

Contents

	Preface	ix
1	Introduction: Why Networks?	1
2	Network Measures and Architectures	5
3	Brain Networks: Structure and Dynamics	31
4	A Network Perspective on Neuroanatomy	51
5	Mapping Cells, Circuits, and Systems	75
6	The Brain's Small World: Motifs, Modules, and Hubs	101
7	Economy, Efficiency, and Evolution	127
8	Dynamic Patterns in Spontaneous Neural Activity	149
9	Networks for Cognition	179
10	Brain Network Disease	207
11	Network Growth and Development	233
12	Dynamics: Stability and Diversity	255
13	Neural Complexity	277
14	Brain and Body	305
	<i>Network Glossary</i>	327
	Notes	331
	References	347
	Index	389
