

Akira Matsumoto · Susumu Ishii (Eds.)

Atlas of Endocrine Organs

Vertebrates and Invertebrates

With 550 Figures, Mostly in Color
Including Three-Dimensional Illustrations, Photomicrographs,
and Schematic Drawings

Springer-Verlag
Berlin Heidelberg New York
London Paris Tokyo
Hong Kong Barcelona
Budapest

Table of Contents

Evolution of Vertebrates and Endocrine Organs	1
Evolution of Invertebrates and Endocrine Organs	5
<hr/>	
Vertebrates	9
<hr/>	
1 Pineal Organ	11
Pineal Complex in Vertebrates	14
Evolution of Pinealocytes	16
Innervation of the Pineal Organ	19
Release Mechanism of Pineal Hormone	22
2 Hypothalamus	25
Histology of the Hypothalamus	28
Secretory Mechanisms of Hypothalamic Hormones in the Hypothalamic Nuclei	31
Secretory Mechanisms of Hypothalamic Hormones in the Median Eminence	34
Comparative Anatomy of the Hypothalamus	37
3 Hypophysis	39
Vertebrate Hypophysis	42
Distribution of the Secretory Cells and Immunocytochemistry of the Pars Distalis	45
Fine Structure and Secretory Mechanism of the Pars Distalis	50
Vascular System of the Hypophysis and Chemistry of the Adenohypophyseal Hormones	52
Histology of the Pars Intermedia and Chemistry of Its Hormones	57
Histology of the Neurohypophysis and Chemistry of the Neurohypophyseal Hormones	60
4 Thyroid Gland	63
Tissue Profiles of Thyroid Gland and the Mechanism of Synthesis and Release of Its Hormones	66
Thyroid Glands of Vertebrates	69
5 Parathyroid Gland	73
Histology of the Parathyroid Gland	76
Topographical Position of the Parathyroid Glands and Chemical Structure of PTH	79
6 Ultimobranchial Gland	83
Immunohistochemistry of Ultimobranchial Gland	86
Topographical Location of the Ultimobranchial Glands in Various Vertebrates and Chemical Structure of Calcitonin	88
Fine Structure of the Ultimobranchial Gland	90
7 Gastro-Entero-Pancreatic (GEP) Endocrine System	93
Endocrine Cells of the Stomach	96
Endocrine Cells in the Intestine	98
Endocrine Cells in Pancreatic Islets	100
Phylogeny of Pancreatic Islets	102
Secretory Mechanisms of Gut Endocrine Cells	105
8 Adrenal Gland	109
Histology of Adrenal Glands of Lower Vertebrates	112
Histology of Mammalian Adrenal Gland	114
Major Intracellular Synthetic Pathways for Adrenal Hormones	116
Chemical Structure and Regulation of Secretion of Adrenal Hormones	119
Adrenal Glands in Vertebrates	121
9 Juxtaglomerular Apparatus	123
Tissue Profiles of the Juxtaglomerular Apparatus and Renin-Angiotensin System	126
Juxtaglomerular Apparatus and Its Evolution	128
10 Testis	131
Regulatory Mechanism of Testicular Function and Mechanism of Hormone Actions	134
Androgen Producing Cells and Pathway of Steroidogenesis	137
Testes of Vertebrates	140
11 Ovary	143
Histology of the Ovary and Chemistry of the Ovarian Hormones	146
The Action of Steroid Hormones on Oocyte Growth and Maturation	149
Ovary of Vertebrates	152
12 Placenta	155
Structure and Endocrine Function of the Human Placenta	158
Implantation and Placentation of Mammals	161

13 Endocrine System of the Heart	165	19 Endocrine System of Molluscs	231
14 Caudal Neurosecretory System	169	Histology of the Bag Cell Cluster in <i>Aplysia</i>	234
Immunohistochemistry of Caudal Neurosecretory System and Chemical Structures of Hormones . . .	172	Histology of the Cerebral Ganglion and Atrial Gland in <i>Aplysia</i>	236
Release Mechanism of Caudal Neurosecretory Hormones	175	Endocrine System of <i>Lymnaea stagnalis</i>	238
Urophyses of Teleosts	178	Histology of the Cerebral Ganglion in <i>Lymnaea stagnalis</i>	240
15 Corpuscles of Stannius	181	Histology of the Dorsal Body in <i>Lymnaea stagnalis</i>	242
Tissue Profiles of the Corpuscles of Stannius	183	Histology of the Central Nervous System and Hermaphroditic Gland in Terrestrial Pulmonata . . .	244
<hr/>		Neurosecretory System and Optic Gland in <i>Octopus</i> . . .	247
Invertebrates	185	Histology of the Optic Gland and Neurosecretory System in <i>Octopus</i>	250
<hr/>		Release of Neurosecretory Substance in Mollusca	252
16 Endocrine System of Insects	187	20 Endocrine System of Annelids	255
Structure of the Brain-Corpus Cardiacum-Corpus Allatum Complex in Insects	190	Cerebral Ganglion, Cerebrovascular Complex and Infracerebral Gland in Nereids	258
Histology of Insect Brains	192	Neurosecretory System of Earthworms	261
Histology of the Corpus Cardiacum and Corpus Allatum of Insects	195	Histology of the Neurosecretory System of Earthworms	264
Histology of Subesophageal Ganglion of Insects . . .	198	Histology of the Neurosecretory System and Ganglia of Leeches	267
Histology of the Insect Prothoracic Gland	201	21 Endocrine System of Echinoderms	271
Chemical Structure of Insect Hormones	204	Neural Tissue of Asteroids	274
17 Endocrine System of Crustaceans	207	Histology of the Asteroid Gonads	276
Structure of the Optic Ganglion (X Organ-Sinus Gland System) and Chemical Structures of Associated Hormones . . .	210	Mode of Action and Chemical Structures of Asteroid Hormones	278
Histology of the Postcommissural and Pericardial Organs	213	Nerves and Gonads of Echinoderms	280
Histology of the Cerebral Ganglion	215	22 Endocrine System of Protochordates	283
Y Organ of Oniscoidea (<i>Armadillidium vulgare</i>) . . .	216	Histology of the Endostyle, Hatschek's Pit, Neural Gland, and Cerebral Ganglion of Protochordates . . .	286
Histology of the Crustacean Y Organ	218	23 Gut Endocrine System of Invertebrates	289
Y Organ of Crustaceans and Chemical Structures of Associated Hormones	220	Endocrine Cells in the Insect Gut	290
Androgenic Gland of <i>Armadillidium</i> (Isopoda, Crustacea)	222	24 Neuroendocrine System in Invertebrates not Listed in Previous Chapters	293
Histology and Cytology of the Androgenic Gland of Crustaceans	224	Abbreviations of Hormone Names	297
18 Endocrine System of Arthropods Other than Crustaceans and Insects	227	References and Selected Bibliography	299
		Subject Index	305
