

Our Geologic Environment

Harvey Blatt

*Hebrew University of Jerusalem
(formerly of University of Oklahoma)*

Prentice Hall
Upper Saddle River, New Jersey 07458

Contents

Preface xii

Chapter 1

The Environmental Problems We Face 1

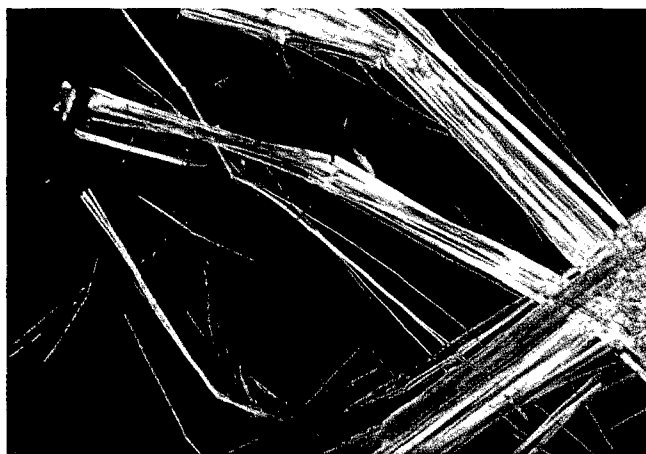

- Geology Versus People:
Who Runs the Show? 2
- Earth, Air, Water, and Us 4
- How Interested Are We
in Environmental Problems? 6
 - American Concern for the Environment 8
- Your Role in Our Environment 8
- How Much Time Before We Fill the Bottle? 9
- Environmental Problems We Will Examine 9
- Summary 10
- Key Terms and Concepts 11
- Stop and Think! 11
- References and Suggested Readings 11

Chapter 2

Minerals and Rocks 13

- Elements and Atoms 15
 - Isotopes 16
 - The Importance of Electrons 16
- Chemical Bonds Hold It All Together 18
- Elements in Earth's Surface Rocks 19
- Minerals 20
- Important Minerals 21
- Identification of Minerals 24
- Rocks 26
 - Igneous Rocks 26
 - Sedimentary Rocks 28
 - Sandstone 29
 - Shale 29
 - Limestones 31
 - Evaporites 31
 - Metamorphic Rocks 32
- Minerals, Rocks, and People 32
 - Asbestos 32
 - Black Lung and Silicosis 35

- Government Regulation of Minerals Handling 37
- Beneficial Effects of Mineral Contacts 37
- Summary 37
- Key Terms and Concepts 38
- Stop and Think! 38
- References and Suggested Readings 39

Chapter 3

Soils—Our Most Important Natural Resource 41

- From Rocks to Soils 41
 - Chemical Alteration of Rocks
into Smaller Particles 41
 - Physical Alteration of Rocks
into Smaller Particles 43
 - Results of Chemical and Physical
Alteration of Rocks 44
- Clay Minerals 46
 - Clay and Soil Stability 46
 - Clay and Plant Nutrition 47
 - Clay and Water Filtering 47
 - Clay and Destructive Expansion of Soil 47
- The Complexity of Soils 48
 - Soil Thickness 50
 - How Fast Does Soil Form? 50
 - The Role of Organic Matter in Soil 51
 - Soil Particle Size—Basis for Classifying Soils 52
 - Soil Water 52
 - Soil Air 54

