174
9.6.1	Chemistry	174
9.6.2	Compounding	175
9.6.3	Properties of End Products	175
9.6.4	Applications	176
9.7	Ether-Amide Block Copolymers	177
9.7.1	Chemistry	177
9.7.2	Compounding	177
9.7.3	Properties of End Products	177
9.7.4	Applications	178
9.8	Styrene-Diene Block Copolymers (YSBR and YSIR)	178
9.8.1	Chemistry	178
9.8.2	Compounding	179
9.8.3	Properties of End Products	179
9.8.4	Applications	179
9.9	Styrene-Ethylene-Butylene Block Copolymers (SEBS)	180
9.9.1	Chemistry	180
9.9.2	Compounding	180
9.9.3	Properties of End Products	180
9.9.4	Applications	180
9.10	Olefin-Based Elastomeric Alloys	181
9.10.1	Santoprene	181
9.10.2	Geolast	181
9.10.3	Alcryn	182
Chapter 10	Standard Tests and Their Significance	183
10.1	Introduction	183
10.2	Reasons for Testing	183
10.3	Significance of Testing	184
10.4	Testing of Hardness	184
10.4.1	Significance of Hardness Tests	186
10.5	Testing of Tensile Properties	186
10.5.1	Significance of Tension Tests	188
10.6	Testing of Tear Resistance	188
10.6.1	Significance of Tear Resistance Tests	189
10.7	Testing of Friction and Abrasion	189
10.7.1	Significance of Abrasion Tests	190
10.8	Testing of Stress Relaxation	190
10.8.1	Significance of Stress Relaxation Tests	190
10.9	Testing of Compression Set	190
10.9.1	Significance of Compression Set Tests	191

10.10	Testing of Rebound Resilience	191
10.10.1	Significance of Rebound Resilience Tests	192
10.11	Testing of Permeability to Gases and Vapors	192
10.11.1	Significance of Gas Permeability Tests	192
10.11.2	Vapor Transmission of Volatile Liquids	193
10.12	Testing of Explosive Decompression Resistance	193
10.12.1	Significance of Explosive Decompression Tests	193
10.13	Testing of Accelerated Aging or Heat Resistance	193
10.13.1	Significance of Heat Aging Tests	194
10.14	Testing of Low-Temperature Properties	194
10.14.1	Significance of Low-Temperature Tests	195
10.15	Testing of Resistance to Ozone Cracking	196
10.15.1	Significance of Ozone Resistance Tests	196
10.16	Testing of Fatigue Resistance	197
10.16.1	Significance of Fatigue Resistance Tests	197
10.17	Testing of Resistance to Fluids	197
10.17.1	Significance of Fluid Resistance Tests	198
10.18	Testing of Resistance to Microbiological Degradation	198
10.19	Testing of Effects of Elastomers on Contiguous Materials	198
10.20	Miscellaneous ISO Standards	199
10.21	Conclusion	201
	References.	201
Chapter 11	Simple Methods for Identification of Elastomers	202
11.1	Introduction	202
11.2	Laboratory Aids and Apparatuses	202
11.3	Chemicals	204
11.3.1	Acids and Bases	204
11.3.2	Inorganic Salts	204
11.3.3	Organic Solvents	205
11.3.4	Organic Reagents for Identification of Pyrolysis Vapors	205
11.4	Miscellaneous	206
11.5	Scheme for Identification of Elastomers	206
11.6	Determination of Density	206
11.7	Sulphuric Acid Test	207
11.8	Accelerated heat Aging at 200°C	208
11.9	Sample Extraction	208
11.10	Flame Test	209
11.10.1	Beilstein Test	210
11.11	Pyrolysis Tests	211
11.11.1	Color Reaction with Litmus Paper	211
11.11.2	Color Reaction with Reagent I	211
11.11.3	Color Reaction with Reagent II	212
11.11.4	Specific Test for NBR and HNBR Elastomers	212
11.12	Swell Tests	212

