5	Investigation of Babylonian observations of solar eclipses	128
5.1	The total solar colines of PC 126 Apr 15	120
5.2	Timed observations of solar eclipses	127
5.5 5 A	Estimates of solar eclipse magnitude	131
5.5	Solar eclipses occurring pear suprise or supset	1/1
5.5	A possible allusion to a total solar eclipse in the Babylonian	141
5.0	Religious Chronicle	143
5.7	Conclusion	146
6	Timed Babylonian lunar eclipses	147
6.1	Introduction	147
6.2	Lunar eclipses for which only a single contact measurement	1 7 1
(	relative to sunrise or sunset is preserved	151
6.2.1	Measurements expressed to the nearest degree	151
6.2.2	Other less accurate measurements (to the nearest 5 or 10	1(2
62	Gegrees)	102
0.3	Eclipses for which two contact measurements relative to	167
61	Three or four timings relative to suprise or supset preserved	107
0.4	(total eclipses only)	173
65	Eclipse maxima timed relative to suprise or supset (partial	175
0.0	eclipses only)	178
6.6	First contacts timed relative to culmination of stars	184
6.7	Conclusion	190
7	Untimed Babylonian observations of lunar eclipses:	
	horizon phenomena	193
7.1	Introduction	193
7.2	Moon rising or setting eclipsed	194
7.3	Estimates of the proportion of the Moon obscured at its	
	rising or setting	208
7.4	Conclusion	211
8	Chinese and other East Asian observations of large	
	solar eclipses	213
8.1	Introduction	213
8.2	Records of solar eclipses from the Shang dynasty	215
8.3	The Chou dynasty and Warring States period	
	(c. 1050–221 BC)	219
8.4	The Ch'in and Han dynasties (221 BC to AD 220)	228
8.5	From the San-kuo to the Sui dynasty (AD 220–617)	238
8.6	The T'ang dynasty and Wu-tai period (AD 617–960)	245
8.7	The Sung, Kin and Yuan dynasties (AD 960–1368)	250
