Table of contents

Executive summary	7
A personal note	10
Introduction	11
I. Description of the project and participants	12
I 1. TULIP origins	12
I 2. TULIP objectives	12
I 3. TULIP chronology	13
I 4. Profile of participants	15
I 4.1. Elsevier Science	15
I 4.2. Universities	15
II. Technical aspects	20
II 1. Production at Elsevier Science	20
II 1.1. Description of paper journal production	20
II 1.2. Description of production of electronic version	22
II 1.3. Description of customizing and Internet distribution	24
II 1.4. Lessons learned concerning production	26
II 1.5. Lessons learned about customizing and Internet distribution	29
II 2. Technical implementation at the universities	30
II 2.1. Organization of IT/Information services	30
II 2.2. TULIP systems development	30
II 2.3. TULIP functionality	31
II 2.4. Client systems	32
II 2.5. Server systems	34
II 2.6. Network delivery to end users	36
II 3. Conclusions and recommendations	37
III. Promotion	38
III 1. Overview of promotional activities undertaken	38
III 1.1. By Elsevier Science	38
III 1.2. By the TULIP universities	38
III 2. Conclusions and recommendations	38
IV. User behavior	40
IV 1. Goal of the research	40
IV 2. Quantitative Research	40
IV 2.1. Research methods used	40
IV 2.2. Results of the logfile-analysis per TULIP-site	43
IV 2.3. Overall results and comparison of sites	68
IV 2.4. Results of the Resolving Studies	69
IV 3. Qualitative Research	69
IV 3.1. Research methods used	69
IV 3.2. Major findings	70
IV 4. Conclusions	72

V.	Organizational and economic issues	74
V 1.	Critical success factors for the implementation of TULIP.....	74
V 1.1.	Organization and project management.....	74
V 1.2.	Comprehend end users' possibilities and needs.....	74
V 1.3.	Resources and infrastructure.....	75
V 1.4.	Introduction, promotion and training.....	76
V 2.	Economic issues.....	76
V 2.1.	Cost.....	77
V 2.2.	Economic models examined.....	78

VI.	Implications of the TULIP project for the future of the development of digital libraries	81
VI 1.	Changing environment as viewed by participating universities.....	81
VI 2.	Future roles of the players in the field as viewed by participating universities.....	82
VI 2.1.	The library.....	82
VI 2.2.	The 'physical' library.....	82
VI 2.3.	The librarians.....	83
VI 2.4.	The publisher.....	83
VI 3.	The transition to digital libraries.....	83
VI 4.	Views on the library of the remote future.....	84
VI 5.	Implications of the TULIP project for Elsevier Science.....	84

Appendices

Appendix I:	Carnegie Mellon University.....	87
Appendix II:	Cornell University.....	181
Appendix III:	Georgia Institute of Technology (Georgia Tech).....	191
Appendix IV:	Massachusetts Institute of Technology (MIT).....	199
Appendix V:	The University of California.....	215
Appendix VI:	The University of Michigan.....	231
Appendix VII:	The University of Tennessee.....	247
Appendix VIII:	The University of Washington.....	323
Appendix IX:	Virginia Polytechnic Institute and State University (Virginia Tech).....	327
Appendix X:	Checklist of aspects to be considered for the implementation of a 'digital library'.....	337
X 1.	Lower cost solution.....	339
X 2.	Higher investment solution.....	341
Appendix XI:	Internet delivery problems.....	345
Appendix XII:	Gray scaling and anti-aliasing.....	349
Appendix XIII:	Interview Guide.....	353
Appendix XIV:	Detailed findings of the qualitative research.....	363
