

CONTENTS

Foreword	v
Introduction	vii
List of Contributors	xiii

MUSEUM CLIMATE

Evaluation of Spectral Radiation Hazards in Window-lighted Galleries <i>Laurence S. Harrison</i>	1
The Influence of Light on Museum Objects <i>J. Lodewijks</i>	7
Some studies on the Protection of Works of Art during Travel <i>Nathan Stolow</i>	9
Relative Humidity in a Closed Package <i>Kenzo Toishi</i>	13
Methods of Packing in the Victoria and Albert Museum <i>Hugh Wakefield</i>	16

PHYSICAL AND CHEMICAL METHODS OF ANALYSIS

Les Méthodes d'Analyse Appliquées aux Oeuvres d'Art et aux Antiquités <i>Selim Augusti</i>	19
Proposal for a Handbook on Analysis of Materials of Paintings <i>Rutherford J. Gettens</i>	26
Methods of Analysis (Physical and Microchemical) applied to Paintings and Antiquities <i>E. T. Hall</i>	29
Application of the Electron Microbeam Probe and Micro X-rays in Non-destructive Analysis <i>W. J. Young</i>	33

FUNGICIDES AND INSECTICIDES

The Application of Chemical and Physical Methods to Conservation of Archival Materials <i>Ludovico Santucci</i>	39
Problems in the Use of Insecticides on Occupied Premises <i>Piero Gallo</i>	48
Biological Agents which Damage Paper Materials in Libraries and Archives <i>Fausta Gallo</i>	55
Microbiological Changes on Frescoes <i>Antonio Tonolo and Clelia Giacobini</i>	62
Etude de la Résistance biologique des Procédés de Renforcement des Documents graphiques <i>F. Flieder</i>	65
Lutte contre les Moisissures des Matériaux constitutifs des Documents graphiques <i>F. Flieder</i>	70
The Conservation of Works of Art in Tropical and Sub-tropical Zones <i>W. Boustead</i>	73

APPLICATION OF SCIENCE TO CLEANING METHODS

The Effect of Aging and Re-forming on the Ease of Solubility of Certain Resins <i>Elizabeth H. Jones</i>	79
Application of Science to Cleaning Methods: Solvent Action Studies on Pigmented and Unpigmented Linseed Oil Films <i>Nathan Stolow</i>	84

EXAMINATION AND TREATMENT OF METALLIC OBJECTS

Mineral Alteration Products on Ancient Metal Objects <i>Rutherford J. Gettens</i>	89
Le Problème de la Conservation des Antiquités métalliques en France <i>Albert France-Lanord</i>	93
La Restauration et la Conservation de grands Objets de Bronze <i>Albert France-Lanord</i>	97
Advanced Methods for the Metallurgical Examination of Archaeological Metal Objects <i>C. Panseri and M. Leoni</i>	101
The Examination and Treatment of Bronze Antiquities <i>R. M. Organ</i>	104
Application à l'Etude des Pièces de Collection en Métal de quelques Méthodes non destructives Utilisées en Métallurgie <i>Adrienne R. Weill</i>	111

ITALIAN METHODS OF FRESCO TRANSFER

Methods used in Italy for detaching Murals <i>Leonetto Tintori</i>	118
Some Observations on Mural Paintings <i>Paolo Mora</i>	123

CONSOLIDATION OF FRAGILE OBJECTS

Consolidation of Fragile Objects <i>A. E. Werner</i>	125
The Consolidation of Fragile Metallic Objects <i>R. M. Organ</i>	128
Some New Experiments in the Conservation of Ancient Bronzes <i>Hanna Jedrzejewska</i>	135
New Methods for the Consolidation of Fragile Objects <i>Anna M. Rosenqvist</i>	140

EXAMINATION AND CONSERVATION OF GLASS

The Electron-Beam Probe Microanalysis of Ancient Glass <i>Robert H. Brill and Sheldon Moll</i>	145
Repair and Reproduction of Ancient Glass <i>Rolf Wihr</i>	152

REINFORCING AND TRANSFER OF WOOD PANEL PAINTINGS

Some Applications of Mechanics to the Treatment of Panel Paintings <i>Richard D. Buck</i>	156
Treatment of Warped Wood Panels by Plastic Deformation; Moisture Barriers; and Elastic Support <i>Christian Walters</i>	163
The Transfer of Easel Paintings <i>A. W. Lucas</i>	165
La Conservation des Peintures sur Panneaux <i>G. Urbani</i>	169

