Chichester · New York · Brisbane · Toronto · Singapore

# Contents

<b>Preface</b>	<b>xiii</b>
<b>List of Figures</b>	<b>xvii</b>
<b>List of Tables</b>	<b>xxiii</b>
<b>List of Contributors</b>	<b>xxv</b>
<b>1 Modelling and Controller design of an EGR Solenoid Valve using Neural Networks</b>	
<b>M.A. Arain</b>	<b>1</b>
1.1 Introduction . . . . .	1
1.2 Neural Networks . . . . .	2
1.2.1 Neural Networks in General . . . . .	2
1.2.2 Multi-Layer Networks . . . . .	3
1.2.3 Radial Basis Function (RBF) Network . . . . .	4
1.3 Training of the Neural Networks as Predictor . . . . .	6
1.3.1 Testing of Models . . . . .	7
1.4 Training of a Neuro-Controller . . . . .	9
1.4.1 Testing of Neuro-Controller . . . . .	10
1.4.2 Analysis of Controller Outputs . . . . .	13
1.5 Conclusion on Modelling . . . . .	14
1.5.1 Significant Points Observed . . . . .	15
1.6 Conclusion on Neurocontroller . . . . .	15
1.6.1 Significant Features Observed for Neurocontroller . . . . .	15
1.7 Future Work . . . . .	16
References . . . . .	16

<b>2</b>	<b>Neural Networks as Decoders in Error-Correcting Systems for Digital Data Transmission</b>	
	<b>J. Serra-Sagristà</b>	<b>19</b>
2.1	Introduction . . . . .	19
2.2	Digital Transmission . . . . .	21
2.2.1	Coding . . . . .	21
2.2.2	Channel . . . . .	21
2.2.3	Decoding . . . . .	21
2.3	Neural Networks as Decoders . . . . .	22
2.4	Neural Network Model . . . . .	22
2.4.1	Training Phase . . . . .	25
2.5	Simulation Results . . . . .	27
2.6	Conclusion . . . . .	31
	References . . . . .	32
<b>3</b>	<b>Estimating Helicopter Strain Using a Neural Network Approach</b>	
	<b>A.D. Vella et al.</b>	<b>35</b>
3.1	Introduction . . . . .	35
3.2	Fatigue . . . . .	36
3.3	Problem Definition from the ANN Point of View . . . . .	38
3.4	Problems . . . . .	40
3.4.1	Dealing with Large Training Sets . . . . .	40
3.4.2	Ill Conditioning . . . . .	40
3.4.3	Transient Behaviour . . . . .	40
3.4.4	Scale . . . . .	40
3.4.5	Evaluation . . . . .	41
3.5	Strategies Evolved . . . . .	41
3.5.1	Introduction . . . . .	41
3.5.2	Smoothing . . . . .	42
3.5.3	Selecting Points by Mixing . . . . .	43
3.5.4	Timing . . . . .	43
3.5.5	Model Refinement . . . . .	44
3.5.6	Visualization . . . . .	45
3.6	Results . . . . .	45
3.7	Further Work . . . . .	47
3.7.1	Better Correlation Coefficients . . . . .	47
3.7.2	Better Measures of Success . . . . .	47
3.7.3	Transferability to Other Applications . . . . .	47
3.7.4	Genetic Algorithms . . . . .	49
3.8	Conclusion . . . . .	49
	References . . . . .	49

<b>4 Neural Networks for Texture Classification</b>	
<b>J.F. Boyce and J.F. Haddon</b>	<b>51</b>
4.1 Introduction . . . . .	51
4.1.1 Texture Information . . . . .	51
4.1.2 Characterizing a Texture . . . . .	51
4.2 Classification . . . . .	52
4.3 Scene Analysis . . . . .	52
4.3.1 Problem Definition . . . . .	52
4.3.2 Mutual Information . . . . .	53
4.4 Co-occurrence Matrices . . . . .	55
4.4.1 Definition . . . . .	55
4.4.2 Temporal Consistency . . . . .	57
4.4.3 Labelling Segmented Images . . . . .	57
4.4.4 Hermite Functions on a Lattice . . . . .	57
4.4.5 Decomposition of Co-occurrence Matrices . . . . .	59
4.4.6 Texture Description using Lattice Hermite Functions . .	60
4.5 Texture Classification using Neural Networks . . . . .	62
4.5.1 Feature Selection . . . . .	62
4.5.2 Multilayer Perceptron Neural Networks . . . . .	62
4.5.3 Application of the Neural Network . . . . .	63
4.6 Conclusions . . . . .	64
References . . . . .	64
<b>5 Modelling psychiatric decisions with linear regression and neural networks</b>	
<b>W. Penny and D.P. Frost</b>	<b>67</b>
5.1 Introduction . . . . .	67
5.2 A Hierarchy of Networks . . . . .	69
5.3 Selection of Input Variables . . . . .	72
5.4 Linear Regression . . . . .	75
5.5 Neural Networks . . . . .	79
5.6 Conclusions . . . . .	79
References . . . . .	79
<b>6 Visualizing Nuclear Magnetic Resonance Spectra with Self-Organizing Neural Networks</b>	
<b>A. Koski, et al.</b>	<b>83</b>
6.1 Introduction . . . . .	83
6.1.1 Nuclear Magnetic Resonance Spectroscopy . . . . .	84
6.2 Material . . . . .	84
6.2.1 Basics of Hyperornithinemia with Gyrate Atrophy . . .	84
6.3 Methods . . . . .	87
6.3.1 Feature Extraction from the Spectra . . . . .	87
6.3.2 Self-organizing Neural Network . . . . .	87

