Contents

List of Participants	iii
Preface	vii
Preclinical development of enoxacin J. Domagala	1
4-Quinolones—new indications and continuing developments P. Ball	7
Issues in the development and evaluation of anti-infective drugs R. G. Finch	13
Mechanisms of action of the quinolones C. S. Lewin	17
Enoxacin-induced structural changes in <i>E. coli</i> J. C. Burnham	23
UK multicentre study of comparative sensitivities of clinical isolates to enoxacin and other antimicrobials A. Percival, K. C. Ashley, N. A. Kenwright and K. J. Stoner	29
Pharmacokinetics of enoxacin R. Wise	47
Tissue penetration of enoxacin M. J. Wood	53
Drug interaction J. McEwen	59
Review of enoxacin safety data S. Zinner	67
Simple urinary tract infections—experience with enoxacin G. Harding	71
Double-blind study of enoxacin versus trimethoprim/sulphamethoxazole in simple urinary tract infections N. F. Lightfoot and Kay Smith	77
Complicated urinary tract infections—experience with enoxacin G. Williams	83

Enoxacin in gonococcal infections	89
G. L. Ridgway	
Lower respiratory tract infections—study with enoxacin	93
B. Buggy	
Lower respiratory tract infections—experience with enoxacin	99
C. E. Langan	
Osteomyelitis—results of a UK study	105
E. R. S. Ross	
Skin and soft tissue infections—experience with enoxacin	109
H. Mensing
