Second International Symposium on Environmental Biotechnology

A three-day symposium organised by the Institution of Chemical Engineers in conjunction with the European Federation of Biotechnology — Environmental Biotechnology Working Party, and held in Brighton, UK, 4–6 July 1994.

Contents

Monitoring and control

1. Keynote paper
Genes and proteins for detecting heavy metals: from molecular biology to practical solutions?
N.L. Brown (*University of Birmingham, UK*) 1
2. Simultaneous determination of inhibition kinetics of carbon oxidation and nitrification with the RODTOX biosensor.
Z. Kong, P. Vanrolleghem, P. Willems and W. Verstraete (*University of Gent, Belgium*) 4
3. Use of n-t-BOC-n-nitrophenyl ester as a chromogenic substrate in a sensor for the detection of airborne protease.
R.H. Cumming, I. Nitescu (*University of Teesside, UK*) and F.J. Rowell (*University of Sunderland, UK*) 7

New processes

4. Keynote paper
Membrane bioreactors for wastewater treatment.
T. Stephenson and M. Pankhania (*Cranfield University, UK*) 10
5. Microbial deproteinisation of waste prawn shell.
R.O. Bustos and M.G. Healy (*Queen's University of Belfast, UK*) 13
6. Bioremediation of pentachlorophenol (PCP) contaminated soil with 'shiitake' mushroom (*Lentinus edodes*).
B.C. Okeke, J.E. Smith, A. Paterson and I.A. Watson-Craik (*University of Strathclyde, UK*) 16
7. Novel on-line, non-disruptive technique for determination of membrane attached biofilm thicknesses.
L.M. Freitas dos Santos and A.G. Livingston (*Imperial College London, UK*) 19
- *8. Biological soil treatment — state of the art.
V. Schulz-Berendt (*Umweltschutz Nord, Germany*)

Interfaces

9. Keynote paper
Biodegradation of poorly water soluble compounds in biphasic aqueous-organic systems.
J.L. Lebault, M. Nonus and A. Ascon-Cabrera (*Universite de Technologie, France*) 22
10. Removal of dilute organics from industrial wastewaters: extraction of 3,4-dichloroaniline using colloidal liquid aphrons.
G.J. Lye, L.V. Poutiainen and D.C. Stuckey (*Imperial College London, UK*) 25
11. Influence of surface-active compounds on the bioavailability of PAH.
F. Volkering, A.M. Breure and J.G. van AnDEL (*National Institute of Public Health and Environmental Protection, The Netherlands*) 28

Fundamentals

12. Keynote paper
Environmental biotechnology — present role and future perspectives.
B.M. Frostell (*IVL-Swedish Environmental Research Institute, Sweden*) 31
13. The effect of household chemicals on municipal solid waste (MSW) digestion.
G. Purdom and P. Mistry (*AEA Technology, Biotechnology Services, UK*) 34
14. Combined photochemical and biological treatment of off-gases.
J.W. van Groenestijn, H.J. Doddema, H. Kok and T.P.M. Koster (*TNO Departments of Environmental Biotechnology, The Netherlands*) 40
15. The need for the development of a research sector on environmental biotechnology in future European programmes.
I. Economidis (*European Commission, DG XII, Belgium*) 43
16. Bioenergetic aspects of converting organic pollutants by microbial activities.
W. Babel and R.H. Müller (*Centre for Environmental Research, Leipzig-Halle Ltd, Germany*) 46

Higher organisms

- *17. Keynote paper
B. Mattiasson (*University of Lund, Sweden*)
18. Minimization of sludge production in aerobic treatment by use of predators.
T. Welander and N.M. Lee (*Lund University, Sweden*) 46
19. Earthworms and soil rehabilitation after opencast mining for coal.
J. Scullion (*University of Wales, UK*) 49

