

# **Aulton's**

# **Pharmaceutics**

**The Design and Manufacture of Medicines**

FIFTH EDITION

Edited by

Michael E. Aulton BPharm PhD FAAPS FSP FRPharmS

Emeritus Professor, De Montfort University, Leicester, UK

Kevin M. G. Taylor BPharm PhD FRPharmS

Professor of Clinical Pharmaceutics, UCL School of Pharmacy, London, UK

**ELSEVIER**

Edinburgh London New York Oxford Philadelphia St Louis Sydney Toronto 2018

# Contents

Preface .....	vii
Contributors.....	viii
Acknowledgements .....	xi
<b>What is pharmaceutics? Michael E. Aulton and Kevin M. G. Taylor .....</b>	<b>1</b>
<b>1. Design of dosage forms Peter York .....</b>	<b>6</b>
<b>PART 1</b> Scientific principles of dosage form design	
<b>2. Dissolution and solubility Michael E. Aulton .....</b>	<b>18</b>
<b>3. Properties of solutions Michael E. Aulton .....</b>	<b>37</b>
<b>4. Surfaces and interfaces Graham Buckton .....</b>	<b>47</b>
<b>5. Disperse systems David Attwood .....</b>	<b>60</b>
<b>6. Rheology Christopher Marriott .....</b>	<b>93</b>
<b>7. Kinetics Gareth R. Williams .....</b>	<b>114</b>
<b>PART 2</b> Particle science and powder technology	
<b>8. Solid-state properties Graham Buckton .....</b>	<b>128</b>
<b>9. Particle size analysis Kevin M. G. Taylor .....</b>	<b>140</b>
<b>10. Particle size reduction and size separation Michael E. Aulton .....</b>	<b>158</b>
<b>11. Mixing Andrew M. Twitchell .....</b>	<b>172</b>
<b>12. Powder flow Michael E. Aulton .....</b>	<b>189</b>
<b>PART 3</b> Pharmaceutical microbiology and sterilization	
<b>13. Fundamentals of microbiology Geoffrey W. Hanlon .....</b>	<b>201</b>
<b>14. Pharmaceutical applications of microbiological techniques</b> <i>Norman A. Hodges .....</i>	<b>227</b>
<b>15. Action of physical and chemical agents on microorganisms</b> <i>Geoffrey W. Hanlon and Norman A. Hodges .....</i>	<b>250</b>
<b>16. Principles of sterilization Susannah E. Walsh and Jean-Yves Maillard .....</b>	<b>268</b>
<b>17. Sterilization in practice Jean-Yves Maillard and Susannah E. Walsh .....</b>	<b>278</b>
<b>PART 4</b> Biopharmaceutical principles of drug delivery	
<b>18. Introduction to biopharmaceutics Marianne Ashford .....</b>	<b>296</b>
<b>19. Gastrointestinal tract – physiology and drug absorption</b> <i>Marianne Ashford .....</i>	<b>300</b>
<b>20. Bioavailability – physicochemical and dosage form factors</b> <i>Marianne Ashford .....</i>	<b>319</b>

<b>21. Assessment of biopharmaceutical properties</b>	<i>Marianne Ashford</i>	339
<b>22. Dosage regimens</b>	<i>Soraya Dhillon, Nkiruka Umaru and John H. Collett</i>	363

## PART 5 Dosage form design and manufacture

<b>23. Pharmaceutical preformulation</b>	<i>Simon Gaisford</i>	380
<b>24. Solutions</b>	<i>Sudaxshina Murdan</i>	407
<b>25. Clarification</b>	<i>Andrew M. Twitchell</i>	417
<b>26. Suspensions</b>	<i>Susan A. Barker</i>	427
<b>27. Emulsions and creams</b>	<i>Gillian M. Eccleston</i>	446
<b>28. Powders, granules and granulation</b>	<i>Michael E. Aulton</i>	476
<b>29. Drying</b>	<i>Michael E. Aulton and Satyanarayana Somavarapu</i>	498
<b>30. Tablets and compaction</b>	<i>Göran Alderborn and Göran Frenning</i>	517
<b>31. Modified-release oral drug delivery</b>	<i>Emma L. McConnell and Abdul W. Basit</i>	564
<b>32. Coating of tablets and multiparticulates</b>	<i>Stuart C. Porter</i>	580
<b>33. Hard capsules</b>	<i>Brian E. Jones</i>	597
<b>34. Soft capsules</b>	<i>Keith G. Hutchison and Josephine Ferdinando</i>	612
<b>35. Dissolution testing of solid dosage forms</b>	<i>Ana Cristina Freire and Abdul W. Basit</i>	626
<b>36. Parenteral drug delivery</b>	<i>Robert Lowe</i>	638
<b>37. Pulmonary drug delivery</b>	<i>Kevin M. G. Taylor</i>	653
<b>38. Nasal drug delivery</b>	<i>Gary P. Martin and Alison B. Lansley</i>	671
<b>39. Ocular drug delivery</b>	<i>Hala Fadda, Ashkan Khalili, Peng Tee Khaw, and Steve Brocchini</i>	690
<b>40. Topical and transdermal drug delivery</b>	<i>Adrian C. Williams</i>	715
<b>41. Rectal and vaginal drug delivery</b>	<i>Kalliopi Dodou</i>	739
<b>42. The formulation and manufacture of plant medicines</b>	<i>G. Brian Lockwood</i>	758
<b>43. Delivery of biopharmaceuticals</b>	<i>Ijeoma F. Uchegbu and Andreas G. Schätzlein</i>	769
<b>44. Pharmaceutical nanotechnology and nanomedicines</b>	<i>Yvonne Perrie</i>	784
<b>45. Design and administration of medicines for paediatric and geriatric patients</b>	<i>Catherine Tuleu, Mine Orlu and David Wright</i>	804

## Part 6 Packaging and stability of pharmaceutical products

<b>46. Packaging</b>	<i>Sudaxshina Murdan</i>	820
<b>47. Chemical stability in dosage forms</b>	<i>Andrew R. Barnes</i>	836
<b>48. Microbial contamination, spoilage and preservation of medicines</b>	<i>Norman A. Hodges</i>	850
<b>49. Product stability and stability testing</b>	<i>Paul Marshall</i>	862

 **Self Assessment** Please check your eBook at <https://studentconsult.inkling.com/> for self-assessment questions. See inside cover for registration details.
