Heft 34

Proceedings of the Fourth International Workshop
on the Measurement of Microbial Activities
in the Carbon Cycle in Aquatic Ecosystems

edited by VERA STRAŠKRABOVÁ

With 102 figures and 47 tables in the text

E. Schweizerbart'sche Verlagsbuchhandlung
(Nägele u. Obermiller) Stuttgart 1990

Contents

List of participants	VII
Preface	VIII
 Sediment-water interactions (Chairman: T. E. CAPPENBERG)	
MEYER-REIL, L.-A.: Microorganisms in marine sediments: considerations concerning activity measurement. (With 3 figures in the text)	1-6
REICHARDT, W.: Measurement of CO ₂ -fixation in sediments. Some theoretical and technical aspects. (With 9 figures and 3 tables in the text)	7-16
CAPPENBERG, Th. E.: Microbial activities in sediment-water interactions, their role in understanding shallow aquatic ecosystems (Abstract)	17
SWEERTS, J.-P. R. A. & CAPPENBERG, Th. E.: Aerobic and anaerobic mineralization in the littoral and profundal sediments of a stratified lake (Abstract)	19
MARXSEN, J. & WITZEL, K.-P.: Measurement of exoenzymatic activity in streambed sediments using methylumbelliferyl-substrates. (With 4 figures and 1 table in the text)	21-28
BOYANOVSKY, B.B.: A method of measuring the dehydrogenase activity of sediments. (With 1 figure in the text)	29-31
 Bacterial-algal interactions, algal exudation (Chairmen: P. K. BJØRNSSEN and B. RIEMAN)	
BJØRNSSEN, P. K.: Phytoplankton exudation: income tax or property tax? (Abstract)	33
RIEMANN, B.: Release of extracellular organic carbon from phytoplankton: an experimental approach (Abstract)	35
VYHNÁLEK, V. & ŠIMEK, K.: Growth of bacteria on organic matter produced by algae in continuous cultures. (With 2 figures in the text)	37-42
FUKAMI, K., OHARA, S. & ISHIDA, Y.: Effect of extracellular organic carbon (EOC) from phytoplankton on the community structure of oligotrophic bacteria. (With 2 figures and 1 table in the text)	43-47
KATO, K.: Carbon flux from phytoplankton to free-living bacterial DNA. (With 2 tables in the text)	49-52
LIGNELL, R.: Algal exudation and its relation to bacterial production during vernal phytoplankton blooms. (With 1 figure and 1 table in the text)	53-59
NIXDORF, B.: The fate of phytoplankton primary production: losses in relation to bacterial metabolism in a eutrophic shallow lake. (With 2 figures in the text)	61-65
SIUDA, W. & WCISŁO, R.: Production and utilization of organic matter by microplankton in an eutrophic lake. (With 3 figures and 2 tables in the text)	67-73
ANTONIETTI, R.: Autotrophic and heterotrophic ATP pools in microbial communities: suggestions for separation and for bacterial growth rate evaluation. (With 6 figures in the text)	75-80
 Bacterial enzyme activity and substrate uptake, organic matter decomposition (Chairman: J. OVERBECK)	
OVERBECK, J. & SAKO, Y.: Ecological aspects of enzyme regulation in aquatic bacteria. (With 5 figures and 3 tables in the text)	81-92
CHRÓST, R. J. & OVERBECK, J.: Substrate-exoenzyme interaction: significance of β-glucosidase activity for glucose metabolism by aquatic bacteria. (With 2 figures in the text)	93-98

