Contents

<i>Preface</i>	v
<i>Contributors</i>	xiii
1. Glycopeptides: Classification, Occurrence, and Discovery <i>Raymond C. Yao and Louise W. Crandall</i>	1
I. Introduction	1
II. Classification	2
III. Occurrence	6
IV. Discovery and Screening	7
V. Conclusion	20
VI. Addendum	21
References	21
2. Separation Methodology <i>Robert D. Sitrin and Gail Folena-Wasserman</i>	29
I. Introduction	29
II. Classic Methods for Extraction and Purification	31
III. Affinity Chromatography	33
IV. Preparative Reversed-Phase HPLC	45
V. General Glycopeptide Antibiotic Isolation Scheme	50
VI. Analytical Separation Techniques	52
VII. Conclusions	56
References	56
3. Approaches to the Synthesis of the Vancomycin Aglycones <i>David E. Evans and Keith M. DeVries</i>	63
I. Introduction	63

II.	Degradation Studies: Formation of Vancomycin Aglycone and Further Degradation to Amino Acid Constituents	69
III.	Synthesis Challenge	69
IV.	Model Studies: Approaches to the Synthesis of the Vancomycin Binding Pocket	76
V.	Synthesis of the Amino Acid Substituents	78
VI.	Synthesis of Vancomycin and Ristocetin Subunits	85
VII.	Oxidative Phenolic Coupling Studies	90
VIII.	Future Prospects	97
IX.	Conclusion	101
X.	Epilogue	101
	References	101
4.	Chemistry of Carbohydrate Components	105
	<i>Ferenc Sztaricskai and István Pelyvás-Ferenczik</i>	
I.	Introduction	105
II.	Composition and Structural Elucidation of the Carbohydrate Units by Chemical Methods	111
III.	Chemical Synthesis of the Aminodeoxy Sugars	131
IV.	Synthesis of the Oligosaccharide Side Chains	168
	Abbreviations	180
	References	181
5.	Structure–Activity Relationships of Vancomycin Antibiotics	195
	<i>Ramakrishnan Nagarajan</i>	
I.	Introduction	195
II.	SAR of the Core Heptapeptide Amino Acids	199
III.	SAR of Semisynthetic Glycopeptide Antibiotics	207
IV.	SAR and Modes of Action	211
V.	Conclusions	212
	References	215
6.	Resistance and Mode of Action	219
	<i>Thalia I. Nicas and Norris E. Allen</i>	
I.	Mechanism of Action of Vancomycin and Other Glycopeptides	219
II.	Glycopeptide Resistance	225
	References	233

7. Analytical Quantitation and Characterization	243
<i>Eugene L. Inman and C. L. Winely</i>	
I. Vancomycin Bioanalytical Methodologies	244
II. Vancomycin Characterization Methodologies	254
III. Characterization of Other Glycopeptides	267
References	269
8. Teicoplanin	273
<i>Beth P. Goldstein, Rita Rosina, and Francesco Parenti</i>	
I. Discovery	273
II. Chemistry	274
III. Fermentation	274
IV. Antimicrobial Activity	276
V. Toxicology	282
VI. Pharmacokinetics	284
VII. Place of Teicoplanin in Therapy	293
References	294
9. Vancomycin: A Clinical Overview	309
<i>Michael L. Zeckel and James R. Woodworth</i>	
I. Pharmacokinetics	309
II. Clinical Efficacy	323
III. Vancomycin Safety	346
IV. The Future	364
References	364
Epilogue	411
<i>Ramakrishnan Nagarajan</i>	
<i>Index</i>	413
