

# CONTENTS

## I. INTRODUCTION

The Stability of Colloidal Dispersions <i>J. Th. G. Overbeek</i>	3
SANS Studies of Micellar and Magnetic Fluids <i>J. Hayter</i>	21
Microemulsions: An Overview <i>A. M. Bellocq</i>	41
Colloidal Crystals <i>P. M. Chaikin, J.M. di Meglio W. Dozier, H.M. Lindsay, and D. A. Weitz</i>	65

## II. SINGLE PARTICLE PROPERTIES

Undulation Forces and the Cohesion Energy of Egg-Lecithin Membranes <i>R. M. Servuss and W. Helfrich</i>	85
Hydrophobic Interactions <i>J. N. Israelachvilli</i>	101
Lessons from the Direct Measurement of Forces Between Biomolecules <i>V. A. Parsegian, R. P. Rand, and D. C. Rau</i>	115
Magnetic and Optical Properties of Magnetic Fluids <i>J. Popplewell and J. P. Llewellyn</i>	137
Deuterium NMR Order Parameter Signature <i>E. T. Samulski</i>	157
Lipid Membrane Dynamics: Biological Cells, Vesicles, and Smectic Liquid Crystals <i>M. B. Schneider and W. W. Webb</i>	179

**III. PHASE BEHAVIOR**

- Theory of Thermodynamic Properties and  
Phase Separation of Micellar Solutions  
*G. M. Thurston, D. Blankschtein, M. Fisch  
and G. B. Benedek* 211
- Order Formation in Binary Colloids  
(Colloid Alloys in Binary Latexes)  
*S. Hachisu and S. Yoshimura* 221
- Microemulsion Theory: Competition Between  
Interactions and Self-Organization in Globules  
*L. A. Turkevich* 241

**IV. EQUILIBRIUM PROPERTIES - DISORDERED SYSTEMS**

- Scaling Universality and Crossover in  
Solutions of Linear Polymers  
*D. S. Cannel and P. Wiltzius, and D. W. Schaefer* 267
- Structure and Phase Transitions of a Three-Component  
Microemulsion System: AOT/Water/Alkane  
*S.H. Chen and T. L. Lin, and J. S. Huang* 285
- Sterically Stabilized Silica Colloid as a  
Model Supramolecular Fluid  
*C. G. de Kruif, J. W. Jansen, and A. Vrij* 315

**V. EQUILIBRIUM PROPERTIES - ORDERED SYSTEMS**

- Local Ordering in Uniaxial and  
Biaxial Lyotropic Nematics and Cholesterics  
*A. M. Figueirido Neto, Y. Galerne,  
A. M. Levelut, and L. Liebert* 347
- Birefringent Microemulsions: Flexibility and  
Transition to Isotropic Phases  
*J. M. di Meglio, M. Dvolaitzky, and C. Taupin* 361
- Nematic Phase in the Micellar Liquid Crystal:  
CsPFO and Water  
*C. Rosenblatt* 373
- Electric Field Effects in Polyball Suspensions  
*F. Richetti, J. Prost, and N. A. Clark* 387
- Dislocations in Colloidal Crystals  
*F. Rothen, M. Jorand, A. -J. Koch,  
E. Dubois-Violette, B. Pansu* 413

## VI. FLUCTUATION DOMINATED PHENOMENA

Random Bicontinuous Microemulsions: Experimental Evidence <i>L. Auvray, J.-P. Cotton, R. Ober, and C. Taupin</i>	449
Critical Exponents of Nonionic Micellar Solutions Near the Cloud Point <i>M. Corti, V. Digiorio, and L. Cantu</i>	463
Phase Separation in Gels <i>W. I. Goldberg</i>	475
Diffusion-Limited Aggregation of Silica Microspheres in Two Dimensions <i>A. J. Hurd</i>	493
Fractals and Scaling in Kinetic Colloid Aggregation <i>D. Weitz, M. Y. Lin, and J. S. Huang</i>	509

## VII. DYNAMICS and RHEOLOGY

Order in Colloids Induced by Steady Linear Shear Flow <i>B. J. Ackerson</i>	553
Polymer-Like Behavior of Semi-Dilute Micellar Solutions <i>S. J. Candau, E. Hirsch, and R. Zana</i>	569
Transport in Microemulsions <i>A. M. Cazabat, D. Chatenay, P. Guering and W. Urbach</i>	585
Microscopic Basis for the Viscosity of Suspensions <i>M. Doi</i>	611
Structure and Dynamics of Oriented Ferrofluids <i>S. Hess</i>	631
Static and Dynamic Properties of Suspensions of Charged Spherical Particles <i>R. Klein, W. Hess, and G. Nägle</i>	643
Properties of Concentrated Suspensions of Slightly Soft Colloidal Spheres <i>P. N. Pusey and W. van Megan</i>	673
Lattice Model of the Magnetic Fluid Labyrinth <i>R. E. Rosensweig</i>	699
