Contents

<i>List of contributors</i>	vi
<i>Preface</i>	vii
1 H. MEINHARDT Models of pattern formation and their application to plant development	1
2 R. W. KORN Cell shapes and tissue geometries	33
3 P. B. GREEN Analysis of axis extension (with an Appendix by C. R. Goodall and P. B. Green: Factors influencing mean cell length)	53
4 P. M. LINTILHAC Positional controls in meristem development: a caveat and an alternative	83
5 D. MOORE Positional control of development in fungi	107
6 S. D. WAALAND Positional control of development in algae	137
7 M. BOPP Cell pattern and differentiation in bryophytes	157
8 T. SACHS Axiality and polarity in vascular plants	193
9 J. WARREN WILSON and P. M. WARREN WILSON Control of tissue patterns in normal development and in regeneration	225
10 P. W. BARLOW Positional controls in root development	281
11 C. N. McDANIEL Shoot meristem development	319
12 D. J. CARR Positional information and plant morphology	349
13 R. NOZERAN Integration of organismal development	375
14 W. W. SCHWABE Phyllotaxis	403
15 D. J. CARR Positional information in the specification of leaf, flower and branch arrangement	441
16 A. LINDENMAYER Positional and temporal control mechanisms in inflorescence development	461
INDEX	487
