# Table of Contents

## Section 1 Introduction and Scope

### Chapter 1

Introduction to Wetlands for Treatment .....	3
Why Wetlands?.....	3
Historical Perspective.....	5
Organization and Scope of This Book .....	13
Key References Concerning Treatment Wetlands.....	16

### Chapter 2

Review of Water Quality Treatment Needs .....	19
Sources of Pollutants.....	20
Conventional Treatment Technologies.....	23

### Chapter 3

Natural Systems For Treatment .....	31
Upland Natural Treatment Systems .....	33
Onsite Infiltration .....	35
Slow-Rate Land Application.....	37
High-Rate Land Application (Rapid Infiltration).....	39
Overland Flow Systems .....	40
Aquatic and Wetland Systems .....	40
Facultative Ponds .....	41
Floating Aquatic Plant Systems.....	42
Wetland Systems .....	43

## Section 2 Wetland Structure and Function

### Chapter 4

Landform and Occurrence .....	49
What is a Wetland? .....	49
Distribution of Natural Wetlands.....	53
Constructed Wetlands.....	55
Habitat Wetlands .....	56
Constructed Treatment Wetlands .....	58
Flood Control Wetlands .....	60
Constructed Aquaculture Wetlands.....	60

### Chapter 5

Wetland Soils.....	63
What Are Wetland Soils?.....	63
Accumulation Rates of Wetland Soils.....	65
Physical Properties of Hydric Soils.....	67
Hydric Soil Chemical Properties .....	69
Cation Exchange Capacity .....	69
Oxidation and Reduction Reactions .....	70
Hydrogen Ion (pH).....	73
Phosphorus Dynamics.....	74

Biological Influences on Hydric Soils.....	75
Microbial Soil Processes.....	75
Wetland Algae and Macrophytes.....	76
Effects of Animals on Wetland Soils.....	77
Treatment Wetland Soils.....	78
Surface-Flow Wetlands.....	78
Subsurface-Flow Wetlands.....	79

### Chapter 6

Wetland Hydrology and Water Quality.....	81
Wetland Hydrology.....	81
Definition of Hydrologic Terms.....	82
Global Water Mass Balances.....	87
Water Mass Balance Impacts on Pollutant Reductions.....	98
Wetland Water Quality.....	99
Ambient Concentrations in Natural Wetlands.....	102
Particulate and Dissolved Forms.....	105
Temporal Patterns.....	105
Spatial Patterns.....	107
Variability in Measurements.....	108
Biogeochemical Cycling.....	109
Global Chemical Budgets.....	111
Chemical Terminology.....	116

### Chapter 7

Wetland Microbial and Plant Communities.....	119
Wetland Bacteria and Fungi.....	120
Wetland Algae.....	126
Wetland Macrophytes.....	131

### Chapter 8

Wetland Wildlife.....	157
Invertebrates.....	158
Fish.....	165
Amphibians and Reptiles.....	168
Birds.....	171
Mammals.....	176

## Section 3 The Effects of Wetlands on Water Quality

### Chapter 9

Hydraulic and Chemical Design Tools.....	181
Wetland Evapotranspiration.....	181
Surface-Flow Wetlands.....	182
Predictive Tools.....	184
Pan Factor Methods.....	184
Energy Balance Methods.....	185
Heat Transfer and Water Convective Mass Transfer.....	188
Forested Wetlands.....	192
Subsurface-Flow Wetlands.....	192

