Ulrich Lüttge (Ed.)

# Vascular Plants as Epiphytes

Evolution and Ecophysiology

With 69 Figures

Springer-Verlag Berlin Heidelberg New York  
London Paris Tokyo Hong Kong

# Contents

<b>1 Vascular Epiphytes: Setting the Scene</b>	
U. LÜTTGE (With 9 Figures)	1
1.1 The Conquest of Space	1
1.2 Life-Forms	2
1.3 Importance: Biomass Production, Taxonomic Diversity, Economic Use	6
1.4 Stress	7
1.4.1 Environmental Gradients Along Stratum Heights in Rainforests	7
1.4.2 Stress Driving Evolution	9
1.4.3 Stress and Ecophysiology	9
1.4.4 Stress Determining Floristic Diversity	11
1.5 Interactions with Other Non-Host Organisms	11
1.6 Curiosity	12
References	12
<b>2 The Evolution of Epiphytism</b>	
D. H. BENZING (With 10 Figures)	15
2.1 Ancestral Habitats: Dark and Moist or Exposed and Dry?	15
2.2 The Geologic Record of Epiphytism	15
2.3 The Systematic Occurrence of Epiphytes	16
2.4 Epiphytism as a Coherent Ecological Category	16
2.5 Classification of Epiphytes	20
2.6 Continuously-Supplied Versus Pulse-Supplied Epiphytes	27
2.7 Patterns of Origin	27
2.8 Predisposition and Phylogenetic Constraints	31
2.9 Historical Basis for Canopy Dependence	32
2.9.1 Ferns	33
2.9.2 Liliopsida as a Whole	33
2.9.3 Nonorchid Monocotyledons	35
2.9.4 Orchids	36
2.9.5 Dicotyledons	37
2.9.6 Ancestral Habitats	39
References	40

<b>3 Carbon Dioxide Concentrating Mechanisms and the Evolution of CAM in Vascular Epiphytes</b>	
H. GRIFFITHS (With 2 Figures)	42
3.1 Introduction	42
3.2 Evolution and Characteristics of Biochemical and Biophysical CO <sub>2</sub> Concentrating Mechanisms	43
3.2.1 Carboxylase and Oxygenase Functions of RUBISCO	44
3.2.2 C <sub>4</sub> Photosynthesis as a CO <sub>2</sub> Concentrating Mechanism	47
3.2.3 CAM as a CO <sub>2</sub> Concentrating Mechanism	48
3.2.4 CO <sub>2</sub> Concentrating Mechanisms in Aquatic Plants	50
3.3 Ecophysiological Interactions in the Development of CO <sub>2</sub> Concentrating Mechanisms	52
3.3.1 Efficiency of Water Use	53
3.3.2 Carbon Economy	54
3.3.3 Nitrogen Economy	55
3.3.4 Responses to Photosynthetically Active Radiation	56
3.4 Phylogenetic Distribution of CAM in Vascular Epiphytes	58
3.4.1 Evolution of Epiphytism and CAM in the Polypodiaceae	60
3.4.2 Evolution of Epiphytism and CAM in the Monocotyledons	64
3.4.3 Evolution of Epiphytism and CAM in the Dicotyledons	65
3.5 Regulation and Expression of CAM in Vascular Epiphytes	68
3.5.1 Constitutive CAM	73
3.5.2 C <sub>3</sub> -CAM Intermediates	74
3.6 Cost-Benefit Relationships of CO <sub>2</sub> Concentrating Mechanisms	76
3.6.1 Energetics of CO <sub>2</sub> Concentrating Mechanisms	76
3.6.2 C <sub>3</sub> and CAM Epiphyte Habitat Preference	78
3.7 Evolution of CAM and the Epiphytic Habit: Conclusions	79
References	81
<b>4 Gas Exchange and Water Relations in Epiphytic Tropical Ferns</b>	
M. KLUGE, P. N. AVADHANI and C. J. GOH (With 10 Figures)	87
4.1 Introduction	87
4.2 The Ecophysiological Problem	87
4.3 Nest Ferns	88
4.3.1 Morphology	88
4.3.2 Gas Exchange of Nest Ferns in Situ	90
4.4 Xeromorphic Ferns	93
4.4.1 Anatomical and Physiological Adaptations	93
4.4.2 Performance of CAM Ferns Under Laboratory Conditions	95
4.4.2.1 Water Deficiency	96

4.4.2.2 Temperature Requirements . . . . .	97
4.4.2.3 Light Requirements . . . . .	97
4.4.3 Performance of CAM Ferns in Situ . . . . .	98
4.5 Water Use Efficiency of Epiphytic Ferns . . . . .	104
4.6 Conclusions . . . . .	105
References . . . . .	107

