IABEM Symposium on

Boundary Integral Methods for Nonlinear Problems

Proceedings of the IABEM Symposium
held in Pontignano, Italy,
May 28–June 3 1995

Edited by

LUIGI MORINO
University of Rome III,
Rome, Italy

and

WOLFGANG L. WENDLAND
University of Stuttgart,
Stuttgart, Germany

KLUWER ACADEMIC PUBLISHERS
DORDRECHT / BOSTON / LONDON

Table of Contents

Bassanini, P., Casciola, C.M., Lancia, M.R., Piva, R.
On the Removal of the Trailing–edge Singularity in 3D Flows 1

Beer, G.
Modelling of Discontinua with the Boundary Element Method 7

Beskos, D.E.
Boundary Element Transient Analysis of Inelastic Plate Structures 15

Bialecki, R.A.
Coupled Conductive Convective and Radiative Heat Transfer 23

Cialdea, A.
Singular Integral Equations and Differential Forms 29

Corradi, S., Marchetti, M., Stefanelli, M.
A Variable Stiffness Plasticity Boundary Element Formulation for Nonlinear Orthotropic Fracture Mechanics 35

Costabel, M., Dauge, M.
Solvability of a System of Integral Equations for Clamped Plates 41

Eck, C., Wendland, W.L.
A Boundary Integral Formulation of Contact Problems with Friction 47

Fotiu, P.A., Heuer, R., Ziegler, F.
A Micromechanical Study of Grain Boundary Sliding by Boundary Elements 57

Funken, S.A., Stephan, E.P.
Fast Solvers for Nonlinear FEM–BEM Equations 63

Galanov, B.A.
Nonlinear Boundary Integral Equations of Contact Mechanics and Some of Their Engineering Applications 69

Gatica, G.N., Wendland, W.L.
On the Coupling of Mixed Finite Element and Boundary Integral Methods for a Nonlinear Elasticity Problem 75

Gaul, L., Fiedler, C.
Viscoelastic Solids Treated by Hybrid Boundary Element Method 81

Guiggiani, M.
Sensitivity of Approximate BEM Solutions 89

Haubrok, D., Steinfeld, B., Antes H.
Dynamic Contact of Elastic Bodies with Equality and Inequality BEM 95

Holl, H.J., Irschik, H.
A Boundary Element Formulation for the Time–Integration of Nonlinear Dynamic Systems 101

Hriberšek, M., Škerget, L.
Krylov Subspace and Domain Decomposition Methods in 2D Viscous Flow by Boundary–Domain Integral Method 107

Hsiao, G.C.
Nonlinear Problems Via Boundary Element Methods 115

Kobayashi, S., Nishimura, N., Fujii, M.
Exact Boundary Control of a Vibrating Plate by BEM 121

Kreienmeyer, M., Stein, E.
Parallel Algorithms for Coupled BEM–FEM with Elastoplastic Deformations in the FE–Domain 127

Kress, R.
Integral Equation Methods in Inverse Obstacle Scattering 133

Kuhn, G.
A Total–Lagrangian FBEM–Approach for Hyper–Elasticity and Plasticity at Finite Strains 139

Maz'ya, V.G.
Boundary Integral Equations on a Contour with Peaks (closing lecture) 145

McLean, W., Prössdorf, S.
Boundary Element Collocation Methods with Reduced Inter–Element Smoothness 155

Morino, L., Salvatore, F., Gennaretti, M.
A Velocity Decomposition for Viscous Flows: Lighthill Equivalent–Source Method Revisited 161

Nadim, A.
Boundary Integral Simulation of Nonlinear Oscillations of Gas Bubbles 167

Nappi, A.
An Internal Variable Approach Applied to Boundary Element Nonlinear Structural Analysis 173

Polizzotto, C.
Symmetric BEM Formulations for Elastic–Damage Material Models 179

Šarler, B.
Solid–Liquid Phase Change in Porous Media: Solution by Boundary Integral Method 185

Shaposhnikova, T.
On the Boundedness of Singular Operators in the Sobolev Space 191

Stone, H.A., Manga, M.
Integral Equation Methods for Viscous Flow Free–Boundary Problems: an Overview with Applications 197

Tanaka, M., Matsumoto, T., Zheng, Z.
Incremental Approach to the Finite Deflection Problem of Thin Elastic Plates Via Boundary–Domain Element Method 203

Tosaka, N.
Boundary Element Approach to Nonlinear Problems in Continuum Mechanics 209

Yao, Z., Zhang, M.
Boundary Element Method for Elastoplastic Analysis of Bimaterial, Including Interface Crack 215

Zandbergen, P.J.
10 Years of Investigations in Nonlinear Waves 221
