Table of contents

Preface vii

Selected Abbreviations xi

Part I — Drug design

1 Computer-assisted drug design 1
Philip Loftus

2 Quantitative structure–activity relationships 22
W. J. Dunn III

3 Physical methods in drug discovery 44
Steven D. Young

Part II — Drug delivery

4 Chemical approaches for site-specific drug delivery 65
James J. Kaminski and Nicholas Bodor

5 Obstacles to drug development from peptide leads 92
Jacob J. Plattner and Daniel W. Norbeck

Part III — Biochemistry/molecular biology

6 Biochemical approaches to drug discovery and characterization 129
Michael Williams and Michael F. Jarvis

7 Ion channels 167
David J. Triggle

8	Intracellular second messenger generation: the role of inositol lipids	204
	Stephen K. Fisher	
9	Molecular biology of receptors and drug design	231
	J. C. Venter and Claire M. Fraser	
<i>Part IV — Pharmacology</i>		
10	Animal behavioral models for drug development in psychopharmacology ...	259
	Lawrence A. Dunn, Clinton D. Kilts, and Charles B. Nemeroff	
	Index	281