Overland Flow in Wetlands .....	194
The Conservation Laws .....	194
Friction Equations .....	196
Friction Equation Coefficients .....	199
Manning's Coefficients .....	199
The Power Law Model .....	201
Head Loss Calculations.....	203
The Effects of Rain and ET.....	206
Subsurface Wetland Hydraulics .....	207
The Geohydrological Background.....	208
Adaptations for SSF Wetlands.....	209
Bed Friction and Hydraulic Conductivity .....	209
Correlations for Hydraulic Conductivity.....	211
Measurement of Hydraulic Conductivity .....	213
Soil-Based Systems.....	215
Clogging .....	215
Surface Water Elevation Profiles.....	218
The Simplest Case.....	219
Rapid Assessment of Profiles .....	220
Flooded Operation.....	220
Dynamic Responses: Rain and ET .....	222
Shadow Zones .....	223
Vertical Shadow Zones.....	223
Corner Zones .....	224
Hydraulic Design of SSF Wetlands.....	225
Large Bottom Slopes, Outlet Level Adjustment.....	225
Robust Design Procedure.....	227
Design Criteria .....	229
Bed Slope .....	229
Loading.....	229
A Hydraulic Design Example.....	234
Nonideal Flow Patterns.....	236
Gross Areal Efficiency.....	236
Vertical and Transverse Mixing.....	238
The Theoretical Background.....	240
Chemical Reaction Calculations .....	243
Models for Wetland Mixing with Reaction.....	245
Data Analysis, The RTD, Design and This Book—IMPORTANT!.....	247
The Tanks-in-Series Model (TIS).....	248
Chemical Reactions in TIS .....	249
Tanks-in-Series Model with a Delay .....	252
Plug Flow Modified by Dispersion .....	254
Regression of Numerical Model.....	254
Chemical Reactions in PFD.....	255
Chemical Reactions in Partially Mixed Wetlands: An Approximation.....	256
A Mass Balance Design Model.....	258
Rationale.....	258
Compartmental Analysis .....	259
The Water Compartment.....	260
The Static Compartments.....	262
Lumping.....	263

Simplifying Situations.....	265
Simplification for the Stationary State.....	266
Averaging Pulse Driven Systems.....	270
Mass Transfer with Reaction: Biofilm Processes.....	271
Thick Biofilms.....	271
Very Fast Reaction in a Very Thin Film.....	272
Specific Surface Area.....	273
Temperature Dependence.....	275
Velocity Dependence.....	275
The Mass Transfer Step.....	275
Surface-Flow Wetlands.....	275
Subsurface-Flow Wetlands.....	276
Closure.....	277
Wetlands with Water Losses or Gains.....	277
The Plug Flow Case.....	277

### Chapter 10

Temperature, Oxygen, and pH.....	281
Wetland Water Temperatures.....	281
Wetland Temperatures in Spring, Summer, and Fall.....	283
Surface-Flow Wetlands.....	283
The Balance Point Temperature.....	283
Approach to the Balance Point Temperature.....	284
Subsurface-Flow Wetlands.....	287
Empirical Observations.....	287
Wetlands in Winter.....	288
Surface-Flow Wetlands.....	288
Energy Balance Calculations.....	290
Subsurface-Flow Wetlands.....	294
Oxygen Transfer to Wetland Waters.....	296
Biochemical Production of Oxygen.....	297
Oxygen Consumption in the Water.....	299
Physical Oxygen Transfer to Water.....	299
Gravel Bed Mass Transfer.....	301
Plant Oxygen Transfer.....	301
Oxygen Sag Curves in SF Wetlands.....	304
Prediction of Wetland Effluent Dissolved Oxygen.....	308
Wetland Hydrogen Ion Concentrations.....	308
Treatment Wetlands.....	310

### Chapter 11

Suspended Solids.....	315
Solids Measurement.....	315
Particulate Processes in Surface-Flow Wetlands.....	316
Component Processes.....	316
Settling of Particulates.....	316
Resuspension.....	320
Resuspension: The Extreme Case of Planar Sediment Beds.....	322
“Filtration”.....	323
Biological Sediment Generation.....	324
Chemical Precipitation and Dissolution Reactions.....	324

Some Internal Details.....	324
Rate Equations.....	325
Averaging.....	326
Model Verification.....	327
Model Parameters.....	328
Sediment Buildup.....	328
Data Regression.....	329
Percent Removal.....	330
Effects of Temperature and Season.....	331
Particulate Processes in Subsurface-Flow Wetlands.....	333
Regression Equations.....	334
Clogging.....	335
Pond-Wetland Combinations.....	336
Design Examples.....	338