Chapter 12	Quality Control of Elastomeric Parts	214
12.1	Introduction	214
12.2	Infrared Spectroscopy	214
12.3	Thermogravimetric Analysis	215
12.4	Differential Thermal Analysis	216
12.5	Differential Scanning Calorimetry	217
12.6	Density Measurement	217
12.7	Ash Content Determination	217
12.8	Swelling Behavior Test	218
12.9	Compression Set Measurement	218
12.10	Test for Apparent Hardness	220
	References.	220
Chapter 13	Health Hazards and Handling of Elastomers	221
13.1	Introduction	221
13.2	Potential Hazards Related to Raw Materials	221
13.2.1	Protective Measures	222
13.3	Potential Hazards Related to Nitrosamines	222
13.3.1	Protective Measures	222
13.4	Hazards Related to High-Temperature Service	222
13.5	Hazards Related to Dust from Grinding or Abrading Rubber Vulcanizates	223
13.6	Hazards Related to Occasional Exothermic Decomposition of FPM Compounds	223
13.7	Hazards Related to Curing and Postcuring of FPM Elastomers	223
13.8	Precautions in the Event of Fire	224
13.9	Disposal of Scrap and Waste products	224
13.10	Transport of Elastomeric Parts	225
	References.	225
Chapter 14	How to Write a Material Specification	226
14.1	Introduction	226
14.2	ASTM D 2000	226
14.2.1	Disadvantages of ASTM D 2000	228
14.3	BS 5176	229
14.4	ISO 4632/1 and ISO TR 8461	231
14.5	DIN 78078	233
14.6	New Draft Classification System for Oil and Gas Industries	233
14.7	House Specifications	234
14.8	How to Ensure Good Performance of Elastomeric Parts	235
14.9	Performance Specifications	235
14.10	Conclusion	237
	References.	237

Chapter 15	General Chemical Resistance of Various Elastomers	238
15.1	Introduction	238
15.2	Effects of Rubber Polymer Grade	238
15.3	Effects of Compounding Ingredients	239
15.3.1	Fillers	239
15.3.2	Plasticizers	239
15.3.3	Curing Agents	239
15.3.4	Age Resistors	239
15.4	Effects of Part Thickness and Duration of Contact	240
15.5	Effects of Temperature	240
15.6	Effects of the Chemical Composition of Medium	240
15.7	Rating System	240

Appendix	Fundamentals of Chemistry	268
A.1	Introduction	268
A.2	Elements	268
A.3	Compounds and Mixtures	268
A.4	Organic and Inorganic Materials	269
A.5	Atoms	270
A.6	Molecules	270
A.7	Atomic and Molecular Weights	270
A.8	Chemical Symbols	271
A.9	Valency	272
A.10	Molecular and Structural Formulas	273
A.11	Substitution Reactions	273
A.12	Saturated and Unsaturated Compounds	274
A.13	Aliphatic and Aromatic Compounds	274
A.13.1	Structural Formula of Benzene	275
A.14	Radicals	275
A.15	Functional Groups	276
A.16	Isomerism	276
A.16.1	Structural Isomerism	278
A.16.2	Geometrical Isomerism	278
A.16.3	Substitution Isomerism	279
A.17	Hydrocarbons	279
A.17.1	Aliphatic Hydrocarbons	279
A.17.2	Aromatic Hydrocarbons	281
A.18	Halogenated Hydrocarbons	282
A.19	Alcohols	282
A.19.1	Aliphatic Alcohols	283
A.19.2	Aromatic Alcohols and Phenols	284
A.20	Ethers	285
A.21	Aldehydes	286
A.21.1	Aliphatic Aldehydes	286

A.21.2	Aromatic Aldehydes	286
A.22	Ketones	286
A.22.1	Aliphatic Ketones	286
A.22.2	Aromatic Ketones	287
A.23	Carboxylic Acid	287
A.23.1	Fatty Acids	287
A.23.2	Aromatic Acids	287
A.24	Esters	288
A.25	Natural Fats, Oils and Soaps	289
A.26	Amines	289
A.27	Nitro-Derivatives of Hydrocarbons	290
A.28	Amides	291
A.29	Nitriles	291
A.30	Isocyanates	292
A.31	Thioalcohols and Thioethers	292
A.32	Sulphonic Acids	292
