2 Characterization of Solutions 20**Ideal Solutions 20**

- Ideal Enthalpy of Mixing* 21
- Ideal Volume of Mixing* 21
- Ideal Entropy of Mixing* 21
- Ideal Free Energy of Mixing* 23
- Vapor Pressure* 23

Athermal Nonideal Solutions 24

- Enthalpy of Mixing* 24
- Volume of Mixing* 24
- Entropy of Mixing* 24
- Free Energy of Mixing* 26
- Vapor Pressure* 27

Regular Solutions — Weakly Exothermic 27

- Enthalpy of Mixing* 28
- Volume of Mixing* 28
- Entropy of Mixing* 28
- Free Energy of Mixing* 29
- Vapor Pressure* 29

Regular Solutions — Weakly Endothermic 29

- Enthalpy of Mixing* 30
- Volume of Mixing* 33
- Entropy of Mixing* 33
- Free Energy of Mixing* 34
- Vapor Pressure* 34

Solvated Solutions — Exothermic 34

- Enthalpy of Mixing* 35
- Volume of Mixing* 35
- Entropy of Mixing* 35
- Free Energy of Mixing* 36
- Vapor Pressure of Mixing* 36

Single-Component, Self-Associated Solutions — Endothermic 37

- Enthalpy of Mixing* 37
- Volume of Mixing* 37
- Entropy of Mixing* 38
- Free Energy of Mixing* 38
- Vapor Pressure* 38

Solvated, Self-Associated Solutions 39

- Enthalpy of Mixing* 39
- Volume of Mixing* 40
- Entropy of Mixing* 40
- Free Energy of Mixing* 40

Aqueous Solutions 40

- Energy and Enthalpy of Mixing* 41
- Aqueous Solution Model* 41

<i>Volume of Mixing</i>	43
<i>Entropy of Mixing</i>	44
<i>Free Energy of Mixing</i>	44
<i>Vapor Pressure</i>	45
Summary	45
3 Solubility and Partial Miscibility	49
Partial Miscibility of Liquids	49
<i>Effect of Temperature</i>	51
<i>Effect of Pressure</i>	52
Critical Solution Temperatures	52
<i>Solutions That Have an Upper Critical Solution Temperature</i>	53
<i>Solutions That Have a Lower Critical Solution Temperature</i>	53
<i>Solutions That Have Both Upper and Lower Critical Solution Temperatures</i>	54
<i>Critical Solution Temperature of Ideal Solutions</i>	54
<i>Critical Solution Temperature of Regular Solutions</i>	54
<i>Critical Solution Temperatures of Aqueous Solutions</i>	56
Solubility and Activity Coefficient of Liquid Solutes	56
<i>Ideal Solution Solubility of Liquids</i>	57
<i>Regular Solution Solubility of Liquids</i>	57
<i>Aqueous Solubility of Liquids</i>	58
Solubility of Crystalline Solutes	61
<i>Ideal Solution Solubility of a Crystalline Solute</i>	61
<i>Regular Solution Solubility of a Crystalline Solute</i>	66
<i>Aqueous Solution Solubility of a Crystalline Solute</i>	67
Dependence of Solubility on Gas Properties	69
Alteration of Aqueous Solubility	71
Temperature and Solution Composition	71
<i>Temperature</i>	71
<i>Solution Composition</i>	73
Summary	76
4 Physical Modification of the Solute	81
Apparent Solubility and Dissolution Rate	81
<i>Ideal Solubility</i>	81
<i>Apparent Solubility</i>	82
<i>Dissolution Rate</i>	83
Particle Size and Crystal Quality	86
<i>Apparent Solubility and Particle Size</i>	86
<i>Particle Size Reduction and Crystal Quality</i>	87
<i>Dissolution, Particle Size, and Crystal Quality of Powders</i>	88