NEW PICTURE VARNISHES

New Solvent-type Varnishes <i>R. L. Feller</i>	171
New Picture Varnishes <i>Garry Thomson</i>	176

TREATMENT AND REPAIR OF TEXTILES AND TAPESTRIES

The Preservation of Textile Objects	
<i>Agnes Geijer</i>	185
Restoration and Preservation of Ancient Textiles, and Natural Science	
<i>Jentina E. Leene</i>	190
Basic Habits of Textile Fibres	
<i>Louisa Bellinger</i>	192
Reinforcing Weakened Textiles with Synthetic-Fibre Net	
<i>E. R. Beecher</i>	195

EDUCATION AND TRAINING OF CONSERVATORS AND RESTORERS

La Formation des Conservateurs et des Restaurateurs	
<i>P. Rotondi</i>	197
Training for Engineers in Conservation	
<i>Sheldon Keck</i>	199
The Training of Restorers	
<i>Helmut Ruhemann</i>	202
Programme of the Faculty of Conservation at the Academy of Fine Arts in Warsaw	
<i>Bohdan Marconi</i>	206
An <i>ab initio</i> Course in the Conservation of Antiquities	
<i>Henry Hodges</i>	211
Index	215

INDEX

- A-J-K dough, 134
Abrasion, effects, 35
protection from, 142
Acetates, polyvinyl (see Polyvinyl acetate)
Acetone, leaching by, 85
solubility, 80, 81, 82
swelling power, 86
Acidity, degree of, 68
Acids
paper deterioration, 40
stripping reagents, 109
Acrostalagmus koningi, 67
Acrylate-methacrylate, 172
Acrylates, 144
casting, 212
Acrylic resins, fixatives, 119, 121, 122
Acrylics, 176
Acryloid, 119, 172, 173, 175
cross-linking, 178
insolubility, 174
Actinomyces, 57
Adhesion, 140-144
forces of, 141
Adhesives, 141, 142
aqueous, 144
classification, 143
glass restoration, 155
supporting nets, 195
textiles preservation, 191
thermosetting, 176
wax-resin, 162
Aerogels, silica, 48, 52, 59
Aerosols, poisoning following inhalation, 52
Afnor standards, 65, 66
Age of objects, 113
Aging, 209
accelerated, tests, 173
appearance of age, 202
artificial, 67
bacterial, 7
decomposition products, 85
ease of solubility of certain resins, 79-83
effects, 80
fungi causing, 7
investigations into nature of, 82
materials, 7-8
murals, 123
re-forming, 80
textiles, 185, 190
varnish degradation, 82
Agneau Mystique, 170
Agritol, 48
Air
bubbles and canvasses, 119, 121
impurities, purification, 15
pollution, paper deterioration, 41
transportation by, 15
Air-conditioning (see also Atmosphere, Environment, Humidity, Temperature), 58
chambers, 78
Alcohol, 176
diacetone, 82, 83
diffusion of solvents, 87
paint films, danger to, 84
polyvinyl (see Polyvinyl alcohol)
solubility, 177
Alcohol-ether-resin process, consolidation of
water-logged wood, 125
Aldrin, 49, 50, 52
Alexandrian mosaic plaques, 145, 146, 147
Alizarin, fungal activity, 76
Algae, 62
Alkali carbonates, 90
Alkaline sequestering agents, 109
Alkalis, paper deterioration, 40
Alkyd resins, 75
Alkyl methacrylates, 173
Alum process, consolidation of fragile
objects, 125
Alum solution, adhesives, 144
Aluminium
concentration in glass, 148
inclusions in glass, 150
paint, effectiveness, 163
Alvar, 80, 81, 129
American colonial glasses, 146
Ammonia, quaternary salts of, 67, 68, 71
solvents, permeability, 177, 178
Ammonium lauryl dimethylcarboxymethyl
bromide, 67, 71, 72
Analysing crystals, lithium fluoride, 36
mica, 36
Analysis, 19-38
archaeological research, 33-38
chemical, 21
chromatographic, 21
destructive methods, 20, 21
electrolytic, 21
fluorescence, 112, 113
handbook, 26-28
inter-element effects, 34
methods of, 19-25
microchemical, 21
antiquities, 19-25, 29-32
paintings, 29-32
non-destructive, 20-22, 30, 31, 33-38,
111-117
physical techniques of, 112
antiquities, 29-32
paintings 29-32
pigments, 36
polarographic, 21
quantitative, 35