## Chapter 12

Biochemical Oxygen Demand.....	341
Measures of Carbon Content.....	341
BOD, COD, and TOC.....	342
Wetland Water Chemistry of Carbon.....	342
Inorganic Carbon.....	342
Organic Carbon.....	344
Carbon Processing in Wetland Soils.....	345
Overall Input/Output Correlations.....	348
Regression Equations.....	349
Surface-Flow Wetlands.....	349
Subsurface-Flow Wetlands.....	350
Internalization.....	351
Mass Balance Design Model.....	351
Rationale.....	351
Model Equations.....	353
Surface-Flow Wetlands.....	353
Subsurface-Flow Wetlands.....	354
Volumetric vs. Areal Models.....	355
Parameter Values.....	355
BOD Reduction Parameters for SF Wetlands.....	355
BOD <sub>5</sub> Reduction in SSF Wetlands.....	357
BOD <sub>5</sub> Reduction in Soil-Based SSF Wetlands.....	358
First-Order Models Without C*: Irreversible Models.....	360
Ponds.....	363
Floating Aquatic Beds.....	363
Temperature Effects on BOD <sub>5</sub> Reduction.....	363
Surface-Flow Wetlands.....	364
Soil-Based Wetlands.....	365
Subsurface-Flow Wetlands.....	365
Speculation on Contributing Factors.....	365
Short-Term Variations in BOD <sub>5</sub> Concentrations.....	366
Adaptation Trends.....	368
Stochastic Variability.....	369
Impact of Variability on Design.....	369

## Chapter 13

Nitrogen .....	373
Nitrogen Forms and Storages in Wetlands.....	373
Inorganic Nitrogen Compounds .....	373
Ammonia .....	373
Nitrite.....	374
Nitrate .....	374
Gaseous and Atmospheric Forms of Nitrogen.....	375
Organic Nitrogen Compounds .....	375
Amino Acids.....	375
Urea and Uric Acid.....	375
Pyrimidines and Purines.....	376
Total Nitrogen.....	376
Wetland Nitrogen Storages .....	376
Nitrogen Transformations in Wetlands.....	377
Ammonification (Mineralization) .....	380
Nitrification.....	383
Nitrification Reaction Chemistry .....	383
Results from Other Technologies: Monod Kinetics and Environmental Factors .....	385
Environmental Factors Affecting Nitrification in Suspended Growth.....	386
Attached Growth Treatment Systems .....	388
Relation to Treatment Wetlands.....	389
Ponds.....	389
Area-Based, First-Order Ammonia Disappearance Model .....	390
Sequential Ammonium Kinetics .....	392
Solution for the Plug Flow Case .....	396
Data Fits .....	396
Environmental Factors in Operating Wetlands.....	399
Denitrification.....	400
Chemical Reactions .....	400
Results from Other Technologies: Monod Kinetics and Environmental Factors .....	402
Monod Kinetics .....	402
First-Order Models.....	403
Temperature Coefficients from Wetland Data.....	404
Accounting for Nitrate Production .....	407
Nitrogen Fixation .....	407
Nitrogen Assimilation .....	408
Other Nitrogen Fluxes.....	410
Atmospheric Nitrogen Inputs.....	410
Ammonia Volatilization.....	411
Biomass Decomposition.....	413
Burial of Organic Nitrogen.....	414
Ammonia Adsorption .....	414
Total Nitrogen Removal Rates in Wetlands .....	415
North American Treatment Wetlands .....	416
Design Factors Affecting Total Nitrogen Removal.....	417
Area-Based, First-Order $k-C^*$ Model for Total Nitrogen.....	420
Effects of Season and Temperature .....	422
Other Factors that Affect Total Nitrogen Removal.....	426
Design Approaches to Remove Nitrogen.....	427
Regulatory Limits and Stochastic Variability.....	427

Preliminary Estimates of Nitrogen Removal.....	429
Correlative Input/Output Design Approaches .....	431
Some Historical Perspective .....	431
Regressions for Wetland Nitrogen Removal .....	434
Mass Balance Design for Nitrogen Removal.....	436
Total Nitrogen.....	436
Nitrogen Component Transformations—Organic Nitrogen .....	438
Nitrogen Component Transformations—Ammonium Nitrogen.....	438
Nitrogen Component Transformations—Nitrate Nitrogen.....	440

