Introduction xiii

SECTION 1

Introduction and System Considerations **1**

Chapter 1: Introduction to the Internet and Intranet **3**

The Internet and the Community 4

A Brief History of the Internet 6

Introduction to the World Wide Web 7

Intranet: Client and Server Revisited 16

Present and Future Internet Trends 18

Chapter 2: Business Applications on the Web **25**

Why Go Online? 25

So You Want To Make Money Online? 28

Which Applications Belong Online? 28

Examples of Intranet Applications 39

Planning Your Applications on the Web 42

Chapter 3: Internet and Web Security	49
<i>Security Risk Example</i>	50
Security Basics	52
Secure Sockets Layer and Secure HyperText Transport Protocol	58
Firewall	67
SECTION 2	
<i>Application Development</i>	79
<hr/>	
Chapter 4: Integrating Your Applications with the Web	81
HTTP Overview	82
Accessing Existing Applications and Data	87
Guidelines for the User Interface	90
Conclusion	101
Chapter 5: Server-side Programming Techniques	103
Introduction	103
Web Forms Programming	104
Common Gateway Interface	110
Managing Browser Session State	113
When to Update Databases and Files	119
Security	120
Multimedia	121
Conclusion	121
Chapter 6: Client-side Programming Techniques	123
Java	123
JavaScript	134
NetRexx	141
Specialized Non-Java Clients	142
Conclusion	142
Chapter 7: Visual Programming for the Web	145
The Pizza Scenario	148
The Pizza Application	149

Advanced Applications	166
Conclusion	170
Web Connection Parts	170

SECTION 3

Integrating Database Applications on the Web **173**

Chapter 8: Using Net.Data to Access Databases and Files **175**

Dynamic Web Pages	176
Building a Simple Database Application	181
Customizing Reports	191
Postprocessing of Data	203
Accessing Files	212
Accessing non-HTML Data	214
Access Control by the Database	215
Related Work	216
Conclusion	219

Chapter 9: Lotus Internet Applications **221**

Lotus Extensions to the Classic Web Server	223
Extending the Domino Server with Lotus Internet Applications	225
Domino.Action	226
Lotus Internet Publishing	228
Domino.Merchant—Lotus Internet Commerce Solution	233
Lotus Internet Customer Service	235
Customizing the Domino Server for the World Wide Web	236
The Strategic Direction for Lotus Internet Applications	251

SECTION 4

Integrating Transaction Systems with the Internet **253**

Chapter 10: Transaction Processing Systems and the Internet **255**

Transaction Processing Background	255
What Is a Transaction?	257

More on Transactions and Units of Recovery	258
What Is Conversational Programming?	261
Transaction Processing Facilities	263
Evolution of Transaction Processing Systems	264
Evolution of Web Server Environments	265
Web Server and Transaction Processing Differences	266
Transaction Processing and the Web	269
Conclusion	271

Chapter 11: Accessing CICS Applications from the Internet **273**

CICS Overview	273
CICS Internet Gateway	277
The MVS/ESA Web Server CGI Sample Program for CICS	291
Using the Lotus Domino Server to Access CICS	293
The CICS Gateway for Java	294
The CICS Web Interface	301
Choosing among the Access Methods	314
CICS Web Interface Application in 370 Assembler	315
CICS Web Interface Sample Converter in C	321

Chapter 12: Accessing Encina, IMS TM, and MQSeries Applications from the Internet **331**

Encina Overview	332
Accessing Encina Applications from the Web	336
IMS Overview	339
Accessing IMS Applications from the Web	341
MQSeries Overview	343
Accessing MQSeries Applications from the Web	347
Conclusion	354

Chapter 13: Electronic Commerce on the Internet **355**

Introduction	355
The Internet Is Worldwide: Implications	357
The Secure Electronic Transaction (SET) Protocol	359
Protecting Copyright Information on the Internet	360

Transaction Processing and Its Role in Electronic Commerce	361
Conclusion	366

SECTION 5

A Case Study

367

Chapter 14: An Application Server

369

Web Server Application Programming Interfaces	370
Web Application Platforms	371
Designing a Web Application Server	372
Extending the Application Server	378
Maintaining State in a Web Application Server	378
Embedding Content from Another Website	384
Connecting to Databases (Relational and Nonrelational)	391
Building Directed HTML	391
Designing a Director/Daemon Application Server	392
Conclusion	395