## 5 Epiphytic Bromeliads

J.A.C. SMITH (With 7 Figures) . . . . .	109
5.1 Ecological Range and Diversity of the Bromeliaceae . . . . .	109
5.2 Bromeliad Systematics and Life-Forms . . . . .	110
5.2.1 Systematics . . . . .	110
5.2.2 Life-Forms . . . . .	112
5.3 Carbon Assimilation . . . . .	115
5.3.1 Occurrence of Crassulacean Acid Metabolism (CAM) and C <sub>3</sub> Photosynthesis . . . . .	115
5.3.2 Gas Exchange and Photosynthesis in CAM and C <sub>3</sub> Bromeliads . . . . .	117
5.3.3 Photosynthetic Responses to Light Intensity . . . . .	120
5.3.4 Photosynthetic Ecology . . . . .	123
5.4 Water Relations . . . . .	126
5.5 Phylogenetic Ecology . . . . .	129
References . . . . .	134

## 6 Gas Exchange and Water Relations in Epiphytic Orchids

C.J. GOH and M. KLUGE (With 9 Figures) . . . . .	139
6.1 Introduction . . . . .	139
6.2 Terrestrial and Epiphytic Orchids . . . . .	139
6.3 Growth Habit . . . . .	140
6.4 The Epiphytic Habitat of Orchids . . . . .	147
6.5 Gas Exchange Patterns as Related to Succulence in Epiphytic Orchids . . . . .	148
6.6 In Situ Studies of CAM in Epiphytic Orchids . . . . .	151
6.7 Light Requirements . . . . .	154
6.8 Water Relations in Epiphytic Orchids . . . . .	157
6.9 The Physiology of Aerial Roots . . . . .	159
6.9.1 Water Relations . . . . .	159
6.9.2 Gas Exchange . . . . .	160
6.9.3 Mode of Photosynthesis . . . . .	161
6.10 The Evolution of Epiphytism in Orchids . . . . .	162
References . . . . .	163

## 7 The Mineral Nutrition of Epiphytes

D.H. BENZING (With 18 Figures) . . . . .	167
7.1 Introduction . . . . .	167

7.2	Nutrient Sources in Forest Canopies . . . . .	167
7.2.1	Atmospheric Input . . . . .	167
7.2.2	Bark and Other Solid Media . . . . .	170
7.3	Nutritional Modes . . . . .	173
7.3.1	Mutualism . . . . .	173
7.3.2	Hemiepiphytism . . . . .	178
7.3.3	Humus-Based Nutrition . . . . .	178
7.3.4	Unequivocal Carnivores . . . . .	182
7.3.5	Carnivorous Bromeliads . . . . .	184
7.3.6	Animal Assistance to Noncarnivores . . . . .	185
7.3.7	Atmospheric Nutrition . . . . .	188
7.4	Does Scarcity of Nutrient Ions Limit Epiphyte Vigor? . . . . .	189
7.5	Effects on Forest Economy . . . . .	190
7.5.1	Nutritional Piracy . . . . .	190
7.5.2	Relationship to Other Environmental Factors . . . . .	193
7.6	Conclusions and Outlook . . . . .	195
	References . . . . .	197
<b>8</b>	<b>Epiphytic Associations with Ants</b>	
	D. W. DAVIDSON and W. W. EPSTEIN (With 4 Figures) . . . . .	200
8.1	Ubiquity and Sociality of Ants: Diversity of Ant-Epiphyte Relations . . . . .	200
8.2	Opportunistic Associations of Epiphytes and Ants . . . . .	201
8.2.1	Carton as Epiphyte Substrate . . . . .	201
8.2.2	Fitness Outcomes and Limits to Specialization and Abundance . . . . .	204
8.3	Myrmecophytic Epiphytes . . . . .	205
8.3.1	Benefits to Ants . . . . .	205
8.3.2	Benefits to Plants . . . . .	212
8.3.3	Complex Interaction Networks . . . . .	216
8.3.4	Epiphytes, Ants and Host Trees . . . . .	218
8.3.5	Habitat Quality and Ant-Epiphyte Associations . . . . .	219
8.4	Origins of Myrmecophytic Epiphytes . . . . .	223
8.5	Summary and Conclusions . . . . .	228
	References . . . . .	229
<b>9</b>	<b>The Systematic Distribution of Vascular Epiphytes</b>	
	W. J. KRESS . . . . .	234
9.1	Introduction . . . . .	234
9.2	Sources of Compilation and Methods of Classification of Epiphytes . . . . .	235
9.3	Numbers of Epiphytes and Taxonomic Distribution . . . . .	256
9.4	Our Knowledge of Epiphytes and Perspectives . . . . .	259
	References . . . . .	261
	<b>Subject Index . . . . .</b>	<b>263</b>