## Chapter 14

Phosphorus.....	443
Process Characterization .....	443
Wetland Water Chemistry of Phosphorus.....	445
Plant Chemistry of Phosphorus .....	447
Biomass: Growth, Death, Decomposition .....	448
Uptake and Storage by Biota.....	449
Physical Processes.....	451
Soil Water Phosphorus Processes .....	451
Storage Potential: Soils .....	451
Sorption Isotherms .....	453
Rates of Movement of Phosphorus in Soils Without Vegetation .....	455
Frontal Movement.....	455
Downward Diffusion.....	456
Phosphorus Releases .....	456
Overall Input-Output Correlations.....	457
Emergent Marshes .....	458
Forested Wetlands .....	459
Subsurface-Flow Wetlands.....	460
Submerged Aquatic Beds.....	461
Internalization.....	461
General Considerations .....	461
Temperature and Seasonal Dependence .....	462
The Mass Balance Model with First-Order Areal Uptake.....	463
Verification of the Simplest Model: Some Examples.....	464
Calibration of the First-Order Model: Intersystem Variability .....	465
Emergent Marshes.....	466
Forested Wetlands .....	467
SSF Wetlands.....	467
Calibration of the First-Order Model: Intrasite Variability.....	467
Temporal Variability.....	468
Variability Due to Ecosystem Structure .....	468
Variability Due to Wetland Configuration.....	469
Some Potentially Important Site-Specific Factors .....	469
Depth Effects .....	470
Mixing Effects.....	470
Landscape Scale .....	470
Plot Scale.....	471
Temperature Effects.....	472
Seasonal Effects.....	473

Adaptation Trends .....	474
More Detailed Models .....	475
Stochastic Effects .....	477
Field Results .....	477
Stochastic-Deterministic Modeling .....	478

## Chapter 15

Other Substances .....	481
Integrative Parameters .....	483
Hardness (Calcium and Magnesium).....	483
Specific Conductance .....	483
Salinity .....	484
Total Dissolved Solids .....	484
Chloride .....	484
Other Macronutrients .....	485
Sodium and Potassium .....	486
Sulfur .....	487
Silicon .....	490
Trace Metals .....	490
Chemistry, Occurrence, and Significance.....	491
Wetland Removal Performance.....	491
Occurrence and Wetland Treatment.....	497
Aluminum .....	497
Arsenic .....	499
Cadmium.....	499
Chromium .....	501
Copper.....	503
Iron.....	505
Lead .....	508
Manganese .....	508
Mercury.....	510
Nickel.....	512
Selenium .....	514
Silver.....	516
Zinc .....	516

## Chapter 16

Organic Compounds .....	521
Wetland Projects .....	521
Petroleum Processing .....	522
Refinery Effluents .....	522
Spills and Washing .....	522
Oil Sand Processing Water .....	523
Produced Water .....	523
Research.....	524
Surfactants .....	524
Food Processing Wastewaters .....	524
Sugar Refining.....	524
Potato Processing .....	525
Milk and Eggs .....	525

Meat Processing .....	525
Dairying .....	525
Leachates .....	526
Pulp and Paper Wastewaters .....	526
Pesticides .....	526
Chlorinated Organics.....	526
Atrazine.....	527
Phenol .....	527
Naphthoic Acid.....	530

**Chapter 17**

Pathogens .....	533
Review of Wastewater Pathogens.....	533
Pathogen Removal Performance.....	535
Indicator Organisms .....	535
Removal Efficiency.....	537
Zero-Background Models.....	540
The k-C* Model.....	541
Removal Efficiency for Viruses.....	542
Variability in Removal .....	543

**Section 4 Wetland Project Planning and Design**

**Chapter 18**

Wastewater Source Characterization.....	547
Municipal Wastewaters .....	548
Industrial Wastewaters.....	548
Landfill Leachates .....	548
Pulp and Paper Wastewater.....	551
Mine Drainage.....	551
Coal Mine Drainage .....	552
Petroleum Refinery Wastewater.....	552
Electroplating Industries.....	553
Textile Production .....	553
Agricultural Wastewaters .....	554
Stormwater Runoff .....	557

**Chapter 19**

Wetland Alternative Analysis .....	561
Brief Description of Wetland Treatment Alternatives .....	561
Constructed Surface-Flow (SF) Wetlands .....	562
Constructed Subsurface-Flow (SSF) Wetlands.....	562
Natural Wetland Treatment Systems.....	563
Summary of Wetland Treatment Alternatives .....	564
Technical Constraints .....	565
Assembly of Design Data .....	565
Site Conditions .....	565
Climate.....	565
Geography.....	567
Soils and Geology .....	569

