New York • Chichester • Brisbane • Toronto • Singapore

CONTENTS

0 Introduction 1

0.1 Motivation, 1
0.2 Book Organization, 2
References, 3

1 Stochastic Processes 4

1.1 Definitions, 4
1.2 Statistics of Stochastic Processes, 5
1.3 Transformations of Stochastic Processes, 6
1.4 Types of Stochastic Processes, 8
1.5 An Illustrative Case Study, 9
1.6 Stationarity and Ergodicity, 12
1.7 Applications, 14
1.8 Stochastic Convergence, Differentiation, and Integration, 19
1.9 Entropy, 24
1.10 Correlation Functions, 25
1.11 Linear Systems with Stochastic Inputs, 33
1.12 White Noise, 38
1.13 Spectral Densities, 39
Problems, 43
References, 44

2 Parameter Estimation 45

2.1 Point Estimation, 45
2.2 Optimal Estimates, 50

2.3 Acceptable Estimates, 51
2.4 Least-Squares Estimation: The Deterministic Point of View (Gauss), 52
2.5 Sequential Estimation, 55
2.6 Mean-Square Estimation: Probabilistic Point of View, 57
2.7 Bayes Theorem: Most Probable Value, 59
2.8 Other Optimal Estimators: Maximum Likelihood, 61
2.9 Linear Minimum Mean-Square-Error Estimator: Vector Case, 63
2.10 Sequential MMSE Estimation, 66
2.11 Nonlinear Parameter Estimation, 70
Problems, 70
References, 71

3 Optimal State Estimation **73**

3.1 Discrete-Time Optimal State Estimation: The Kalman Filter, 73
3.2 Properties of the Kalman Filter (KF), 77
3.3 Stochastic Controllability, Observability, and Stability, 79
3.4 Continuous-Time Optimal State Estimation: The Kalman–Bucy filter, 80
3.5 Solution of the Matrix Riccati Equation, 86
3.6 Controllability, Observability, Stability, 89
3.7 Steady-State Filter: The Wiener Filter, 91
3.8 Nonlinear State Estimation, 92
3.9 Discrete-Time Extended Kalman Filter, 92
3.10 Discrete-Time Linearized Kalman Filter, 95
3.11 Continuous-Time Extended Kalman Filter, 96
3.12 Continuous-Discrete-Time Extended Kalman Filter, 102
3.13 Continuous-Time Linearized Kalman Filter, 104
3.14 Continuous-Discrete-Time Linearized Kalman Filter, 105
Problems, 106
References, 108

4 Stochastic Optimal Control **109**

4.1 Stochastic Optimal-Control Problem, 109
4.2 Bellman's Dynamic Programming Equation, 113
4.3 Continuous-Time Hamilton–Jacobi–Bellman Equation, 116
4.4 Linear-Quadratic-Gaussian Optimal-Control Problem: The Discrete-Time Case, 118
4.5 Active Feedback versus Open-Loop Control, 126
4.6 Linear-Quadratic-Gaussian Optimal-Control Problem: The Continuous-Time Case, 128
4.7 Active Feedback versus Open-Loop Control, 136

4.8 Stability Considerations, 137
Problems, 139
References, 141

5 Approximation Theory for Nonlinear Stochastic Control Systems **143**

5.1 Introduction, 143
5.2 Problem Formulation, 144
5.3 Approximation Theory of Stochastic Optimal Control, 146
5.4 Stochastic Infinite-Time Regulator, 150
5.5 Stability Considerations, 152
5.6 Design of Suboptimal Controllers, 153
5.7 Conclusions, 161
Problems, 162
References, 162

6 Entropy Reformulation of Stochastic Estimation and Optimal Control **164**

6.1 Review of Entropy Concepts, 164
6.2 Maximum Entropy Formulation of Optimal and Suboptimal Control, 168
6.3 Maximum Entropy Formulation of State Estimation, 175
6.4 Cost of Active Feedback (Dual) Control Problem, 178
6.5 The LQG Optimal Control and the Kalman-Bucy Filter, 185
6.6 Upper Bound of the Equivocation $H[\hat{\phi}/u^*]$, 188
6.7 Case Study on Optimal Control of Intelligent Space Truss Assembly, 192
6.8 Conclusions, 204
Problems, 204
References, 205

Appendix A: Review of System Theory **208**

A.0 System Theory, 208
A.1 Mathematical Background, 208
A.2 Linear Systems, 212
A.3 Stability, 217
A.4 Controllability, 217
A.5 Observability, 218
A.6 Equivalence of Frequency and Time Domain, 218
References, 219

Appendix B: Review of Probability Theory **220**

B.0 Axiomatic Probability Theory, 220
B.1 Set-Theoretic Definitions, 220
B.2 Random Variables, 224
B.3 Functions of Random Variables, 225
B.4 Moments of Continuous-Time Random Variables, 226
B.5 Moments of Discrete-Time Random Variables, 226
B.6 Random Sequences, 227
References, 227