JØRGENSEN, N. O. G.: Assimilation of free monosaccharides and amino acids relative to bacterial production in eutrophic lake water. (With 7 figures in the text)	99–110
CHRÓST, R. J.: Application of the isotope dilution principle to the determination of substrate incorporation by aquatic bacteria. (With 3 figures and 2 tables in the text)	111–117
LIND, O. T. & DAVALOS, L. O.: Clay, dissolved organic matter, and bacterial interactions in two reservoirs. (With 1 figure and 1 table in the text)	119–125
GUNATILAKA, A., MENDEZ, M. C. & HERNDL, G.: Microbial interactions during decomposition of <i>Phragmites</i> litter (Abstract)	127
PEDUZZI, P.: Colonization and carbohydrate utilization of gastropod mucus (<i>Monodonta turbinata</i>) by microheterotrophs (Abstract)	129
CASPER, P.: Input and mineralization of organic carbon in lakes. (With 2 figures and 2 tables in the text)	131–135
VIAROLI, P., FUMAGALLI, I., CAVALCA, M. & SARTORE, F.: Studies on the decomposition of lignocellulosic carbon in a flooded ricefield soil. (With 2 figures and 5 tables in the text)	137–142
PUNČOCHÁR, P.: Reaction of microbial periphyton to substrate concentration changes in a running water model. (With 1 table in the text)	143–144
VRBA, J.: Effect of periodic illumination on nitrification in the continuous cultivation. (With 2 figures and 1 table in the text)	145–150
 Production and significance of bacteria in plankton and sediment (Chairman: D. J. W. MORIARTY)	
SIMON, M.: Improved assessment of bacterial production: combined measurements of protein synthesis via leucine and cell multiplication via thymidine incorporation	151–155
SOROKIN, V. I.: Comparative evaluation of the isotopic methods for the measurements of microbial production in the sea. (With 4 figures and 2 tables in the text)	157–164
GÜDE, H.: Bacterial net production approaching zero – a frequent phenomenon in pelagic environments?	165–169
BELL, R. T.: Production and respiration of free-living bacterioplankton in a eutrophic lake (Abstract)	171
KRAMBECK, Ch. & KRAMBECK, H.-J.: True dimensions of bacterioplankton cells? (Abstract)	173
BABENZIEN, H.-D. & BABENZIEN, Ch.: Microbial activities in a naturally acidotrophic lake. (With 3 figures and 2 tables in the text)	175–181
MORIARTY, D. J. W.: Bacterial productivity in sediments. (With 1 figure in the text)	183–189
BILLEN, G.: Delayed development of bacterioplankton with respect to phytoplankton: a clue for understanding their trophic relationships. (With 7 figures in the text)	191–201
FUKSA, J. K.: Numbers and activity of bacterioplankton in various types of waters in Czechoslovakia: Relations to chlorophyll concentration. (With 1 figure in the text)	203–208
DRABKOVÁ, V. G.: Bacterial production and respiration in the lakes of different types. (With 4 figures and 2 tables in the text)	209–214
OLÁH, J., PEKÁR, F., LIPTÁK, M. & TÓTH, E. O.: Primary, bacterial and fish production in organic loaded ponds (Abstract)	215
AUTIO, R. M.: Pelagic bacterioplankton in the Baltic proper. (With 3 figures and 2 tables in the text)	217–226
MARKOŠOVÁ, R.: Changes of planktonic bacteria in experimental limnocorrals manipulated with nutrients (N, P) and with planktivorous fish (Abstract)	227
 Distribution and seasonal changes of planktonic bacteria, interactions and grazing impact (Chairman: V. STRAŠKRABOVÁ)	
STRAŠKRABOVÁ, V., ŠIMEK, K. & KOMÁRKOVÁ, J.: Modelling seasonal changes of epilimnetic bacteria on the basis of phyto- and zooplankton dynamics. (With 1 figure and 1 table in the text)	229–235

HÖFLE, M. G. & BRETTAR, I.: Correlation between microbial activity and taxonomic structure in the water column of the central Baltic (Abstract)	237
ARNDT, H., JOST, G. & WASMUND, N.: Dynamics of pelagic ciliates in eutrophic estuarine waters: importance of functional groups among ciliates and responses to bacterial and phytoplankton production. (With 3 figures in the text)	239-245
BLOEM, J. & CAPPENBERG, Th. E.: Bacterial production, protozoan grazing and mineralization in stratified Lake Vechten (Abstract)	247
STEENBERGEN, C. L. M. & VAN DEN HOVEN, P.: A note on the measurement of production of phototrophic bacteria in deep layers. (With 2 figures and 1 table in the text) . .	249-255
PAVELIEVA, E. B.: The trophic relation in the microzooplankton community. (With 3 figures and 2 tables in the text)	257-261
JÜRGENS, K. & GÜDE, H.: Role of bacteria and heterotrophic nanoflagellates (HNF) for epilimnetic P-cycling in Lake Constance (Extended abstract)	263-264
HERNDL, G. J.: Marine amorphous aggregates (marine snow) as a model system of the "microbial loop" (Abstract)	265
SOROKIN, Y. I.: Heterotrophic microplankton in plankton successions and self purification processes along the Yenisei river. (With 4 figures and 2 tables in the text)	267-273
ŠIMEK, K., MACEK, M. & VYHNÁLEK, V.: Uptake of bacteria-sized fluorescent particles by natural protozoan assemblage in a reservoir. (With 2 figures and 2 tables in the text)	275-281
KUUPPO-LEINIKKI, P. & KUOSA, H.: Estimation of flagellate grazing on bacteria by size fractionation in the Northern Baltic Sea. (With 2 figures and 2 tables in the text) .	283-290
KIVI, K.: The role of pelagic protozoans in the Northern Baltic Sea – an experimental approach (Abstract)	291
TOBIENSEN, A.: Temperature dependent filtration rates and size selection in some heterotrophic microflagellates and one dinoflagellate. (With 5 figures and 3 tables in the text)	293-304