Groundwater .....	569
Biological Conditions.....	569
Characterization of the Water to be Treated .....	570
Flows.....	570
Quality .....	570
Treatment Goals .....	571
Receiving Water Standards .....	571
Interfacing to Reuse or Further Treatment.....	571
Pretreatment Requirements .....	572
Postwetland Requirements .....	574
General Wetland Sizing.....	574
Rule of Thumb Approaches.....	574
Percentage Removal and Reduction .....	574
Detention Time.....	577
Hydraulic Loading Rate.....	580
Pollutant Loading Rate, Pollutant Uptake Rate .....	580
Percentage of the Contributing Watershed.....	581
Design Storm Detention.....	582
Mass Balance Design Model .....	584
Regulatory Constraints.....	586
Federal Regulations.....	586
Clean Water Act .....	586
National Pollutant Discharge Elimination System (NPDES) .....	587
Construction Activities in Natural Wetlands.....	590
Wetlands Executive Order 11990 .....	591
Floodplain Management Executive Order 11988 .....	591
National Environmental Policy Act.....	592
Endangered Species Act.....	592
State Regulations.....	592
Alabama.....	593
Arizona .....	593
Florida.....	593
Maryland.....	595
Mississippi.....	595
South Carolina.....	595
South Dakota.....	597
Texas.....	597
Treatment Wetland Conceptual Plan.....	597
Site Ranking .....	597
Conceptual Plan.....	598
Alternative Selection .....	599

## Chapter 20

Wetland Design: Surface-Flow Wetlands .....	603
Preliminary Feasibility .....	603
Preliminary Sizing.....	603
Site Characteristics .....	604
Preliminary Economics .....	606
Capital.....	606
Operating and Maintenance (O&M) Cost.....	607

Detailed Conceptual Design.....	607
Nonquantified Design Parameters .....	608
Nondesign Parameters.....	608
Maximum Values vs. Averages.....	608
Final Design and Layout.....	609
Localizing the Design Parameters .....	609
Detailed Area Calculations .....	610
Wetland Performance Variability .....	611
A Reality Check .....	612
Presumed State of Mixing .....	615
Conveyance: Aspect Ratios, Head Loss, and Linear Velocity .....	616
Compartmentalization.....	618
Fitting the Project to the Site.....	620
Earthmoving: Dikes, Berms, and Levees .....	620
Flood Protection .....	623
Hydraulic Profile .....	624
Pumping Requirements .....	625
Control Structures.....	625
Inlets .....	625
Outlets.....	630
Plants and Planting.....	633
Detailed Economics.....	634
Capital Costs.....	634
O&M.....	635
Total Present Worth.....	635

## Chapter 21

Wetland Design: Subsurface-Flow Wetlands.....	641
Preliminary Feasibility .....	641
Preliminary Sizing.....	641
Preliminary Economics .....	642
Capital Costs.....	642
Operating and Maintenance Costs .....	642
Cost Comparison .....	642
Detailed Conceptual Design.....	644
Localizing the Design Parameters .....	644
The Reality Check.....	645
Presumed State of Mixing .....	645
Conveyance: Aspect Ratios and Head Loss.....	648
A Hydraulic Design Example.....	649
Inlet Distribution System .....	651
Basin Configuration .....	651
Bed Media .....	652
Outlet Control System.....	652
Selection of Plants.....	653

## Chapter 22

Natural Wetland Systems .....	657
Site Selection.....	657
Natural Wetland Treatment Area .....	658

Suitable Natural Wetland Types.....	660
Other Potential Constraints .....	662
System Configuration.....	663
Influent Distribution.....	663
Basin Configuration and Alternate Discharge Locations.....	664
Flow Control Structures .....	666

### **Chapter 23**

Ancillary Benefits of Wetland Treatment Systems .....	669
Primary Production and Food Chain Support .....	670
Wildlife Management.....	671
Human Uses .....	672
Design for Ancillary Benefits.....	673
Wetland Siting .....	674
Cell Size and Configuration.....	674
Water Flow and Depth Control.....	675
Vegetation Planting.....	675
Wildlife Stocking.....	676
Inflow Pretreatment.....	676
Human Access.....	676

## **Section 5 Wetland Treatment System Establishment, Operation, and Maintenance**

### **Chapter 24**

Wetland Treatment System Establishment .....	681
Wetland Construction .....	681
Site Preparation .....	681
Wetland Landform and Berms.....	683
Gravel/Sand Media Placement.....	684
Piping and Water Control Structures.....	684
Vegetation Establishment .....	685
Plant Propagules and Sources.....	686
Bare-Root Seedlings.....	686
Seeds.....	686
Field-Harvested Plants .....	688
Potted Seedlings .....	690
Plant Establishment .....	690
Climatic Factors .....	690
Soil Preparation.....	691
Soil Moisture .....	691
Plant Density .....	692
Plant Inspection and Maintenance.....	693
Troubleshooting.....	695
Water Stress (Levels Too Low).....	696
Flood Stress (Levels Too High).....	696
Macronutrient Stress (Nitrogen, Phosphorus, and Potassium) .....	696
Micronutrient Stress .....	697
Dissolved Oxygen Stress (Physical Factors).....	697
Dissolved Oxygen Stress (Chemical Factors).....	697

