

THE ICE-AGE HISTORY OF
NATIONAL PARKS IN THE
ROCKY
MOUNTAINS

Scott A. Elias

Smithsonian Institution Press

Washington and London

CONTENTS

Acknowledgments xi

PART ONE. PALEOECOLOGY: WHY WE NEED TO
STUDY PAST ECOSYSTEMS 1

Chapter 1. Quaternary Fossils 9
What Are They and Where Are They Found?

Vertebrate Fossils 10

Fossils from Plants: Pollen and Macrofossils 11

Insect Fossils 16

Diatoms, Ostracodes, and Others 17

Chapter 2. The Repositories of Ecological History 20
Where Are Ice-Age Fossils Found?

Types of Sediments Containing Fossils 21

Peat Bogs 24

Cave Deposits 24

Taphonomy: How Fossils Become Preserved	26
Destruction of Fossil Resources	27
Chapter 3. Dating Past Events	29
Types of Dating Methods	31
Chapter 4. Putting It All Together	41
Reconstructing Physical Environments	43
Reconstructing Climate Change	45
Reconstructing Ecosystems	48
Archaeology: How People Fit into the Picture	50
PART TWO. ANCIENT LIFE AND ENVIRONMENTS OF THE NATIONAL PARKS OF THE ROCKY MOUNTAINS	53
Chapter 5. Glacier National Park	58
Northern Forests and Rivers of Ice	
Glacial History: The Shaping of the Landscape	62
After the Ice Age: The Return of Tall Trees and Alpine Meadows	69
Glacial Advances during the “Little Ice Age”	74
Modern Ecosystems of the Park	77
The Park’s Human History	78
Glacial Features Easily Viewed in the Park	80
Chapter 6. Yellowstone National Park	84
A Land of Fire, Ice, and Water	
Modern Setting	85
Origins of the Geothermal Wonders	87
Glacial History	89
Late Pleistocene Vegetation History: The Forest-Tundra Two-Step	99
Late Pleistocene Mammals of the Yellowstone Region	104
Holocene Ecosystems	106
Early Peoples of Yellowstone	108
Chapter 7. Grand Teton National Park	115
A Landscape Sculpted by Ice	
Modern Setting	117
Glacial History	118

Glacial Features Easily Viewed in the Park	125
After the Ice Melted: The Return of Life	129
Holocene Ecosystems	133
Early Peoples of the Teton Region	134
Chapter 8. Rocky Mountain National Park	136
Life in the Rarified Air	
Modern Setting	139
Late Pleistocene Glaciations	141
Glacial Features Easily Viewed in the Park	145
Shifting Life Zones in the Late Pleistocene	151
Ice-Age Hunters of the Central Rockies and Their Prey	152
Holocene Environments: Islands of Tundra in Seas of Forest	153
Chapter 9. Conclusion	157
What Can We Learn from the Past?	157
The Fragility of the Parks' Modern Ecosystems	158
Where Do We Go from Here?	158
Glossary	161
Index	165