6.3.3	Clustering Properties of the Self-organizing Map . . . . .	89
6.4	Results . . . . .	89
6.5	Discussion . . . . .	91
	References . . . . .	92
<b>7</b>	<b>Comparative Study of Two Self Organizing and Structurally Adaptive Dynamic Neural Tree Networks</b>	
	<b>K. Butchart et al.</b>	<b>93</b>
7.1	Introduction . . . . .	93
7.2	Clustering and Competitive Learning Neural Networks . . . . .	94
7.3	Dynamic Neural Tree Networks . . . . .	95
7.3.1	Network Structure and Operation . . . . .	95
7.3.2	The Production of the Tree Structure . . . . .	96
7.3.3	Advantages of Dynamic Neural Tree Networks . . . . .	97
7.4	The Networks . . . . .	98
7.4.1	Li et al. Network . . . . .	98
7.4.2	Racz and Klotz . . . . .	99
7.5	The Tests . . . . .	100
7.6	Network Performance . . . . .	101
7.6.1	The Squares Data . . . . .	101
7.6.2	Single Source Gaussian Data . . . . .	102
7.6.3	Gaussian Clusters with Noisy Inputs . . . . .	105
7.6.4	Highly Structured Data . . . . .	107
7.7	Comparison of Performance with Fixed Size CLNNs . . . . .	108
7.7.1	Single Source Gaussian Data . . . . .	108
7.7.2	Gaussian Clusters . . . . .	109
7.8	Non-Stationary Data . . . . .	109
7.9	Conclusions . . . . .	110
	References . . . . .	112
<b>8</b>	<b>A Clustering Algorithm to Produce Context Rich Networks</b>	
	<b>N. Allott et al.</b>	<b>113</b>
8.1	Introduction . . . . .	113
8.2	Algorithm . . . . .	114
8.3	Saliency . . . . .	115
8.4	Modifying the Network . . . . .	116
8.5	Formal Specification of Data Structure and Heuristics . . . . .	117
8.6	Application of Produced Trees . . . . .	119
8.7	Further Work . . . . .	119
	References . . . . .	120

<b>9 Robust Financial Modelling by Combining Neural Network Estimators of Mean and Median</b>	
<b>A.N. Burgess</b>	<b>121</b>
9.1 Introduction . . . . .	121
9.2 Learning Conditional Expectations . . . . .	122
9.3 Median and Quantile Learning . . . . .	123
9.4 Implications . . . . .	126
9.5 Using Combined Estimator for Trading the FTSE100 . . . . .	128
9.5.1 Results for Model Trained Using MSE . . . . .	128
9.5.2 Results for Model Trained Using MAD . . . . .	128
9.5.3 Results for Combined Model . . . . .	129
9.6 Conclusion . . . . .	130
References . . . . .	131
<b>10 ISTRIA: An On-Line Neural Network System for the Analysis of Financial Markets</b>	
<b>S. Di Pasquale et al.</b>	<b>133</b>
10.1 Introduction . . . . .	133
10.2 Laboratory Phase . . . . .	133
10.3 Executive Phase (Phase 1) . . . . .	134
10.4 Introduction of the Genetic Algorithms (Phase 2) . . . . .	138
10.5 Conclusion . . . . .	140
References . . . . .	142
<b>11 Prediction of the S&amp;P 500 Index with Neural Networks</b>	
<b>J. Angstenberger</b>	<b>143</b>
11.1 Introduction: The Problem of Forecasting Stock Prices . . . . .	143
11.2 DataEngine: A Software Package for Intelligent Data Analysis . . . . .	144
11.3 Data Material and Objective . . . . .	145
11.4 Data Pre-processing . . . . .	146
11.5 Neural Networks for Forecasting . . . . .	146
11.6 Validation of Results . . . . .	148
11.7 Conclusion . . . . .	151
11.8 Application to Similar Problems . . . . .	151
References . . . . .	152
<b>12 Neural Network Based Models for Forecasting</b>	
<b>X. Ding et al.</b>	<b>153</b>
12.1 Introduction . . . . .	153
12.2 Water Demand . . . . .	155
12.3 Energy Demand . . . . .	156
12.4 Highway Traffic . . . . .	157
12.5 Urban Storm Water Pollution Forecasting . . . . .	159
12.6 Rainfall Forecasting Using Radar Images . . . . .	160

