

# Table of Contents

Anh N.D., Krause R., SCHIEHLEN W., Statistical Linearization and Large Excitation of Nonlinear Stochastic Mechanical Systems	1
ARIARATNAM S.T., Xie W-C., On the Localization Phenomenon in Randomly Disordered Engineering Structures	13
AUGUSTI G., Borri C., Zahlten W., Nonlinear Dynamic Analysis of Cooling Towers under Stochastic Wind Loading	25
BARATTA A., Zuccaro G., An Application to the Solution of the Fokker-Planck-Kolmogorov Equation for Non Linear Oscillators under Stochastic Loading	35
Bergman L.A., SPENCER B.F., Robust Numerical Solution of the Transient Fokker-Planck Equation for Nonlinear Dynamical Systems	49
BERNARD P., About Stochastic Linearization	61
BILY M., Kliman V., Fatigue Life Estimation under Non-Stationary Stochastic Processes	71
Bjæger P., Langen I., WINTERSTEIN S.R., Marthinsen T., Karunakaran D., Application of Nonlinear Stochastic Mechanics in Offshore Engineering	83
BOLOTIN V.V., Estimation of Structural Reliability of Nonlinear Systems under Seismic Action	103
CHAMIS C.C., Engine Probabilistic Structural Analysis Methods Reliability/Certification	115
CHAVEZ M., Gonzalez D., Seismic Reliability of Simple R/C Frames Designed According with the 1976 and 1987 Mexico City Codes	131

Cherng R-H., WEN Y.K., Stochastic Finite Element Analysis of Uncertain Nonlinear Trusses under Random Loadings	143
DI PAOLA M., Falsone G., Stochastic Response of Non-Linear Systems under Parametric Non-Gaussian Agencies	155
DIMENTBERG M.F., Sokolov A.A, On the Cross-Correlation Method for Identification of Modal Restoring Force Nonlinearity from Random Vibration Data	167
DOLINSKI K., Stochastic Growth of Fatigue Crack under Constant Amplitude Loading	171
Donley M.G., SPANOS P.D., Equivalent Statistical Quadraticization for Multi-Degree-of-Freedom Nonlinear Systems	185
ELISHAKOFF I., Zangh R., Comparison of the New Energy-Based Versions of the Stochastic Linearization Technique	201
FARAVELLI L., Structural Reliability via Response Surface	213
Fryba L., NAKAGIRI S., Yoshikawa N., Stochastic Analysis of a Beam on Random Foundation with Uncertain Damping Subjected to a Moving Load	225
GABETTA E., Pareschi L., Stochastic Aspects in Nonlinear Discrete Kinetic Theory	237
GRASMAN J., Random Motion of Particles in a Flow with Application to Groundwater Pollution	247
GRIGORIU M., A Probability Consistent Closure Method	255
GZYL H., Jimenez R., Probabilistic Methods to Waves in Heterogeneous Media	267
Harlow D.G., DELPH T.J., Solutions of Random Initial Value Problems	273
Heuer R., Irschik H., ZIEGLER F., Large Amplitude Random Vibration of Polygonal Plates	285
IBRAHIM R.A., Lee B., Afaneh A., Structural Model Bifurcation under Random Excitation	297
IYENGAR R.N., Approximate Analysis of Nonlinear Systems under Narrow Band Random Inputs	309
KAZIMIERCZYK P., Maximum-Likelihood Parametric Identification Technique for Objects of Randomly Varying Structure	321
KLIEMANN W., Colonius F., Controlling the Dynamics of a Random Systems	333

Liu S.C., LAGORIO H.J., Chong K.P., Structural Safety Control and Stochastic Aspects	347
LIU W.K., Lua Y.J., Belytschko T., Stochastic Computational Mechanics in Brittle Fracture and Fatigue	355
MA.F, Flow of a Thin Liquid Film over a Rough Rotating Disk	367
MANNING S.D., Yang J.N., Evaluation of a Stochastic Approach for Reliability Centered Maintenance of Metallic Airframes	379
MENYAILOV A.I., Random Flow-Induced Oscillations with Impacts of a Set of Coupled Pendulums	389
NAESS A., Johnsen J.M., Response Statistics of Nonlinear Dynamic Systems by Path Integration	401
NOORI M., Davoodi H., Baber T.T., A Comprehensive Stationary Non-Gaussian Analysis of BWB Hysteresis	415
PRADLWARTER H.J., Schueller G.I., A Practical Approach to Predict the Stochastic Response of Many-DOF-Systems Modeled by Finite Elements	427
ROBERTS J.B., Sadeghi A.H., Distribution of the Response of Hysteretic Oscillators with Wide-Band Random Excitation	439
Rychlik I.R., LINDGREN G., First Passage and Wave Density Analysis by Means of the Computer Package CROSSREG	453
SHINOZUKA M., Billah K.Y., Stochastic Stabilization by Multiplicative Noise	465
SINGH M.P., Maldonado G.O., Random Seismic Response of Equipment on Hysteretic Structures	475
SOBCZYK K., Trebicki J., Analysis of Stochastic Systems Via Maximum Entropy Principle	485
SUZUKI K., Kawanobe K., System Identification of Nonlinear Dynamic Structures Based on Stochastic Time Series Model Fitting	499
TIMASHEV S.A., Nonlinear Stochastic Mechanics in Structural Safety and Reliability Monitoring of Gas Lifelines	511
WEDIG V.W., Simulation and Analysis of Mechanical Systems with Parameter Fluctuation	523
YANG J.N., Li Z., Liu S.C., Optimal Aseismic Hybrid Control of Nonlinear and Hysteretic Structures using Velocity and Acceleration Feedbacks	531
Zhu W.Q., Cai G.Q., LIN Y.K., Stochastic Excited Hamiltonian Systems	543