N, P and S removal

20. Keynote paper
High rate nitrification with artificially immobilized nitrifying bacteria.
E.J.T.M. Leenen, J. Tramper and R. Wijffels (*Wageningen Agricultural University, The Netherlands*) 52
21. Nitrification of ammonia polluted air in trickling filters.
M.C.J. Smits, S.P.P. Ottengraf and J.C. van den Heuvel (*University of Amsterdam, The Netherlands*) 55
22. The effect of sulfate reducing bacteria on the treatment performance of aerobic biofilm reactors.
P. Lens, W. Verstraete (*University Gent, Belgium*), A. Massone and A. Rozzi (*Politecnico di Milano, Italy*) 58
23. Bioelectrocatalytical removal of nitrate in drinking water, process water and waste water.
J.P. van der Lugt and W. Somers (*TNO Nutrition and Food Research, The Netherlands*) 61
24. Biological nitrogen and phosphorus removal from municipal wastewater by an anaerobic-anoxic process with side biofilm nitrification.
P. Jenicek, J. Wanner (*Institute of Chemical Technology — Praha, Czech Republic*),
G. Bortone, R. Saltarelli, A. Tilche (*ENEA, Italy*) and J. Cech (*Hydrotech s.r.o., Czech Republic*) 64

Poster papers

- *25. Acidophilic microbial communities: candidates for bioremediation of acidic mine effluents.
D.B. Johnson, T.A. Bridge and P. Nicolau (*University of Wales, UK*)
26. Bacterial stress and biodegradation.
D. Tóth, B. Polek and E. Karellová (*Slovak Academy of Sciences, Slovakia*) 67
27. Biodegradation of 3-chlorobenzoate at low concentrations: transformation kinetics and residual concentrations.
M.E. Tros, G. Schraa and A.J.B. Zehnder (*Wageningen Agricultural University, The Netherlands*) 70
28. Biodegradative properties of alkaliphilic microorganisms from building materials of herbicide production plants.
R.H. Müller and W. Babel (*Centre for Environmental Research, Leipzig-Halle Ltd, Germany*) 73
29. Biological removal of cyanide and organics from wastewaters.
J. Nozaki, J.C.R. Azevedo and E.M. Dos Reis (*FUEM, Brazil*) 76
30. Bioremediation of contamination in soil, sediments and water resulting from lignite pyrolysis.
U. Stottmeister, G. Martius, J. Porschmann, E. Weißbrodt, P. Kusch, H. Seidel and H. Hoffmann (*Centre for Environmental Research, Germany*) 79
31. Bioremediation of soil pollution at a water protection area — an ecological and economical advantageous solution.
B. Daei and R. Eisermann (*XENEX Gesellschaft, Germany*) 82
32. Biosorption and flotation for metal effluent treatment.
K.A. Matis, A.I. Zouboulis (*Aristotle University of Thessaloniki, Greece*) and I.C. Hancock (*University of Newcastle-upon-Tyne, UK*) 86
33. Biosorption for the removal of heavy metals from industrial wastewaters.
M.W. Wilson and R.G. Edyvean (*University of Leeds, UK*) 89
34. Clean-up of PAH-polluted dredging sludges in bioreactors.
G.C. Stefess, A.M. Breure and J.G. van An del (*National Institute of Public Health and Environmental Protection, The Netherlands*) 92
35. Determination of biomass viability based on ATP and oxygen uptake measurements.
P. Gikas and A.G. Livingston (*Imperial College London, UK*) 95
36. Detoxification of point source industrial wastewaters using an extractive membrane bioreactor — membrane mass transfer.
P.R. Brookes and A.G. Livingston (*Imperial College London, UK*) 98
37. Effect of temperature on the thermophilic anaerobic acidification of sucrose.
G. Ghosh, J.B. van Lier and G. Lettinga (*Wageningen Agricultural University, The Netherlands*) 101
38. Hydrocarbon assimilation and biosurfactant production in Tn10 induced *Pseudomonas aeruginosa* K3 mutants.
Q.M. Khan, M. Faiz, S. Iqbal, Z.M. Khalid and K.A. Malik (*National Institute for Biotechnology and Genetic Engineering, Pakistan*) 104
39. Inhibition of Botrydial biosynthesis: an approach to the synthesis of selective fungicides.
I.G. Collado, J.M. Cantoral, R. Hernandez, L. Rebordinos and R. Duran (*Universidad de Cádiz, Spain*) 107
40. Inhibition of ferrous iron oxidation by acidophilic bacteria by some coal water mixture dispersants.S.I. Hogg, A.J.M. Jones and M. Lott (*University of Glamorgan, UK*) 110

