

Jacqueline Bergeron (Ed.)

# The Early Universe with the VLT

Proceedings of the ESO Workshop  
Held at Garching, Germany,  
1–4 April 1996

Springer

# Contents

## 1. Introduction

<b>Cosmological Questions for the European Southern Observatory Very Large Telescope .....</b>	<b>3</b>
<i>D. Tytler</i>	

## 2. The VLT First Generation Instrument Capabilities as Cosmological Tools

<b>ISAAC – IR Spectrometer and Array Camera .....</b>	<b>21</b>
<i>A.F.M. Moorwood, J. Spyromilio</i>	
<b>Observing the Early Universe with CONICA .....</b>	<b>27</b>
<i>R. Lenzen</i>	
<b>Spectroscopy of Faint Distant Objects with FORS .....</b>	<b>35</b>
<i>I. Appenzeller, O. Stahl, S. Kiewewetter-K., R.-P. Kudritzki, H. Nicklas, G. Rupprecht</i>	
<b>FUEGOS: Multi-Objects and 2-D Spectrograph for the VLT .....</b>	<b>43</b>
<i>P. Felenbok</i>	
<b>The ESO UV-Visual Echelle Spectrograph (UVES) .....</b>	<b>54</b>
<i>S. D’Odorico</i>	

## 3. Galaxy Evolution at $z \lesssim 1$

<b>The Evolution of Normal Galaxies: HST Morphologies and Deep Spectroscopy .....</b>	<b>65</b>
<i>R. Ellis</i>	

<b>The Canada France Redshift Survey</b> .....	79
<i>F. Hammer, S. Lilly, D. Crampton, O. Le Fèvre, H. Flores, D. Schade</i>	
<b>Galaxy Evolution: Luminosities and Linewidths</b> .....	87
<i>M. Colless</i>	
<b>Distant Supernovae and Cosmic Deceleration</b> .....	95
<i>B. Leibundgut, J. Spyromilio</i>	
<b>Evolution of Elliptical Galaxies up to <math>z \approx 1</math></b> .....	105
<i>R. Bender, R.P. Saglia, B. Ziegler</i>	
<b>Constraining the Evolution of Galaxy Masses and the <math>M/L</math> Ratios out to <math>z = 1</math></b> .....	113
<i>M. Franx, P.G. van Dokkum</i>	
<b>2D Spectroscopy of Remote Radiogalaxies with TIGER</b> ...	119
<i>G. Adam</i>	
<b>Spectro-Imaging of Starburst Galaxies: Present and Future</b> .....	126
<i>G. Comte, T. Mousessyan, A. Petrosian</i>	
<b>4. Search for Highest Redshift Galaxies</b>	
<b>Keck Spectroscopy of Redshift <math>z \sim 1</math> Field Galaxies</b> .....	133
<i>D.C. Koo</i>	
<b>VIRMOS: Deep Redshift Surveys with the VLT</b> .....	143
<i>O. Le Fèvre, P. Vettolani, J.G. Cuby, D. Maccagni, D. Mancini, A. Mazure, Y. Mellier, J.P. Picat</i>	
<b>The AUSTRALIS Instrument Concept – an Interim Report</b> .....	151
<i>K. Taylor, M. Colless</i>	
<b>Numerical Simulations of Galaxy Formation</b> .....	156
<i>M. Steinmetz</i>	
<b>The Calar Alto Deep Imaging Survey for Primeval Galaxies</b> .....	165
<i>K. Meisenheimer, S. Beckwith, R. Fockenbrock, J. Fried, H. Hippelein, U. Hopp, Ch. Leinert, H.-J. Röser, E. Thommes, C. Wolf</i>	

<b>Faint Emission Line Galaxies Detected in CADIS</b> .....	173
<i>E. Thommes, R. Fockenbrock, H. Hippelein,</i>	
<i>K. Meisenheimer, H.-J. Röser</i>	
<b>A Global Approach to Star and Galaxy Formation</b> .....	177
<i>S.M. Fall</i>	
<b>Metal Absorption from Galaxies in the Process of Formation</b> .....	185
<i>M.G. Haehnelt</i>	
<b>Weak Lensing at the Limit of the Sky Background Noise</b> ..	189
<i>Y. Mellier, B. Fort</i>	
<b>Morphology of High Redshift Galaxies with HST</b> .....	200
<i>F.D. Macchetto</i>	
<b>Search for Galaxies at <math>z &gt; 4</math> from a Deep Multicolor Survey</b> .....	208
<i>E. Giallongo, S. Charlot, S. Cristiani, S. D'Odorico,</i>	
<i>A. Fontana</i>	
<b>5. Clusters and Large-Scale Structure</b>	
<b>Large-Scale Structure at High Redshift</b> .....	219
<i>S.D.M. White</i>	
<b>The CNOC Cluster Survey</b> .....	231
<i>R.G. Carlberg, H.K.C. Yee, E. Ellingson, S. Morris,</i>	
<i>R. Abraham, P. Gravel, F.D.A. Hartwick, J.E. Hesser,</i>	
<i>J.B. Hutchings, J.B. Oke, C.J. Pritchett, T. Smecker-Hane</i>	
<b>Clusters of Galaxies and the VLT</b> .....	239
<i>G. Chincarini, L. Guzzo, D. Lazzati, R. Scaramella</i>	
<b>Visible Multi-Object Spectroscopy: Prospects and Requirements</b> .....	243
<i>G. Vettolani, D. Maccagni</i>	
<b>Dark Matter Searches with Weak Gravitational Lensing</b> ..	250
<i>P. Schneider</i>	
<b>Large-Scale Structure at High Redshift</b> .....	258
<i>P.J. Francis</i>	
<b>Clustering of Absorption Line Systems</b> .....	266
<i>P. Petitjean</i>	
<b>Searches for High Redshift Clusters</b> .....	274
<i>M. Dickinson</i>	

