<i>Preface</i>	ix
<b>1 Polyphenols – vegetable tannins</b>	<b>1</b>
Prologue	1
Astringency	6
Nomenclature and occurrence	9
<i>References</i>	13
<b>2 Proanthocyanidins</b>	<b>14</b>
Introduction – leucoanthocyanins	14
Flavan-3,4-diols (leucoanthocyanidins)	20
(i) Occurrence and distribution	20
(ii) Stereochemistry	23
(iii) Solvolysis	28
Condensed proanthocyanidins	31
(i) Flavan-3-ols	31
(ii) Condensed procyanidins and prodelfphinidins	43
(a) soluble oligomeric forms	43
(b) polymeric forms	66
(c) miscellaneous proanthocyanidins	76
Epilogue	80
<i>References</i>	81
<b>3 Gallic acid metabolism</b>	<b>90</b>
Introduction	90
Biosynthesis	97
Structure determination	107
Occurrence, structural and biogenetic relationships	117
(i) Depside metabolites – Group 2A – gallotannins	123
(ii) Metabolites formed by oxidative coupling of galloyl esters	127
– Groups 2B and 2C – ellagitannins	
(a) Group 2B metabolites	128
(b) Group 2C metabolites	139
<i>References</i>	146

<b>4 Polyphenol complexation</b>	154
Introduction	154
(i) Leather	154
(ii) Herbal medicines	155
(iii) Foodstuffs and beverages	161
(iv) Antimicrobial and antiviral effects	164
(v) Chemical defence in plants.	165
Polyphenol complexation	167
(i) Reversible complexation with proteins	167
(a) equilibrium dialysis and microcalorimetry	168
(b) protein precipitation	170
(c) enzyme inhibition	172
(d) structure-activity relationships	176
(e) modes and sites of binding.	177
(ii) Irreversible complexation with proteins	187
(iii) Reversible polysaccharide complexation	192
Astringency	195
(i) Ageing of red wines	196
(ii) Non-biological hazes in lagers and beers	205
(iii) The ripening of fruit	207
(iv) Polyphenols and chemical defence in plants	208
(v) The mechanism of vegetable tannage	211
(vi) The future.	214
References	215
<i>Botanical index</i>	220
<i>General index</i>	223