12.6.1	Rain Cell Tracking . . . . .	160
12.6.2	Rain Field Modelling . . . . .	161
12.7	Towards a Methodology for the Development . . . . .	162
12.8	Conclusion . . . . .	165
	References . . . . .	166
<b>13</b>	<b>GA to Train NNs Using Sharing and Pruning: Global GA Search Combined with Local BP Search</b>	
	<b>M. Schmidt and T. Stidsen</b>	<b>169</b>
13.1	Introduction . . . . .	169
13.2	Why Sharing and Pruning? . . . . .	170
13.3	Why and How Use a GA to Train a NN? . . . . .	170
13.3.1	Why a GA? . . . . .	170
13.3.2	Coding of the NN . . . . .	171
13.3.3	Description of the GA Used . . . . .	172
13.4	Fitness Functions . . . . .	173
13.5	BP-afterburner . . . . .	175
13.6	Lamarckian Learning . . . . .	175
13.7	Description of Problems . . . . .	176
13.7.1	The Left-Right-Shift Problem . . . . .	176
13.7.2	The Monks3 Problem . . . . .	176
13.7.3	Proben1 Problems . . . . .	176
13.8	Detailed Analysis . . . . .	177
13.9	Comments on our Results . . . . .	184
13.10	Comparing our Results with other NN Techniques . . . . .	184
13.11	Overall Conclusion . . . . .	188
	References . . . . .	190
<b>14</b>	<b>Evolutionary Neurocontrol of Chaos and the Attitude Control Problem</b>	
	<b>D.C. Dracopoulos</b>	<b>193</b>
14.1	Introduction . . . . .	193
14.2	The Euler Equations . . . . .	194
14.3	The Adaptive Control Architecture . . . . .	195
14.4	Spin Stabilization of a Satellite from a Random Initial Position	199
14.5	Satellite Attitude Control Subject . . . . .	200
14.6	Conclusions . . . . .	201
	References . . . . .	202
<b>15</b>	<b>An Object-Oriented Framework for NN-ES Hybrid Systems</b>	
	<b>A.I. Vermesan and O. Vermesan</b>	<b>205</b>
15.1	Introduction . . . . .	205
15.2	Hybrid framework for design . . . . .	207
15.2.1	Physical Integration . . . . .	209

15.3 An Object Oriented Neural Expert System . . . . .	210
15.4 Hybrid Framework for Specification . . . . .	214
15.5 Dealing with Incomplete Knowledge . . . . .	222
15.6 Discussion . . . . .	225
References . . . . .	226
<b>16 Using Correlation Matrix Memories for Inferencing in Expert Systems</b>	
<b>J. Austin and R. Filer</b>	<b>229</b>
16.1 Introduction . . . . .	229
16.2 Correlation Matrix Memory . . . . .	230
16.3 CMM Inference Engine . . . . .	232
16.3.1 Lexical Token Converter . . . . .	232
16.3.2 Binding Variable and Value Tokens . . . . .	232
16.3.3 Superimposing Inputs . . . . .	234
16.3.4 Identifying CMM Units of Appropriate Arity . . . . .	234
16.3.5 Occurrence Checking . . . . .	234
16.3.6 Providing Separator Tokens (Training) . . . . .	234
16.3.7 Thresholding (Retrieval) . . . . .	235
16.3.8 Decoding the Output . . . . .	235
16.4 System Characteristics . . . . .	236
16.4.1 Storage . . . . .	236
16.4.2 Partial Matching Capability . . . . .	237
16.4.3 Implementing a Predicate Calculus . . . . .	241
16.5 Conclusions . . . . .	242
References . . . . .	243