<i>Ripening and Caking</i>	89
Amorphous Solid Modification	91
<i>Apparent Solubility of Amorphs</i>	92
<i>Dissolution of Amorphs</i>	94
Crystal Form Modification	95
<i>Apparent Solubility of Polymorphs</i>	95
<i>Dissolution Rate of Polymorphs</i>	101
Crystal Hydrate Formation	101
<i>Apparent Solubility of Hydrates</i>	102
<i>Dissolution of Hydrates</i>	103
<i>Crystal Desolvates</i>	104
Complex Systems	105
Factors Affecting Reversion	107
<i>Temperature</i>	107
<i>Solution Composition</i>	108
<i>Vapor Pressure</i>	109
<i>Humidity</i>	110
Summary	110
5 Solubilization by pH Control	116
Buffers	116
<i>pH of Simple Buffer Systems</i>	117
<i>Buffering Capacity</i>	118
<i>Common Buffers</i>	119
Dependence of Solubility on pH	119
<i>Solubilization of Weak Monovalent Acids and Bases</i>	120
<i>Solubility Product as a Limitation to Solubilization</i>	121
<i>Solubilization of Divalent and Trivalent Acids and Bases</i>	124
<i>Solubilization of Zwitterionic Weak Electrolytes</i>	125
<i>Solubilization of Self-Associating Compounds</i>	127
Dependence of pK_a on Solute Structure	127
<i>Estimation of pK_a Values for Weak Acids</i>	129
<i>Estimation of pK_a Values for Weak Bases</i>	131
<i>Dependence of Charge on pH and pK_a</i>	133
<i>Statistical Effects on Dissociation</i>	133
<i>Substituent Effects on pK_a Values for Aliphatic Solutes</i>	133
<i>Substituent Effects on pK_a Values for Aromatic Solutes</i>	139
<i>Hammett and Taft Relationships</i>	142
<i>Application to Complex Molecules</i>	144
<i>Effects of Self-Association on Dissociation Constants</i>	152
Temperature and Solution Composition	154
<i>Temperature</i>	154
<i>Solution Composition</i>	154
<i>Carbon Dioxide</i>	159

<i>Sodium Ions</i>	159
Pharmaceutical Aspects of pH Solubilization	159
<i>Precipitation of pH Solubilized Solutes</i>	160
<i>Dissolution Rate and pH</i>	169
<i>Physiological Effects of pH and Buffers</i>	170
<i>Chemical Stability of pH Solubilized Solutes</i>	170
<i>Buffer Selection</i>	175
Summary	176
6 Solubilization by Cosolvents	180
Properties of Pure Cosolvents	180
<i>Structure of Cosolvents</i>	180
<i>Characterization of Cosolvent Polarity</i>	181
<i>Solubility in Pure Solvents</i>	182
Solubilization by Cosolvents	184
<i>Properties of Cosolvent–Water Mixtures</i>	185
<i>Characterization of Solutes</i>	185
<i>The Log Linear Model</i>	188
<i>Other Models for Solubilization by Cosolvents</i>	191
Dependence of Solubilization on Cosolvent	193
<i>Solubilization by Single Cosolvents</i>	193
<i>Deviation from the Log Linear Equation</i>	200
<i>Solubilization by Multiple Water Miscible Cosolvents</i>	204
Dependence of Solubilization on Solute Structure	207
<i>Solubilization of Organic Compounds by Ethanol</i>	207
<i>Solubilization by Specific Cosolvents</i>	217
<i>Other Agents that Nonspecifically Affect Solubility</i>	220
Temperature and Solution Composition	221
<i>Temperature</i>	221
<i>Solution Composition</i>	222
Pharmaceutical Aspects of Solubilization by Cosolvents	224
<i>Dilution of Cosolvent-Solubilized Solutes</i>	224
<i>Physiological Effects of Cosolvents</i>	226
<i>Stability of Cosolvent-Solubilized Solutes</i>	228
<i>Cosolvent Selection</i>	230
Summary	230
7 Solubilization by Surfactants	236
Chemical Structure of Surfactants	236
<i>Classical (Long-Chain) Surfactants</i>	238
<i>Nonclassical Surfactants</i>	241
Properties of Micelles	242

Problems Associated with Solubilization and Solubilized Solutes	431
