

Contents

List of abbreviations.....	IX
1 Introduction	1
1.1 Business Enterprises, Workshops and Factories.....	1
1.2 Product, Processes and Plants.....	7
1.3 Structure of Production Facilities	9
1.4 Demands Placed on the Production Facility	13
2 Systematic and Situation-Driven Planning Methods.....	17
2.1 Planning Project.....	17
2.2 Planning Process and Procedural Models	18
2.3 Planning Tools and Methods of Evaluation.....	24
3 The 0 + 5 + X Planning Model.....	29
3.1 Project Definition (Complex I).....	30
3.2 Project Development (complex II)	43
3.2.1 Production and performance program	46
3.2.2 Determination of functions and processes	59
3.2.3 Dimensioning	81
3.2.4 Structuring.....	124
3.2.5 Design	144
3.2.6 Complex planning project (example).....	170
3.3 Project implementation (complex III).....	196
3.3.1 Profitability assessments and project evaluation (x6)	198
3.3.2. Realization (x7).....	199
3.3.3 Operation (x8)	221
3.3.4 Dismantling and recycling (x9).....	221
3.3.5 Documentation (x10).....	221
4 Material flow and logistics.....	223
4.1 Material flow	223
4.2 Logistics product, process and system.....	225

4.2.1 Logistics product	226
4.2.2 Logistics process	228
4.2.3 Logistics system	236
4.2.4 Logistics relationships	237
4.3 Material flow and logistics planning.....	238
4.3.1 Planning steps and planning tasks	238
4.3.2 Transport	246
4.3.3 Picking.....	248
4.3.4 Storage.....	253
5 Situation-driven case studies	257
5.1 Production buildings and structural solutions	257
5.1.1 Building requirements	258
5.1.2 Building characteristics	265
5.1.3 Building selection.....	266
5.1.4 Building selection – Case study	268
5.2 Production-related solutions	272
5.2.1 Parts manufacture.....	273
5.2.2 Assembly	283
5.2.3 Integrated design solutions	296
6 Appendix	299
6.1 Investment Appraisal	299
6.1.1 Static methods	299
6.1.2 Dynamic methods.....	302
6.1.3 Lease-buy methods.....	307
6.2 Main Building/Production Parameters.....	314
6.2.1 Geometric parameters.....	314
6.2.2 Load parameters	317
6.2.3 Supply and disposal parameters, building systems.....	321
6.2.4 Interference parameters	325
6.3 Selected FTT, Supply and Disposal Facilities	343
6.3.1 Jigs & Fixtures, Tools and Testing Equipment flow facilities.....	343
6.3.2 Supply and disposal systems	349
6.4 Information Flow	365
6.4.1 Functions of the information flow	366
6.4.2 Information system planning.....	373
6.4.3 Service-oriented architectures as flexible IT infrastructure.....	392
6.4.4 Operation of the IT infrastructure.....	397
6.4.5 Development perspectives.....	399
Subject index.....	407
