

Contents

1	Introduction	1
2	An Overview of General Equilibrium Theory	5
2.1	Agents, Behavior and Markets	5
2.2	Positive Analysis of the Walrasian Equilibrium	8
2.2.1	Walras' Law and the Walrasian Equilibrium: Definitions	8
2.2.2	Existence and Uniqueness of Walrasian Equilibrium	12
2.3	Normative Properties of Walrasian Equilibrium	17
2.4	Equilibrium Properties in Linear Economies	19
2.5	Differential Properties of Equilibrium	26
2.5.1	General Equilibrium Multipliers	27
2.6	Summary	30
2.7	Questions and Exercises	31
3	A Simple General Equilibrium Model	35
3.1	Households	35
3.2	Firms	36
3.3	Equilibrium	40
3.4	A Simple Example	43
3.5	The Numerical Solution	45
3.6	Summary	49
3.7	Questions and Exercises	50
	Appendix 1: The Detailed Equations of the General Equilibrium Example	51
	Appendix 2: GAMS Code for Solving the Simple General Equilibrium Model	52
4	A General Equilibrium Model with a Government Sector	55
4.1	An Indirect Tax on Output with Lump-Sum Transfers	55
4.1.1	The Micro Effects of Output Taxes: An Example	58
4.1.2	The Aggregate Effects of the Output Tax	62
4.2	Factor and Income Taxes	64
4.2.1	The Effects of Factor and Income Taxes: Another Example	65

4.3	Savings, Investment, and the Government Budget Constraint	66
4.3.1	Government Activities with a Balanced Budget	66
4.3.2	Running a Non-balanced Budget	68
4.3.3	Investment and Savings	69
4.3.4	The Equilibrium System	71
4.3.5	Taxes, Expenditure and the Deficit: A Final Example	72
4.4	Summary	73
4.5	Questions and Exercises	75
	Appendix 1: GAMS Code for the CGE Model Generating Tables 4.1, 4.2 and 4.3	75
	Appendix 2: GAMS Code for the CGE Model Generating Table 4.4 . . .	79
5	Additions to the Model: External Sector, Labor Market, Consumption Technology and Welfare Evaluation	85
5.1	The External Sector	85
5.1.1	The Armington Assumption	86
5.1.2	Equilibrium and Model Closure	88
5.1.3	Tariffs	89
5.2	The Labor Market	89
5.3	The Consumption Technology	92
5.4	Welfare Evaluation and Measures	94
5.4.1	Measuring the Effects of a Fiscal Policy	94
5.4.2	Individual Welfare Issues	98
5.4.3	Welfare Aggregation	102
5.4.4	The Excess Burden of Taxation	105
5.5	Summary	107
5.6	Questions and Exercises	108
6	Data Base and Model Calibration	109
6.1	Social Accounting Matrices	110
6.1.1	A Simple Macroeconomic <i>SAM</i>	110
6.1.2	A Detailed Microeconomic <i>SAM</i>	112
6.1.3	Assembling a <i>SAM</i>	115
6.2	Calibration	120
6.2.1	Calibration of Cobb–Douglas Utility Functions	121
6.2.2	Calibration of Cobb–Douglas Production Functions	122
6.2.3	Calibration of CES Production Functions	123
6.2.4	Calibration in the Presence of Taxes	125
6.2.5	Calibration of the Fixed Coefficients Technology	127
6.2.6	Calibration of Tax Rates	128
6.3	Updating a <i>SAM</i>	131
6.3.1	An Updating Procedure Based on Information Theory	131
6.3.2	An Example of <i>SAM</i> Updating	134
6.4	Summary	137
6.5	Questions and Exercises	138

Appendix 1: An Empirical Social Accounting Matrix	140
Appendix 2: GAMS Code for the Updating of a Social Accounting Matrix	142
Appendix 3: Proximity Indicators	144
7 Real-World Examples of Applied General Equilibrium Analysis . . .	145
7.1 Theoretical Origins	146
7.2 From Theory to Applications	147
7.3 Computational Issues	148
7.4 Representative Uses of AGE Analysis and Models	150
7.4.1 Fiscal Policies	150
7.4.2 Trade Policies	151
7.4.3 Stabilization Policies	152
7.4.4 Environmental Analysis	153
7.5 General Equilibrium and Multicriteria Programming	154
7.5.1 An Empirical Example	157
7.6 General Equilibrium and Dynamics	161
7.7 Summary	163
Appendix	164
Bibliography	167
Index	175