sample size, 34
specimen holder, 34
spectro-chemical, 36
spectrographic, 21, 113
superficial, 113
type required, 31
X-ray diffraction, 112, 113
X-ray fluorescence, 113, 115
Ancient glass, microanalysis, 145-151
repair, 152-155
reproduction, 152-155
textiles (see Textiles)
Anglesite, 91
Animal fibres, 192
degradation, 185
Annealing, 148, 151
Anobidae, 56, 59
Anobium punctatum, 73
Anobium striatum, 56
Antibiotics
fungicides, as, 48
toxicity, 49
Antichlors, 76, 77, 78
Antifungicides, 71
Antimony, 114
concentration in glass, 147
glass colouring agents, 147
inclusions in glass, 150
Antioxidant inhibitors, 81
Antiparasitic compounds, 48
Antique glass, restoration, 152
Antiquities
analysis methods, 19-25, 29-32
bronze
cross sections, 105, 107
examination and treatment, 104-110
conservation
ab initio course, 211-213
degree status, 213
diploma status, 213
diplomas, 211
draughtmanship, 211, 212
photography, 211, 212
deterioration
causes, 211
prevention, 211
France, 93-96
Antiquities—continued
laboratory work, courses, 211
lecture programme, 211
metallic, 93, 95
methods of analysis, 19
national, 93
Antlerite, 91
Apothecium, 64
Araldite, 126, 130, 133, 134, 167, 168
Archaeology, courses, 212
metal objects, examination, 101-103
Archimedes method, 113
Archival material, conservation methods, 39-47
decay, causes, 40
deterioration factors, isolation, 40
insect attack, 39
Archives, biological agents damaging paper,
55-61
Argentina, 91
Arigal C process, wood consolidation, 126
Arnegonde ring, 112
Arsenic, 114
Art
collectors, 200
history, 197, 198, 200, 203, 206, 210
Artists
materials, tropical conditions, influence, 74
signatures, authenticating, 37
Ascomycetes, 70
Ascomyceti, 57
Aspergillus, 57, 63, 70
Aspergillus niger, 10
Atacamite, 90, 108
Atmosphere, changes, paper deterioration, 41
protection from, 140
Atmospheric moisture, canvasses, 75
Atmospheric pollution, 50, 76
Atomic density, 35
Atomic number, electron-beam probe
analysis, 146
Atomic piles, 23
Atropus pulsatorium, 56
Attribution, 206, 210
Australia
aborigine paintings, 74
conservation of works of art, 73
Autoclave, 71
AW-2 resin, 172, 173, 174, 176
infra-red spectra, 180
picture varnishes, 177
ultra-violet exposure, 182
viscosity, 175
wrinkling, 178
AYAA, 173
AYAB, 172, 173
Azurite, 108
crystalline, 90
Bacillus thuringensis, 48
Bacteria, 62, 64
aging caused by, 7
cellulose deterioration, 165
Bacteriological cabinet, 71
Bakelite mounting, 146
Balsa, 157, 162, 166, 169
Banners, conservation, 185
Barrow method (deacidification), 67
Basidiomycetes, 70
Baste fibre, 75, 192
Bedacryl, 129, 172
Beeswax, 98, 136, 140, 164, 166
Bentonite, 15
Benzotriazole, 109
Benzoyl peroxide, 134
Beta rays, 23
Beilidi, 56
Bibliographical data, 210
Biotrol, 48
Bird, bronze, 137, 138

- Birdlip bronze bowl, 132
 Birka, 185
 Bismuth, 113
 Black beetles, 56
Blatta, 56
 Bleaching methods, tests, 78
 Blind cleavage of paint, 156, 160
 Boats, consolidation, 125, 126
 Boguszyce polyptych, 207
 Bond formation, 173
 Bondafiller, 129, 134
 Bone
 analysis of, 25
 mineralized, 130
 ornamental, 31
 patina, 89, 108, 109
 relief, mineralized, 129
 restoration and conservation, 97-100
 sheet, photography, 104, 105
 small objects, 139
 stripping reagents, 109
 taper section, examination, 105, 106, 108
 weapons, 31
 Bookbindings, durability, 41
 Bookclasp, gilt copper, examination, 107
 Books
 ancient, programme of Academy of Arts, Warsaw, 206
 biological agents causing damage, 57
 dusting, 59
 fumigation, 78
 leather bindings, 40, 41
 lice, 56, 59
 Borers, Australia, 73
