

# Monte Carlo Modeling for Electron Microscopy and Microanalysis

DAVID C. JOY

*New York Oxford*  
OXFORD UNIVERSITY PRESS  
1995

# CONTENTS

<b>1. An Introduction to Monte Carlo Methods</b>	<b>3</b>
1.1. Electron Beam Interaction—The Problem	3
1.2. The Monte Carlo Method	4
1.3. Brief History of Monte Carlo Modeling	5
1.4. About This Book	7
<b>2. Constructing a Simulation</b>	<b>9</b>
2.1. Introduction	9
2.2. Describing the Problem	9
2.3. Programming the Simulation	12
2.4. Reading a PASCAL Program	13
2.5. Running the Simulation	23
<b>3. The Single Scattering Model</b>	<b>25</b>
3.1. Introduction	25
3.2. Assumptions of the Single Scattering Model	25
3.3. The Single Scattering Model	26
3.4. The Single Scattering Monte Carlo Code	37
3.5. Notes on the Procedures and Functions Used in the Program	46
3.6. Running the Program	50
<b>4. The Plural Scattering Model</b>	<b>56</b>
4.1. Introduction	56
4.2. Assumptions of the Plural Scattering Model	56
4.3. The Plural Scattering Monte Carlo Code	62
4.4. Notes on the Procedures and Functions Used in the Program	71
4.5. Running the Program	75
<b>5. The Practical Application of Monte Carlo Models</b>	<b>77</b>
5.1. General Considerations	77
5.2. Which Type of Monte Carlo Model Should Be Used?	77

5.3. Customizing the Generic Programs	78
5.4. The "All Purpose" Program	79
5.5. The Applicability of Monte Carlo Techniques	79
<b>6. Backscattered Electrons</b>	<b>81</b>
6.1. Backscattered Electrons	81
6.2. Testing the Monte Carlo Models of Backscattering	81
6.3. Predictions of the Monte Carlo Models	90
6.4. Modeling Inhomogeneous Materials	97
6.5. Notes on the Program	105
6.6. Incorporating Detector Geometry and Efficiency	111
<b>7. Charge Collection Microscopy and Cathodoluminescence</b>	<b>114</b>
7.1. Introduction	114
7.2. The Principles of EBIC and C/L Image Formation	114
7.3. Monte Carlo Modeling of Charge Collection Microscopy	119
<b>8. Secondary Electrons and Imaging</b>	<b>134</b>
8.1. Introduction	134
8.2. First Principles—SE Models	136
8.3. The Fast Secondary Model	142
8.4. The Parametric Model	156
<b>9. X-ray Production and Microanalysis</b>	<b>174</b>
9.1. Introduction	174
9.2. The Generation of Characteristic X-rays	174
9.3. The Generation of Continuum X-rays	175
9.4. X-ray Production in Thin Films	177
9.5. X-ray Production in Bulk Samples	191
<b>10. What Next in Monte Carlo Simulations?</b>	<b>199</b>
10.1. Improving the Monte Carlo Model	199
10.2. Faster Monte Carlo Modeling	202
10.3. Alternatives to Sequential Monte Carlo Modeling	203
10.4. Conclusions	205
<b>References</b>	<b>207</b>