Rooting Problems .....	697
Pathogens/Herbivory .....	698
Weather/Physical .....	699

### Chapter 25

Treatment Wetland Operation and Maintenance .....	701
Monitoring and Control .....	701
Constituent Loading .....	703
Water Level and Flow Control .....	704
Discharge Site Rotation.....	705
Vegetation Management .....	706
Control of Nuisance Conditions in Treatment Wetlands .....	707
Potential Nuisances to Society.....	707
Mosquitoes and Biting Insects.....	707
Dangerous Reptiles.....	710
Pathogen Transmission.....	710
Odors.....	711
Potential Environmental Problems.....	711
Excess Subsidies.....	711
Environmental Toxins .....	712

## Section 6 Wetland Data Case Histories

### Chapter 26

Wetland Treatment System Inventory .....	717
North American Wetland Treatment Systems .....	718
Wetland Types .....	718
Geographical Distribution .....	718
Wetland System Costs.....	724
Loading Rates.....	727
Wetland Performance .....	727
European Wetland Treatment Systems .....	731
Danish Database .....	735
Great Britain .....	736

### Chapter 27

Treatment Wetland Case Histories.....	739
Surface-Flow Constructed Treatment Wetlands .....	739
Incline Village, Nevada.....	739
Background.....	739
System Description.....	740
Operation and Maintenance .....	740
Performance.....	742
Ancillary Benefits.....	742
Lessons for Wetlands in Arid Regions.....	744
West Jackson County, Mississippi .....	744
Background and System Description.....	744
System Design.....	746
Operation and Performance .....	748
Ammonia Treatment Potential .....	752
System Biology .....	752

Mandan, North Dakota.....	753
Background.....	753
System Description.....	754
Water Quality Performance.....	756
Ancillary Benefits.....	758
The Des Plaines River Wetlands Project.....	758
Introduction and System Description .....	758
Hydrology .....	759
Water Quality.....	760
Vegetation .....	763
Animals.....	763
Awards .....	764
References.....	764
Vermontville, Michigan.....	764
Introduction and System Description .....	764
Permits .....	766
Hydrology .....	766
Water Quality.....	767
Compliance Monitoring .....	767
Research Results.....	768
Vegetation .....	769
Wildlife .....	770
Operation and Maintenance Activities .....	770
Costs .....	770
Subsurface-Flow Constructed Treatment Wetlands.....	771
Richmond, New South Wales, Australia .....	771
General Conditions of Operation.....	771
Hydraulics.....	772
Water Quality.....	775
Biochemical Oxygen Demand .....	775
Total Suspended Solids .....	775
Nitrogen Compounds .....	775
Phosphorus.....	776
Pathogens.....	776
Vegetation .....	776
Benton, Kentucky.....	777
General Conditions of Operation.....	778
Hydraulics.....	779
Water Quality.....	779
Biochemical Oxygen Demand .....	779
Total Suspended Solids .....	779
Nitrogen Compounds .....	779
Phosphorus.....	781
Pathogens.....	781
Mosquitoes.....	781
Vegetation .....	781
Natural Treatment Wetland Case Histories .....	783
Carolina Bays, South Carolina .....	783
Background.....	783
Permitting .....	784
System Description and Operation .....	785

System Performance.....	787
Biological Changes.....	792
Biological Criteria.....	796
Ancillary Benefits.....	796
Awards.....	798
Reedy Creek, Florida.....	798
Background.....	798
System Description.....	800
Permitting.....	801
System Performance.....	801
Biological Conditions.....	806
Houghton Lake, Michigan.....	810
Introduction and Project Description.....	810
History.....	812
Hydrology.....	813
Permits.....	813
Water Quality of the Wetland Interior.....	815
Soils and Sediments.....	817
Vegetation.....	817
Public Use.....	819
Animals.....	819
Awards.....	820
Literature.....	820
<b>Appendix.....</b>	<b>823</b>
<b>Glossary.....</b>	<b>827</b>
<b>References.....</b>	<b>839</b>
<b>Index.....</b>	<b>881</b>