## 6. First Active Objects

<b>High Redshift Radio Galaxies with the VLT</b> .....	285
<i>H. Röttgering, G. Miley</i>	
<b>Keck Spectropolarimetry of High <math>z</math> Radio Galaxies: Discerning the Components of the Alignment Effect</b> .....	300
<i>A. Cimatti, A. Dey, W. van Breugel, R. Antonucci, T. Hurt, H. Spinrad</i>	
<b>The Importance of IR Polarimetry for the Study of High Redshift Galaxies</b> .....	304
<i>S. di Serego Alighieri</i>	
<b>Quasar Surveys</b> .....	308
<i>S. Cristiani, F. La Franca</i>	
<b>Starburst Galaxies at High Redshift</b> .....	312
<i>M. Rowan-Robinson</i>	
<b>Prospects for ISO Deep Surveys</b> .....	322
<i>A. Franceschini, L. Danese</i>	
<b>Optical Searches for Quasars with <math>z &gt; 5</math></b> .....	333
<i>R.G. McMahon</i>	
<b>Dust and the Search for High Redshift Quasars</b> .....	341
<i>R.L. Webster, M.J. Drinkwater, P.J. Francis, F.J. Masci, B.A. Peterson</i>	
<b>Radio-Selected High Redshift Quasars</b> .....	349
<i>P. Shaver, J. Wall, K. Kellermann, C. Jackson, M. Hawkins</i>	
<b>Millimetre Emission from High Redshift</b>	
<b>Radioquiet Quasars</b> .....	357
<i>A. Omont, R.G. McMahon, J. Bergeron, P. Cox, S. Guilloteau, E. Kreysa, F. Pajot, E. Pécontal, P. Petitjean, P.M. Solomon, L.J. Storrie-Lombardi</i>	
<b>Can Photoionization Solve the Overcooling Problem?</b>	
<b>A Quick Look at the Cosmological History of Baryons</b> .....	361
<i>A. Blanchard, D. Barbosa, S. Prunet</i>	

## 7. Concluding Remarks

<b>Which Second Generation VLT Instrumentation? .....</b>	<b>369</b>
<i>G. Monnet, R. Gilmozzi</i>	

## 8. Poster Papers

<b>Galaxy Evolution at Low Redshift?</b>	
<b>Inferences from Optical and IR Counts .....</b>	<b>377</b>
<i>E. Bertin, M. Dennefeld</i>	
<b>Novae as Distance Indicators: Simulation of</b>	
<b>VLT Observations of Fornax .....</b>	<b>380</b>
<i>M. Della Valle, R. Gilmozzi</i>	
<b>The Search for Clustering at <math>z &gt; 0.8</math> .....</b>	<b>382</b>
<i>J.-M. Deltorn, O. Le Fèvre, D. Crampton, M. Dickinson</i>	
<b>Emission-Line Profile Studies of QSOs at <math>z \simeq 3</math> .....</b>	<b>384</b>
<i>M. Dietrich, M. Kümmel, S. Wagner</i>	
<b>Redshift and Photometric Survey of the X-Ray Cluster</b>	
<b>of Galaxies Abell 85 .....</b>	<b>386</b>
<i>F. Durret, P. Felenbok, D. Gerbal, J. Guibert, G. Lima-Neto,</i> <i>C. Lobo, V. Pislár, E. Slezak</i>	
<b>CFRS: The Minimal Ages for Starburst Galaxies .....</b>	<b>388</b>
<i>H. Flores, F. Hammer</i>	
<b>Object Detection and Classification in CADIS .....</b>	<b>390</b>
<i>R. Fockenbrock, E. Thommes, H. Hippelein,</i> <i>K. Meisenheimer, H.-J. Röser</i>	
<b>Simulations of High Redshift Galaxies Colors</b>	
<b>at the NTT-SUSI2 and VLT-FORS .....</b>	<b>392</b>
<i>A. Fontana, S. Charlot, S. Cristiani, S. D'Odorico,</i> <i>E. Giallongo, R. Gilmozzi, G. Marconi</i>	
<b>Spectral Classification of Galaxies with <math>z \lesssim 0.5</math> .....</b>	<b>394</b>
<i>G. Galaz, V. de Lapparent</i>	
<b>The Galaxy Environment of QSOs as a Function</b>	
<b>of Redshift .....</b>	<b>396</b>
<i>K. Jäger, K.J. Fricke, W. Kollatschny</i>	

<b>Detailed Kinematics of Extended Lyman-<math>\alpha</math> Regions Around Radio Galaxies at <math>z &gt; 2</math> .....</b>	<b>398</b>
<i>A. Koekemoer, W.J.M. van Breugel, J. Bland-Hawthorn</i>	
<b>AGN Host Galaxies at Intermediate Redshift .....</b>	<b>400</b>
<i>W. Kollatschny, A. Goerdt</i>	
<b>Void Hierarchy – a Guiding Principle to the Study of Faint Structures in Voids .....</b>	<b>402</b>
<i>U. Lindner, J. Einasto, M. Einasto, K.J. Fricke</i>	
<b>Implications for Optical Identifications of QSO Absorption Systems from Galaxy Evolution Models .....</b>	<b>404</b>
