Perspectives in Antiinfective Therapy

Bayer Centenary Symposium

Washington, D.C., Aug. 31.–Sept. 3, 1988

Editors: G.G. Jackson
H.D. Schlumberger
H.-J. Zeiler

Springer-Verlag
Berlin Heidelberg New York
London Paris Tokyo

Contents

Foreword	
G. G. JACKSON, H. D. SCHLUMBERGER, and H.-J. ZEILER	V
The Challenge of Perspective	
G. G. JACKSON	1
History and Philosophy of Bayer Pharmaceutical Research	
W.-D. BUSSE	5
On Bacteriological Research	
R. KOCH	13
Background to Robert Koch's Lecture at the International Congress in Berlin, 1890	
J. PARASCANDOLA	19
 Classical Mechanisms of Antibacterial Drugs	
Multiple Penicillin Binding Protein Profiles in Penicillin Resistant Pneumococi: Evidence for the Clonal Nature of Resistance Among Clinical Isolates	
A. TOMASZ, D. JABES, Z. MARKIEWICZ, J. GARCIA-BUSTOS, and S. NACHMAN . . .	25
Antibiotic Uptake into Gram-Negative Bacteria	
R. E. W. HANCOCK and A. BELL	42
Inhibition of Protein Biosynthesis by Antibiotics	
K. H. NIERHAUS, R. BRIMACOMBE, and H. G. WITTMANN	54
Inhibition of DNA Gyrase: Bacterial Sensitivity and Clinical Resistance to 4-Quinolones	
M. E. CULLEN, A. W. WYKE, F. MCEACHERN, C. A. AUSTIN, and L. M. FISHER	73

Mechanisms of Nonbacterial Antiinfective Drugs

Mechanisms of Antiretroviral Compounds in Inhibition of Viral and Cellular DNA Polymerases	
K. ONO	87
Effects of Drugs on Lipids and Membrane Integrity of Fungi	
N. H. GEORGOPAPADAKOU	100
Membrane Changes Induced by Praziquantel	
P. ANDREWS and A. HARDER	112
Mechanisms of Action of Antimalarial Drugs	
W. PETERS	124

Pathogenic Microbial Mechanisms Susceptible to Drug Application

Bacterial Adherence in Pathogenicity	
S. NORMARK, S. HULTGREN, B.-I. MARKLUND, G. NYBERG, A. OLSÉN, N. STRÖMBERG, and J. TENNENT	147
<i>Haemophilus influenzae</i> Gene Expression and Bacterial Invasion	
E. R. MOXON, J. S. KROLL, and J. N. WEISER	156
Coordinate Regulation of Bacterial Virulence Genes	
W. GOEBEL and J. HACKER	163

Microbial Drug Resistance

Transposon Transfer of Drug Resistance	
F. H. KAYSER and B. BERGER-BÄCHI	172
Bacterial Proteins Involved in Antimicrobial Drug Resistance	
C. C. SANDERS	186
Persistent Herpes Simplex Virus Infection and Mechanisms of Virus Drug Resistance	
H. J. FIELD	196

Pharmacology and Drug Delivery

Antiviral Therapy with Small Particle Aerosols V. KNIGHT and B. GILBERT	215
Liposomes and Lipid Structures as Carriers of Amphotericin B A. S. JANOFF	234
Targeted Liposomes Bearing Sendai for Influenza Envelope Glycoproteins as a Potential Carrier for Protein Molecules and Genes A. LOYTER	245

Host Determinants in Antiinfective Chemotherapy

Cell-Mediated Immunity, Immunodeficiency and Microbial Infections S. H. E. KAUFMANN and I. E. A. FLESCH	263
Neutropenia: Antibiotic Combinations for Empiric Therapy L. S. YOUNG	278
Infection Prevention by Modulation of Host Flora H. F. L. GUIOT and R. VAN FURTH	285
Enhancement of Resistance in the Immunocompromised Host by Control of Fungal Growth D. PAPPAGIANIS	295

Nonvaccine Immunoalteration of the Host

Passive Immunotherapy of Infectious Diseases: Lessons from the Past, Directions for the Future J. E. PENNINGTON	311
T-Cell Mediated Immunopathology in Viral Infections R. M. ZINKERNAGEL	320

New Diseases and Disease Epidemiology

Adherence and Proliferation of Bacteria on Artificial Surfaces G. PETERS	329
---	-----

Current Knowledge of *Chlamydia* TWAR, and Important Cause of Pneumonia and Other Acute Respiratory Diseases
J. T. GRAYSTON, S. P. WANG, and C. C. KUO 339

Current Status of Antiviral Chemotherapy for Genital Herpes Simplex Infection: Its Impact on Disease Control
L. COREY 360

Induction and Maintenance Therapy for Opportunistic Infections in Patients with AIDS
M. A. SANDE 369

New Technology and Drug Design

Nucleic Acid Hybridization: A Rapid Method for the Diagnosis of Infectious Diseases
N. DATTA GUPTA, E. HUGUENEL, P. RAE, and D. CROTHERS 375

New Technology and Immunospecific Reactions in Helminthic Diseases
B. GOTTSTEIN 386

Molecular Targets of Chemotherapeutic Agents Against the Human Immunodeficiency Virus
E. DE CLERCQ 396

Modern Strategies in the Design of Antimicrobial Agents
J. K. SEYDEL 419

Future Development and Use of Antiinfective Chemotherapy

The Future Challenge of Infectious Disease
F. E. YOUNG 439

Barriers to Effective Antiinfective Therapy. The Perspective of a Clinical Pharmacologist
L. LASAGNA 444

Optimal Use of Antimicrobial Agents
H. C. NEU 451

Views of Future Antiinfective Therapy
W. GOEBEL, E. R. MOXON, and L. S. YOUNG 461

Subject Index 469
