CONTENTS

<i>Chapter 1. The Steroids</i>	1
Introduction	1
Configuration	2
The nomenclature of the steroids	3
Conformation	6
Polymorphism	11
References	13
Scientific names of the compounds mentioned	14
<i>Chapter 2. Steroid-Protein Interactions</i>	15
Introduction	15
The steroid receptor proteins	16
Steroid binding serum proteins	20
The binding of steroids to transforming enzymes	28
References	37
Scientific names of the compounds mentioned	41
<i>Chapter 3. The Biosynthesis of the Sterols</i>	43
Cholesterol and ergosterol	43
The cyclization of squalene	45
Removal of the 14 α -methyl group	48
Reduction of the 14(15)-double bond	50
Removal of the methyl groups at C-4	51
Introduction of the 5(6)-double bond	51
Reduction of the 24(25)-double bond	52
The biosynthesis of ergosterol	52
Regulation of cholesterol biosynthesis	52
Oxygenated sterols as inhibitors of cholesterol synthesis	55
Inhibitor of 3-hydroxy-3-methylglutaryl coenzyme A synthase	55
Competitive inhibitors of 3-hydroxy-3-methylglutaryl coenzyme A reductase	56
Inhibitors of squalene epoxidase	56
Inhibitors of 2,3-oxidosqualene cyclase	59
Inhibitors of cytochrome P-450 _{DM}	59
Inhibitors of $\Delta^{8(14)}$ -sterol Δ^{14} -reductase	61
Inhibitors of 4-methylsterol oxidase	62
Inhibitor of the sterol Δ^7 -reductase	63
Inhibitor of the sterol Δ^{24} -reductase	63
Inhibitors of C-24 methylation	64

Cholesterol derivatives as organ-imaging agents	65
References	66
Scientific names of the compounds mentioned	70
<i>Chapter 4. The Cytochrome P-450 Isoenzymes</i>	73
Nomenclature of the cytochromes P-450	73
Location of the cytochromes P-450	76
Structure of the cytochromes P-450	77
Mechanism of action of the cytochromes P-450	81
Cytochrome P-450 _{SCC}	83
Inhibitors of cytochrome P-450 _{SCC}	86
References	91
Scientific names of the compounds mentioned	94
<i>Chapter 5. The Progestins</i>	97
Progesterone	97
Biosynthesis	99
Metabolism	100
Structure and progestational activity	101
Therapeutic use of the progestins	109
Contraception	109
Inhibitors of ovarian progesterone synthesis	111
Progesterone antagonists	113
References	116
Scientific names of the compounds mentioned	121
<i>Chapter 6. Central Nervous System Activity of Progesterone Metabolites</i>	123
Structure and anaesthetic activity	124
Modulation of the GABA system	124
References	126
Scientific names of the compounds mentioned	127
<i>Chapter 7. The Mineralocorticoids</i>	129
Aldosterone	129
Biosynthesis of aldosterone	133
Structure and mineralocorticoid activity	134
Therapeutic use of the mineralocorticoids	136
Aldosterone antagonists	136
Inhibitors of aldosterone synthesis	139
References	139
Scientific names of the compounds mentioned	141

<i>Chapter 8. The Glucocorticoids</i>	143
Hydrocortisone	143
Biosynthesis	144
Metabolism	145
Structure and glucocorticoid activity	148
Therapeutic use of the glucocorticoids	162
Glucocorticoid antagonists	164
Inhibitors of hydrocortisone synthesis	167
References	168
Scientific names of the compounds mentioned	172
<i>Chapter 9. The Androgens</i>	177
Testosterone and stanolone	177
Biosynthesis	178
Metabolism	180
Structure and biological activity	181
Therapeutic use of the androgens	182
Anti-androgens	185
Inhibitors of testosterone synthesis	187
Inhibitors of steroid 5 α -reductase	188
References	191
Scientific names of the compounds mentioned	194
<i>Chapter 10. The Steroid Odorants</i>	197
References	199
Scientific names of the compounds mentioned	199
<i>Chapter 11. The Estrogens</i>	201
Estradiol and estrone	201
Biosynthesis	203
Metabolism	204
Estriol	206
Anti-estrogens	208
Structure and estrogenic activity	210
Prodrugs for the estrogens	212
Estrogens in therapy	215
Inhibitors of estrogen sulfotransferase	217
Aromatase inhibitors	218
References	226
Scientific names of the compounds mentioned	232
<i>Chapter 12. Steroids and Cancer</i>	235
Hormonal steroids	235
Alkylating steroids	235

Plant steroids with anticancer activity	237
Inhibitors of cholesterol synthesis	237
The withanolides	238
References	240
Scientific names of the compounds mentioned	241
<i>Chapter 13. The Bile Acids</i>	243
Introduction	243
Biosynthesis	244
Therapeutic use	244
Pharmaceutical use of the bile salts	247
References	248
Scientific names of the compounds mentioned	249
<i>Chapter 14. Vitamin D</i>	251
Calcitriol	251
The biosynthesis of calcitriol	252
Use of "vitamin D" and related steroids	253
Metabolism	255
Structure and biological activity	257
Psoriasis	259
Inhibitors of calcitriol biosynthesis	260
References	261
Scientific names of the compounds mentioned	263
<i>Chapter 15. Biological Activities of Sterols</i>	265
Cholesterol synthesis in insects	265
Insect-inhibiting and insect-deterring sterols	267
The ecdysteroids	269
Sex hormones of the water-mould <i>Achlya ambisexualis</i>	274
Ovulatory-active steroids from crops of Job's Tears	275
The Brassino-steroids	275
References	278
Scientific names of the compounds mentioned	280
<i>Chapter 16. Steroid Antibiotics</i>	283
References	285
Scientific names of the compounds mentioned	285
<i>Chapter 17. The Cardiotonic Steroids</i>	287
Digitalis glycosides	287
The squill glycosides	290
The strophanthus glycosides	290

Mechanism of action	291
Structure and cardiotonic activity	292
Therapeutic use of the cardiotonic steroids	296
References	297
Scientific names of the compounds mentioned	298
<i>Chapter 18. Synthetic Steroids with Pharmacological Activities</i>	301
Introduction	301
Steroids for treatment of head and spinal-cord injuries	303
Steroids with anti-arrhythmic activity	304
Steroids with neuromuscular blocking activity	306
References	310
Scientific names of the compounds mentioned	312
<i>Chapter 19. Steroid Synthesis</i>	315
Introduction	315
Total syntheses of cortisone and hydrocortisone	316
Partial syntheses of cortisone	323
Microbiological 11 α -hydroxylation	327
Synthesis of halopredone acetate	330
Testosterone from diosgenin	330
Canrenone and spironolactone	332
Synthesis of the 19-norsteroids	334
Total Synthesis of 19-norsteroids	336
Microbiological degradation of sterols	337
Synthesis of corticosteroids from	
9 α -hydroxyandrost-4-ene-3,20-dione	338
Synthesis of norethisterone	341
Synthesis of vitamin D	342
References	347
Scientific names of the major compounds	349
<i>Subject Index</i>	351
