<b>Foreword</b>	<b>ix</b>
<b>Preface</b>	<b>xi</b>
<b>Acknowledgements</b>	<b>xv</b>
<b>1 Introduction</b>	<b>1</b>
1.1 The Purpose of Cosmology	1
1.2 Structure of This Book	1
<b>2 The Observed Universe</b>	<b>5</b>
2.1 Introduction	5
2.2 Existence of Structure	6
2.3 Cosmic Expansion	6
2.4 The Age of the Cosmos	8
2.5 Element Abundances	10
2.6 Cosmic Matter	10
2.7 Background Radiation	12
2.8 Mass Density	13
2.9 Isotropy and Homogeneity	14
2.10 Evidence for Evolution	15
2.11 Causal Horizons	16
2.12 Review	17
2.13 References	18
<b>3 The Cosmological Equations</b>	<b>21</b>
3.1 The Dynamical Equations from Cosmic Energy	21
3.2 Derivation and Explanation of Hubble's Law	25
3.3 Solutions to the Expansion Equations	26

3.4	Review	30
3.5	Exercises	30
3.6	References	31
<b>4</b>	<b>Cosmological Redshift and Horizons</b>	<b>33</b>
4.1	Theory of the Redshift	33
4.2	Cosmological Horizons	36
4.3	Review	38
4.4	Exercises	38
4.5	References	38
<b>5</b>	<b>Evolution of the Cosmological Density Parameter</b>	<b>39</b>
5.1	The Flatness of the Universe	39
5.2	The Flatness Approximation	41
5.3	Relation of Density and Horizons	42
5.4	The Evolution of the Density Parameter	43
5.5	Review	45
5.6	Exercises	46
5.7	References	47
<b>6</b>	<b>The Thermal History of the Universe</b>	<b>49</b>
6.1	The State of Matter in the Early Universe	49
6.2	The Cosmic Entropy Density	50
6.3	How the Universe Cooled	52
6.4	The Neutrino Temperature	54
6.5	Decoupling and Recombination	56
6.6	Review	57
6.7	Exercises	58
6.8	References	58
<b>7</b>	<b>Cosmological Synthesis of Elements</b>	<b>59</b>
7.1	Time of Element Synthesis	59
7.2	The Neutron to Proton Ratio	60
7.3	The Helium Mass Fraction	62
7.4	Review	64
7.5	Exercises	65
7.6	References	65
<b>8</b>	<b>Cosmic Asymmetry and the Origin of Matter</b>	<b>67</b>
8.1	The Mystery of the Existence of Matter	67
8.2	Asymmetry as a Physical Theory	68
8.3	The Generation of Baryon Number	69
8.4	Review	70
8.5	Exercises	70

8.6	References	70
<b>9</b>	<b>Primordial Cosmological Inflation</b>	<b>71</b>
9.1	The Cosmological Problems	71
9.2	Matter Fields in the Early Universe	72
9.3	The Chaotic Inflationary Model	75
9.4	The Planck Limit	77
9.5	Density Fluctuations Generated by Inflation	78
9.6	The End of Inflation	80
9.7	Dissipation of Primordial Inhomogeneity	80
9.8	Eternal Chaotic Inflation	81
9.9	Review	83
9.10	Exercises	83
9.11	References	84
<b>10</b>	<b>The Evolution of Cosmic Structure</b>	<b>85</b>
10.1	Matter as a Fluid	85
10.2	The Evolution of Small Perturbations	86
10.3	Gravitational Energy and the Jeans Scale	89
10.4	Fluctuations of the Background Radiation	93
10.5	Review	95
10.6	Exercises	96
10.7	References	96
<b>11</b>	<b>Dark Matter and Structure Formation</b>	<b>97</b>
11.1	Evidence for Dark Matter	97
11.2	The Silk Scale	99
11.3	Hot Dark Matter	101
11.4	Cold Dark Matter	104
11.5	Review	107
11.6	Exercises	108
11.7	References	108
<b>12</b>	<b>Exotic Objects</b>	<b>109</b>
12.1	Black Holes	109
12.2	Magnetic Monopoles and the Monopole Problem	112
12.3	Cosmological Formation of Boson Stars	116
12.4	Review	119
12.5	Exercises	121
12.6	References	121
<b>13</b>	<b>Survey of Cosmological Theory</b>	<b>123</b>
13.1	What Have We Learned?	123
13.2	The Present State of Cosmological Knowledge	125

13.3 Problems Currently Facing Cosmology	125
13.4 Reprise	126
<b>Appendix A Physical Units and Constants</b>	<b>127</b>
<b>Appendix B Selected Bibliography of Cosmology</b>	<b>131</b>
B.1 Introductory References	131
B.2 Intermediate References	132
B.3 Advanced References	133
B.4 Relativistic Cosmology	134
B.5 Selected Journal Articles	135
B.6 General Physics	136
B.7 Complete List of Articles	137
B.8 Complete List of Books	139
<b>Index</b>	<b>140</b>
