Antibiotics and Antiviral Compounds

Chemical Synthesis and Modification

Edited by

Karsten Krohn, Herbert A. Kirst and Hans Maag

Weinheim · New York · Basel · Cambridge · Tokyo

Contents

New Methodology Applied to Antibiotic Synthesis

Antibiotics. A Challenge for New Methodology	1
<i>B. M. Trost</i>	
New Methodology and Applications to the Synthesis of Antibiotics and Other Bioactive Complex Molecules	15
<i>R. K. Boeckmann, Jr.</i>	
Integrated Metalation – Cross Coupling Approaches to Bioactive Natural Products	31
<i>V. Snieckus</i>	
New Approaches to the Stereoselective Synthesis of β -Amino- α -Hydroxy Acids, Dipeptide Isosteres, and Azasugars from Natural Amino Acids	57
<i>A. Dondoni</i>	
Directed Biosynthesis as an Alternative to Synthetic Modifications of Antibiotics	75
<i>A. Zeck and I. Sattler</i>	

Macrolide Antibiotics

Total Synthesis of Macrolide Antibiotics. A Route to Rutamycin B	89
<i>J. D. White</i>	
Towards Erythronolides, Efficient Synthesis of Contiguous Stereocenters	103
<i>R. W. Hoffmann and R. Stürmer</i>	
Total Synthesis of Erythronolide B Derivatives	111
<i>J. Mulzer, H. Kirstein, and P. Mareski</i>	
Chemical Modification of the Antifungal Macrolide Soraphen A ₁ α : Cleavage and Reconstruction of the Lactone Bond	133
<i>D. Schummer, B. Böhlendorf, M. Kiffe, and G. Höfle</i>	
Expanding the Therapeutic Potential of Macrolide Compounds	143
<i>H. A. Kirst</i>	
Synthesis and Structure-Activity Relationships of Echinocandin Antifungal Agents	153
<i>J. V. Heck, J. M. Balkovec, R. Black, M. L. Hammond, and R. Zambias</i>	

β -Lactames, Quinolones and Cyclopentanoid Antibiotics

The Farmitalia Penem Episode	161
<i>G. Franceschi, E. Perrone, M. Alpegiani, C. Battistini, A. Bedeschi, G. Visentin, and F. Zarini</i>	
Synthesis and Antimicrobial Spectrum of Some New Synthetic Monobactams	169
<i>Z. Zubovics</i>	
Design and Synthesis of D,D Peptidase Inhibitors	177
<i>L. Ghosez, G. Dive, S. Dumas, C. Génicot, F. Kumli, C. Love, and J. Marchand-Brynaert</i>	
Recent Developments in the Chemistry of Quinolones	187
<i>D. Bouzard</i>	
Cyclopentanoid Antibiotics: New Syntheses Based on Organophosphorous and Organosulfur Reagents	205
<i>M. Mikolajczyk</i>	

Peptides and Glycopeptides

Synthesis of Antimycotically Active Dipeptides	215
<i>H. Wild</i>	
Cyclosporins: Novel Insights into Structure Activity Relationships and Mechanism of Action	229
<i>H. Fliri</i>	
Conformational Analysis in Solution of Antibiotics with Immunosuppressive Activity	241
<i>H. Kessler and D. F. Mierke</i>	
Synthesis of Biologically Interesting Glycopeptides. A Problem of Chemical Selectivity	251
<i>H. Kunz</i>	
Studies Directed towards the Total Synthesis of Vancomycin and Related Antibiotics	263
<i>A. V. Rama Rao</i>	

Enediynes Antibiotics

Synthetic Studies toward Enediynes Antitumor Antibiotics	279
<i>M. Isobe and T. Nishikawa</i>	
Molecular Recognition in Neocarzinostatin Complex and Synthesis of New DNA Cleaving Molecules	289
<i>M. Hiramata</i>	
New Synthetic Strategies for the Synthesis of the "Enediynes" Antibiotics Esperamicin/Calicheamicin and Dynemicin-A	303
<i>T. Skrydstrup and D. S. Grierson</i>	

Applications of Allylsilanes in Natural Product Synthesis	315
<i>D. Schinzer</i>	
Carbohydrates in Antibiotic Synthesis	
The Use of Carbohydrate Chemistry in Antibiotic Research	327
<i>P. Sinay</i>	
Sugar Lactones as Useful Starting Materials	333
<i>G. W. J. Fleet</i>	
The Synthesis of Antibiotic Amino Sugars from α -Amino Aldehydes	343
<i>J. Jurczak and A. Golebiowski</i>	
Flexible, Stereocontrolled Routes to Sugar Mimics via Convenient Intermediates	359
<i>H.-J. Altenbach</i>	
Transglycosylase Inhibition	373
<i>P. Welzel</i>	
Recent Developments in the Enantiospecific Synthesis of Amaryllidaceae Alkaloids	379
<i>Y. Chapleur, F. Chrétien, and M. Khaldi</i>	
Steps Toward the <i>in vitro</i> Synthesis of Deoxy Sugars	389
<i>W. Klaffke</i>	
Antiviral Agents	
TSAO Derivatives: A Novel Class of HIV-1-Specific Inhibitors	403
<i>J. Balzarini, M.-J. Pérez-Pérez, A. San-Félix, K. S. Velázquez, M.-J. Camarasa, A.-M. Vandamme, A. Karlsson, and E. De Clercq</i>	
4'-Substituted Nucleosides as Antiviral Agents	421
<i>H. Maag, A. J. Gutierrez, E. J. Prisbe, R. M. Rydzewski, and J. P. H. Verheyden</i>	
Synthesis and Antiretroviral Activity of Carbocyclic Phosphonate Nucleoside Analogues	439
<i>G. Jähne, A. Müller, H. Kroha, M. Rösner, O. Holzhäuser, C. Meichsner, M. Helsberg, I. Winkler, and G. Rieß</i>	
Antiviral Acyclic Nucleotide Analogues	455
<i>A. Holý, H. Dvoráková, and J. Jindrich</i>	
Antisense and Triple Helix Forming Oligonucleotides as Potential Antiviral Therapeutics	463
<i>E. Uhlmann</i>	
Subject Index	471