41. In-situ biological treatment of mixed organic contaminants in chalk: laboratory studies.
B. Croft, R. Brookes, P. Watkiss and D.L. Oakley (*AEA Technology, UK*) 113
42. Investigations into the use of linseed flax straw for the removal of metals from waste water.
D.T. Taylor and R.G.J. Edyvean (*University of Leeds, UK*) 116
43. Isolation and characterization of a pentachlorophenol-degrading bacterium.
Y.P.C.M. van Gestel, A.M. Breure, J.G. van Andel and M. Rutgers (*National Institute of Public Health and Environmental Protection, The Netherlands*) 119
44. Laboratory studies on the toxicity of 2-mercaptobenzothiazole.
H. De Wever and H. Verachtert (*Laboratory for Industrial Microbiology, Belgium*) 122
45. Mass transfer in an artificial biofilm.
E.E. Beuling, S.P.P. Ottengraf and J.C. van den Henvel (*University of Amsterdam, The Netherlands*) 125
46. Microbial degradation of 2-hydroxybenzothiazol.
H. De Wever, E. De Man and H. Verachtert (*Catholic University of Leuven, Belgium*) 128
47. Microbiological and biochemical analysis of biocenoses of native and polluted terrestrial ecosystems.
L. Wünsche, V. Riis, D. Miethe and W. Babel (*Centre for Environmental Research Leipzig-Halle Ltd, Germany*) 131
48. Nitrification at low temperatures.
K. Ostgaard (*University of Trondheim, Norway*), N. Lee and T. Welander (*Lund University, Sweden*) 134
49. Performance of floating and sunken media upflow biological aerated filters.
A. Mann, C. Fitzpatrick and T. Stephenson (*Cranfield University, UK*) 138
- *50. Remediation of contaminated soils and waste materials — bioleaching and biosorption of metals EC STEP project 900-428.
J.J.D van der Steen and J. Doddema (*TNO Environmental and Energy Technology, The Netherlands*)
51. Survival and the proteosynthetic activity of the starved wild-type and mutant vibrio strains.
B. Polek, P. Ferianc, E. Karellová, J. Godocíková and D. Tóth (*Slovak Academy of Sciences, Slovakia*) 141
52. Suspended-carrier biofilm processes for treatment of pulp and paper industry wastewaters.
P. Yu, A. Malmqvist (*A/NOX AB, Sweden*) and T. Welander (*Lund University, Sweden*) 144
53. The application of the CassTM sequencing batch reactor to meeting modern-day discharge consent limits.
M. Goronsky (*Transenviro Inc, USA*) and A.J. Barker (*Babcock Water Engineering Ltd, UK*) 147
54. The centre for environmental biotechnology — a new technology transfer institution in Germany.
G. Martius, T. Münker (*UFZ Leipzig-Halle GmbH, Germany*) and D. Sell (*DECHEMA, Germany*) 150
55. The combined effect of influent quality and anoxic selector on activated sludge settleability.
M.-P. De Poorter, F. Torfs, H. Bogaert and W. Vestraete (*University of Gent, Belgium*) 152

56. The degradation of anthracene by a *Pseudomonas sp* and *Pseudomonas mendocina* at low temperature.
K. Lisowksa, L. Sedlaczek (*University of Lodz, Poland*), I. Persson, B. Hahn-Hagerdal (*University of Lund, Sweden*), A. Rumijowska and P. Parniewski (*Polish Academy of Science, Poland*) 155
57. The microbial ecology of cemented low and intermediate level radioactive waste.
G.J. Holtom, N. O'Kelly, A. Rosevear, E. Walter (*AEA Technology, UK*), W.G. Grant, D. Widdowson and J. Malpass (*University of Leicester, UK*) 158
58. The Nutristat: a substrate concentration-controlled continuous culture as a tool to grow bacteria on toxic compounds.
M. Rutgers, A.M. Breure and J.G. van Andel (*National Institute of Public Health and Environmental Protection, The Netherlands*) 161
59. The problem of determination of the measure of detoxifying action in environmental biotechnology.
N.V. Sokolov (*Water Problems Institute, Russia*) 164
