

Table of Contents

Foreword by Alan Rogerson	iii
Plenary Keynote Adress by Douglas Butler: Is Technology Taking Mathematics Education in the Right Direction?	iv
Nadine Adams, Clinton Hayes & Josua Pienaar Diagnostic Testing for Commencing Engineering Students	1
Miriam Amit & Yelena Portnov-Neeman Explicit Teaching of Strategies – The Case of Proof by Contradiction... 7	7
Katarzyna Banach & Janina Morska An Innovative Polish Project to Help Students with Learning Difficulties in Mathematics.....	13
Ayse Aysin Bilgin Lessons Learned: Creating Successful Multinational Research Collaborations for Engaged students	17
Larry G. Blaine Music and Mr. Euler.....	23
George Booker Archimedes and Visual Reasoning - an Ancient Puzzle Revisited.....	28
Marcia M. Burrell Mathematics for Diverse Learners: Gatekeeping Revealed	33
Gail Burrill Concept Images of Core Mathematical Concepts: The Role of Interactive Dynamic Technology	39
Theodore Chadjipadelis & Marina Sotirolou Teaching Mathematics and Electoral Systems in Political Science, AUTH Department	46
Victor V. Cifarelli & David K. Pugalee The Role of Informal Algorithms in a High School Geometry Class.....	52
Jennifer Clinkenbeard Flipping College Algebra and Pre-Calculus: Impact on Student Outcomes	57
Jonathan J. Crabtree Fun in Podo's Paddock: New Ways of Teaching Children the Laws of Sign for Multiplication and Division (and more!)	63
Lynnclaire Dennis Belonging, Calculating a Bright Future for Education.....	69
Karel Doubravský & Ivan Mezník Estimation of Results as a Feedback of Understanding.....	75

J. Brooke Ernest	
Making a Case for Making Art in Mathematics Courses: The Case of Willow	80
Antonella Fatai	
Grounding the Coordinate Concept on the Body System: A Learning Path	86
Fiona Faulkner, Cormac Breen, Mark Prendergast, Michael Carr & Dominic Quinn	
An Investigation into the Problem Solving and Procedural Skills of Students in an Irish Higher Education Institution after the Introduction of a New Mathematics Curriculum at Second Level Education.....	92
Clyde B.A. Felix	
What am I and What am I Worth? How Mathematics Teachers Cope with a Lack of Recognition.....	98
Benjamin Fine, Antonio Mastroberardino & Peter Olszewski	
On the Fundamental Existence and Uniqueness Theorem.....	104
Katalin Fried	
Teaching the Fundamental Theorem of Arithmetic	109
Jorge Garcia	
A Fibonacci Simple Ecosystem Model and its Generalizations: Prey and Predator	114
Avikam Gazit	
Humor in Mathematics – is there such a Phenomenon?	117
Günter Graumann	
About Main Aspects of the History of Arithmetic Education in Germany	121
Ivona Grzegorzczak	
Interactive Learning of Mathematics Using Activities, Games and Technology	127
Majid Haghverdi & Mehryar Nooriafshar	
Developing the Concept of Rate of Change in a Discrete Learning Environment.....	131
Bradford Hansen-Smith	
Wholemovement; Diffusing Geometry.....	136
Marjorie A. Henningsen	
Young Children’s Use of Number and Other Mathematical Ideas for their own Purposes in Inquiry-based Learning Environments	141
Hodaya (Liora) Hoch & Einav Aizikovitsh-Udi	
“Running Together 5” – Professional and Personal Development Teachers of 5 Point Math.....	143

