**New Theory of real numbers especially
regarding "infinite" and "zero"**

Verlag Dr. Kovač

Contents

Introduction	1
Notes for introduction	6
I.A. New idea of real number	9
1. New foundation of real number	9
1.1 Definition of "infinite", "finite" (separated again into "normal" and "zero") real number	9
Notes for 1.1	13
1.2 Extending "zero finite" and "infinite" ordinal real number of higher order in δ -system	17
Notes for 1.2	22
2. Construction of a set of "normal finite ordinal real numbers" of δ-system	25
2.1 General principle	26
Notes for 2.1	28
2.2 Real number on ultrafilter (D) basis	31
Notes for 2.2	38
2.3 Real number on power set (\wp) basis	41
Notes for 2.3	49
3. Practical determination of a set of ordinal real numbers of δ-system with examples	53
3.1 Determination of D_i , the subset of D	53
1) Schematic process	53
2) Mathematical rules for construction of real numbers in δ -system	55
3) Summarizing these mathematical rules	62
4) Applying schematic process to find D_i with example	64

Notes for 3.1	72
3.2 Examples for set of "normal positive finite ordinary real numbers" of δ -system	75
1) Example for $\delta = 1$ to find $r_i \delta \in \mu(D)\delta$	75
2) Example for $\delta = 2$ to find $r_i \delta \in \mu(D)\delta$	77
3) Example for $\delta = 3$ to find $r_i \delta \in \mu(D)\delta$	83
3.3 Examples for the set of "infinite positive" and "zero positive finite" ordinal real numbers of δ -system in first order "	89
3.3.1 $(r_{\varpi_i})\delta \in \varpi\mu(D)\delta$ for $\delta = 1, 2$ and 3	89
1) Example for $\delta = 1$ to find $(r_{\varpi_i})\delta \in \varpi\mu(D)\delta$	89
2) Example for $\delta = 2$ to find $(r_{\varpi_i})\delta \in \varpi\mu(D)\delta$	89
3) Example for $\delta = 3$ to find $(r_{\varpi_i})\delta \in \varpi\mu(D)\delta$	90
3.3.2 $(r_{\theta_i})\delta \in \theta\mu(D)\delta$ for $\delta = 1, 2$ and 3	90
1) Example for $\delta = 1$ to find $(r_{\theta_i})\delta \in \theta\mu(D)\delta$	90
2) Example for $\delta = 2$ to find $(r_{\theta_i})\delta \in \theta\mu(D)\delta$	91
3) Example for $\delta = 3$ to find $(r_{\theta_i})\delta \in \theta\mu(D)\delta$	91
3.3.3 Some important arithmetical operations "+, -, \times and \div " which are different from today's mathematics	92
3.4 The relations between examples for different δ -system and the generalization	97
Appendix	103
I. Arguments about "real numbers" in contemporary mathematics	103
II. Arguments about the term "infinite" i.e. " ∞ "	104
III. The term "zero" i.e. " 0 " which is either without the same sense as the usual real numbers or undecidable	108
<u>New notation and terminology</u> (NNT) as well as abbreviation	111
