# Plant Tissue Culture Concepts *and* Laboratory Exercises

---

*Edited by*

Robert N. Trigiano  
Dennis J. Gray

CRC Press

Boca Raton New York London Tokyo

---

# *Contents*

## **PART I. HISTORY OF PLANT TISSUE CULTURE**

### **Chapter one — Topic**

History of plant tissue and cell culture .....	3
<i>James D. Caponetti, Dennis J. Gray and Robert N. Trigiano</i>	

## **PART II. SUPPORTING METHODOLOGIES**

### **Chapter two — Topic**

General laboratory requirements, media and sterilization methods .....	11
<i>Ellen G. Sutter</i>	

### **Chapter three — Laboratory**

Nutrition of callus cultures .....	27
<i>James D. Caponetti</i>	

### **Chapter four — Topic**

Histological techniques .....	33
<i>Robert N. Trigiano, Kathleen R. Malueg and Effin T. Graham</i>	

### **Chapter five — Topic**

Photographic methods for plant cell and tissue culture .....	41
<i>Dennis J. Gray</i>	

### **Chapter six — Topic**

Statistical analysis of plant tissue culture data .....	47
<i>Michael E. Compton</i>	

## **PART III. PROPAGATION TECHNIQUES**

### **Chapter seven — Topic**

Propagation from preexisting meristems .....	61
<i>Michael E. Kane</i>	

### **Chapter eight — Laboratory**

Micropropagation of <i>Syngonium</i> by shoot culture .....	73
<i>Michael E. Kane</i>	

<b>Chapter nine — Laboratory</b>	
Micropropagation of potato by node culture and microtuber production .....	81
<i>Michael E. Kane</i>	
<b>Chapter ten — Laboratory</b>	
Micropropagation of lilacs .....	87
<i>Deborah D. McCown and Andrew J. Daun</i>	
<b>Chapter eleven — Topic</b>	
Propagation from nonmeristematic tissues — organogenesis .....	95
<i>Otto J. Schwarz and Robert M. Beatty</i>	
<b>Chapter twelve — Laboratory</b>	
Direct shoot organogenesis from leaf explants of chrysanthemum .....	105
<i>Robert N. Trigiano and Roger A. May</i>	
<b>Chapter thirteen — Laboratory</b>	
Shoot organogenesis from cotyledon explants of watermelon .....	113
<i>Michael E. Compton and Dennis J. Gray</i>	
<b>Chapter fourteen — Laboratory</b>	
Direct and indirect shoot organogenesis from leaves of <i>Torenia fournieri</i> .....	121
<i>Mark P. Bridgen</i>	
<b>Chapter fifteen — Laboratory</b>	
Shoot organogenesis from petunia leaves .....	127
<i>John E. Preece</i>	
<b>Chapter sixteen — Topic</b>	
Nonzygotic embryogenesis .....	133
<i>Dennis J. Gray</i>	
<b>Chapter seventeen — Laboratory</b>	
Embryogenic callus and suspension cultures from leaves of orchardgrass .....	149
<i>Dennis J. Gray, Robert N. Trigiano and Bob V. Conger</i>	
<b>Chapter eighteen — Laboratory</b>	
Somatic embryogenesis from seeds of melon .....	161
<i>Dennis J. Gray</i>	
<b>Chapter nineteen — Laboratory</b>	
Somatic embryogenesis from mature peanut seed .....	167
<i>Hazel Y. Wetzstein and Charleen Baker</i>	
<b>Chapter twenty — Laboratory</b>	
Direct somatic embryogenesis from leaves and flower receptacles of cineraria .....	175
<i>Robert N. Trigiano, Mary Catherine Scott and Kathleen R. Malueg</i>	
<b>Chapter twenty-one — Laboratory</b>	
Somatic embryogenesis from immature seeds of yellow poplar .....	183
<i>Scott A. Merkle</i>	

<b>Chapter twenty-two — Laboratory</b>	
Induction of somatic embryogenesis in conifers .....	191
<i>Stephen M. Attree, Patricia J. Rennie and Larry C. Fowke</i>	
<b>PART IV. CROP IMPROVEMENT TECHNIQUES</b>	
<b>Chapter twenty-three — Topic</b>	
Use of protoplasts for plant improvement .....	201
<i>Michael E. Compton, James A. Saunders and Richard E. Veilleux</i>	
<b>Chapter twenty-four — Laboratory</b>	
Isolation, culture and fusion of tobacco and potato protoplasts .....	215
<i>Richard E. Veilleux and Michael E. Compton</i>	
<b>Chapter twenty-five — Laboratory</b>	
Isolation of protoplasts from leaves of chrysanthemum and orchardgrass .....	227
<i>Robert N. Trigiano</i>	
<b>Chapter twenty-six — Laboratory</b>	
Isolation and culture of protoplasts from embryogenic yellow poplar suspension cultures .....	235
<i>Scott A. Merkle</i>	
<b>Chapter twenty-seven — Topic</b>	
Haploid cultures .....	241
<i>Sandra M. Reed</i>	
<b>Chapter twenty-eight — Laboratory</b>	
Production of haploid tobacco plants using anther culture .....	247
<i>Sandra M. Reed</i>	
<b>Chapter twenty-nine — Topic</b>	
Transformation .....	253
<i>Melina López-Meyer, Ignacio E. Maldonado-Mendoza and Craig L. Nessler</i>	
<b>Chapter thirty — Laboratory</b>	
Transformation of tobacco and carrot using <i>Agrobacterium tumefaciens</i> and expression of the $\beta$ -glucuronidase (GUS) reporter gene .....	261
<i>Ignacio E. Maldonado-Mendoza, Melina López-Meyer and Craig L. Nessler</i>	
<b>Chapter thirty-one — Laboratory</b>	
Transformation of chrysanthemum leaf explants using <i>Agrobacterium tumefaciens</i> .....	275
<i>Robert N. Trigiano</i>	
<b>Chapter thirty-two — Laboratory</b>	
Construction and use of a simple gene gun for particle bombardment .....	283
<i>Dennis J. Gray, Ernest Hiebert, Chia-Min Lin, Michael E. Compton and Victor P. Gaba</i>	
<b>Chapter thirty-three — Topic</b>	
Germplasm preservation .....	291
<i>Leigh E. Towill</i>	

<b>Chapter thirty-four — Laboratory</b>	
Vitrification as a method to cryopreserve shoot tips .....	297
<i>Leigh E. Towill</i>	
<b>Chapter thirty-five — Topic</b>	
Secondary product expression in vitro .....	305
<i>Mary Ann L. Smith</i>	
<b>Chapter thirty-six — Laboratory</b>	
Pigment production in <i>Ajuga</i> cell cultures .....	311
<i>Mary Ann L. Smith</i>	
<b>Chapter thirty-seven — Topic</b>	
In vitro plant pathology .....	319
<i>C. Jacyn Baker, Norton M. Mock and Elizabeth W. Orlandi</i>	
<b>PART V. SPECIAL APPLICATIONS</b>	
<b>Chapter thirty-eight — Topic</b>	
Commercial laboratory production .....	331
<i>Gayle R. L. Suttle</i>	
<b>Chapter thirty-nine — Topic</b>	
Indexing for plant pathogens .....	341
<i>Michael J. Klopmeier</i>	
<b>PART VI. APPENDIX I. LIST OF SUPPLIERS</b>	353
<b>PART VII. INDEX</b>	357