Hodaya (Liora) Hoch & Miriam Amit	
Beliefs and Practices Regarding the Assessment of Students Achievements	148
Philip Hörter	
“How to climb a tree” as a teacher.....	154
Hanan Innabi	
Gender Gap in Mathematics Achievement in Jordan	160
Colin Jackson	
“We can’t be bothered ... that’s just the way it is here”: Low Expectations in a Working Class School	164
Charanjit Kaur & Nurjannah	
Peer Collaboration through Personal Response Systems in Large Quantitative Units	170
Emelie A. Kenney	
The Birth and Development of Polish Mathematical Didactics in the Interbellum and World War II Eras: Challenges and Opportunities for Inclusion in a Modern Multi-Ethnic Classroom	176
Vamsee Krishna Kotha	
Using GeoGebra Software to Do Research in Geometry.....	181
Roza Leikin	
Employing Investigation Tasks in DGE to Advance Teachers’ Creativity and Problem-Solving Expertise	186
Genoveva Leví, José A. Carrillo & Eduardo Ramos.	
Mathematical Competence Evaluation through the Use of Activities Inspired by Materials Included in the Repository of <i>Developing Quality in Mathematics Education</i>	192
Genoveva Leví, Eduardo Ramos & José A. Carrillo.	
An Experience of Detection of Differential Item Functioning for the Accreditation of Mathematical Competence	198
Alenka Lipovec	
Children’s Drawings of Simple Numerical Expressions with Parenthesis	207
Xiongyi Liu & Roland G. Pourdavood	
An Investigation of Pre-Service Teachers’ Previous Mathematics Learning Experience from Elementary School to College and How it Relates to Attitudes and Beliefs about Mathematics Learning and Teaching	213
Michael Lousis	
Teaching Strategies for Subverting Significant and Retentive Learners’ Errors in Algebra.....	219

Cheryl Lubinski, Albert Otto & Lio Moscardini	
Investigating Mathematics in Scotland and the United States	225
Uldarico Malaspina J. & Martín Malaspina Q.	
Development of Mathematical Thinking in Children by Means of Game Invention	229
Malgorzata Mart	
Old and New Methodologies for Factoring Quadratic Equations	235
Susan Milne	
Assessing the Effect of Game-Based Polynomial Activities in the Curriculum of Underprepared University Students	239
Manuela Moscucci	
A Structural-Cores Based Model in Supporting Arithmetical-Algebraic Thinking	242
M.V.V.S.Murthy	
An Analysis of Framing Inverse Problems by Algebra Teachers – An Indian Scenario	247
Ajayagosh Narayanan	
Mathematics Teachers' Narratives on Teaching and Learning: An Extract Based on a Study Investigating Challenges in Lesotho Schools	252
Maria Piccione	
A Structural-Cores Based Model in Supporting Geometrical Thinking	257
Roland G. Pourdavood & Xiongyi Liu	
Pre-service Teachers' Beliefs and Attitudes Toward Mathematics	263
Hilary Povey	
Mathematics Pedagogies for Pre-service Teachers.....	269
Ch. Vijay Prakash	
An Analysis of the Geometry Knowledge Among Students and Teachers at School Level – An Indian Scenario.....	274
Mark Prendergast, Niamh O'Meara, Clare O'Hara, Lorraine Harbison & Ian Cantley	
Teachers' Perspectives on the Transition from Primary to Secondary School Mathematics	280
Slaviša Radović, Aspa Lekka & Jenny Pange	
Technology Education Research Focus Shift Across the Past Twenty Years	286
Shagufta Y. Raja, David K. Pugalee & M. Yasin Akhtar Raja	
Problem Solving in a STEM Context	292
Dena Reddan	
Environment: The Third Teacher in Mathematics.....	298

M. Abhiram Kishore Reddy	
Researching Geometrical Situations Using GeoGebra Software	304
Diane Resek	
Advantages and Challenges of Active Learning.....	309
S.R.Santhanam	
Story Telling in Mathematics Teaching Coupled with Technology	314
Jennifer Silva	
Special Triangles for Special Education Students.....	319
Réka Szász & Péter Juhász	
Developing Teacher Knowledge by Engaging with a Mathematical Task and Reflecting on the Experience.....	325
Tadashi Takahashi	
The Gap of Complete Proof and Incomplete Proof in Mathematics Education Using Technology	328
Odelya Uziel & Miriam Amit	
Are 'Virtualization' and 'Impronovation' Endangered Skills? The Case of 'Mathematical Age' in Problem Solving	331
Quay van der Hoff & Ansie Harding	
First Year Engineering Calculus: Cause-effect Analysis	337
Natalya Vinogradova	
Geometric Shapes Help with Understanding Algebraic Formulas	343
Derek Webb, Becky Groseth & Porter Coggins	
Incorporating Culture Into the Post-Secondary Mathematics Classroom.....	347
Lyn Webb	
Changing Mathematical Mindsets Through Strategies Including Number Talks: A Case Study with In-service Teachers in South Africa	353
Kalvin Whittles	
Exploring Learners' Solutions of an Exponential Equation.....	358
Simon Zell	
Historical Solutions for Differentiation in Math Lessons and Their Relevance in this Day and Age	364
Alan Zollman	
Facilitating Student Mathematical Problem Solving: The Mistaken Idea of Linear Thinking	369
