

BANGS, CRUNCHES, WHIMPERS, AND SHRIEKS

Singularities and Acausalities
in Relativistic Spacetimes

JOHN EARMAN

New York Oxford
OXFORD UNIVERSITY PRESS
1995

CONTENTS

1. Introducing Spacetime Singularities and Acausalities, 3

- 1.1 Introduction, 3
- 1.2 Spacetime singularities: In the beginning, 5
- 1.3 Einstein's intolerance of singularities, 11
- 1.4 Acausality and time travel, 21
- 1.5 Singularities and acausalities together, 22

2. Defining, Characterizing, and Proving the Existence of Spacetime Singularities, 27

- 2.1 Introduction, 27
- 2.2 What is a spacetime singularity? 28
- 2.3 Extensions of spacetimes, 31
- 2.4 The received definition of singularities, 33
- 2.5 The missing missing points, 40
- 2.6 Naked singularities, 44
- 2.7 What is a spacetime singularity (again)? 46
- 2.8 Singularity theorems, 50
- 2.9 Singularities and quantum effects, 56
- 2.10 Conclusion, 58

2. Cosmic Censorship, 64

- 3.1 Introduction, 64
- 3.2 Cozying up to singularities, 65
- 3.3 Naked singularities and cosmic censorship, 67
- 3.4 The cosmic censorship hypothesis, 80
- 3.5 Is the cosmic censorship hypothesis true? 86
- 3.6 Black hole evaporation, 90
- 3.7 What if cosmic censorship should fail? 92
- 3.8 A dirty open secret, 97
- 3.9 Conclusion, 98

4. Supertasks, 103

- 4.1 Introduction, 103
- 4.2 Pitowsky spacetimes, 105
- 4.3 Malament–Hogarth spacetimes, 107

- 4.4 Paradoxes regained? 108
- 4.5 Characterization of Malament–Hogarth spacetimes, 110
- 4.6 Supertasks in Malament–Hogarth spacetimes, 114
- 4.7 Malament–Hogarth spacetimes and unresolved mathematical conjectures, 116
- 4.8 Can γ_1 carry out the assigned task? 119
- 4.9 Conclusion, 119
- Appendix: Proofs of Lemma 4.2 and Equation 4.4, 120

5. The Big Bang and the Horizon Problem, 124

- 5.1 Introduction, 124
- 5.2 Observability and light cones, 125
- 5.3 What can we predict about the future? 128
- 5.4 Event and particle horizons, 130
- 5.5 What is the horizon problem? 134
- 5.6 Reichenbach's principle of common cause, 135
- 5.7 Particle horizons and common causes, 137
- 5.8 Diagnosing the bellyache: Electromagnetism, 140
- 5.9 Diagnosing the bellyache: Cosmic background radiation, 142
- 5.10 Strategies for solving the horizon problem, 147
- 5.11 Horizons in standard and inflationary models, 150
- 5.12 Does inflation solve the horizon problem? 152
- 5.13 Conclusion, 155

6. Time Travel, 160

- 6.1 Introduction, 160
- 6.2 Types of time travel; backward causation, 161
- 6.3 The causal structure of relativistic spacetimes, 164
- 6.4 Why take Gödelian time travel seriously? 167
- 6.5 The paradoxes of time travel, 170
- 6.6 Consistency constraints, 173
- 6.7 Therapies for time travel malaise, 175
- 6.8 Non self-interacting test fields, 179
- 6.9 Self-interacting test fields, 183
- 6.10 Can we build and operate a time machine? 188
- 6.11 Conclusion, 193
- Appendix: Gödel on the ideality of time, 194

7. Eternal Recurrence, Cyclic Time, and All That, 203

- 7.1 Introduction, 203
- 7.2 Tolman on eternal recurrence, 204
- 7.3 Extending through the big bang and the big crunch, 205

- 7.4 Finding God in the big bang, 207
- 7.5 No recurrence theorems, 210
- 7.6 Cyclic time, 213
- 7.7 Conclusion, 218

8. Afterword, 223