Why Is Soil Black, Brown, Red,
Yellow, Green, or Gray? 54

Classifying Soils 54

Laterite: An Interesting Soil 56

The Nutrients Soil Provides to Plants 58

The Remarkable Root: How Elements
Travel from Soil into Plants 60

Can the Soil Continue to Feed
Earth's People? 60

Why Do Plants Grow Where They Do? 62

Which Plants Do We Like? 62

Summary 64

Key Terms and Concepts 64

Stop and Think! 64

References and Suggested Readings 65

Chapter 4

Soil Problems—Erosion and Pollution 67

Soil Erosion 67

Soil Erosion by Water 68

Soil Erosion by Wind 69

Conservation Farming Can
Reduce Soil Erosion 71

Contour Plowing 72

Soils, Forests, and Erosion 72

Sediment Pollution of Streams 75

Soil Pollution 76

Contamination Versus Pollution 76

Types of Soil Pollution 77

Pesticide Pollution of Soil 78

Organic Pollution of Soil 79

Organic Farming 80

Inorganic Pollution of Soil 81

Human Exposure to Soil Pollution 82

Salinization of Soil 82

Cleaning the Soil 84

Case Study: Soil Remediation at
Hill Air Force Base, Utah 85

Soil Surveys and Land-Use Planning 85

Summary 88

Key Terms and Concepts 88

Stop and Think! 88

References and Suggested Readings 89

Chapter 5

Slope Stability and Landslides 91

**The Role of Gravity and
Slope in Landslides 92**

The Role of Water in Landslides 93

Role of Earthquakes in Landslides 93

Slides, Flows, and Creeps 93

Slides 94

Flows 94

Creep 94

Rockslides and Snowslides 95

The Gros Ventre Rockslide, Wyoming 97

Vaiont Dam Rockslide, Italy 98

Snow Avalanches 99

Debris Slides 101

Earthquake Vibrations Trigger Debris Slides 101

Precipitation Triggers Debris Slides 102

Human Activities Trigger Debris Slides 103

Talus and Talus Creep 105

Mudslides 106

Earthflows 106

Soil Creep 106

Permafrost and Solifluction 108

Mudflows 111

Liquefaction 112

How Bad Is the Damage? 113

**How to Recognize Areas
Prone to Slope Instability 113**

Landslide Maps 114

Can Landslides Be Prevented? 114

Ways to Reduce Incidence and
Severity of Landslides 115

The Uniform Building Code 119

Summary 120

Key Terms and Concepts 121

Stop and Think! 121

References and Suggested Readings 121

Chapter 6

Clean Water 123

We Are What We Drink 123

The Hydrologic Cycle (Water Cycle) 124

Water on Earth's Surface 126

Uneven Distribution of Surface Water	126
What Controls the Distribution of Precipitation?	128
Circulation of the Atmosphere	128
Distance from the Ocean	129
Changes in Elevation of the Land Surface	130
Surface Water: The Problem of Sharing	131
Groundwater: Stored Rainwater and Snowmelt	133
The Nature of Groundwater	133
How Do We Find Groundwater?	134
Aquifers: Rock and Sediment Layers that Store Water	136
Water Table	136
Artesian Water	136
How Deep to Drill the Well?	137
Cone of Depression	138
Springs, Oases, and Swamps	139
Perched Water Table	140
Relation of Groundwater and Streams	140
Aquifer Characteristics	141
How Fast Does Groundwater Flow?	141
Calculating Aquifer Discharge (Darcy's Law)	142
How Fast Can an Aquifer Recharge?	142
How Much Water Can an Aquifer Provide?	142
Case Study: The Ogallala Aquifer	143
Fractured Aquifers	144
Limestone Aquifers, Caves, and Sinkholes	144
Sinkholes	145
Ground Subsidence due to Withdrawing Groundwater	148
Problems When Pumping Stops	149
Managing Water Supplies	149
Solutions, Ideal and Real	150
Conserving Water	151
Redistributing Water	153
Developing Nontraditional Water Sources	154
Water Quality: Hard and Soft	156
Medicinal Waters	156
Case Study: Dead Sea Therapy	157
Summary	158
Key Terms and Concepts	159
Stop and Think!	159
References and Suggested Readings	159

Chapter 7

Streams and Floods 161

Streams	161
How Streams Get Started	161
Stages of Stream Development	164
Stream Discharge	165
Stream Velocity	167
Stream Load	168

Why Does It Precipitate?	169
Lightning	171
Thunder, Son of Lightning	172
Tornadoes	173
Floods	176
Case Study: "Slow-Rise" Flooding, U.S. Midwest, 1993	177
Flash Floods	179
Why Do Floods Occur?	180
How Often Do Floods Occur?	180
Urbanization and Flooding	183
Anticipating and Controlling Floods	184
Floodplain Zoning	184
Flood Control	185
Summary	190
Key Terms	190
Stop and Think!	191
References and Suggested Readings	191

Chapter 8

Water Quality and Pollution 193

Defining "Uncontaminated Water"	193
Elements in Water and Human Health	194
Major Ions in Drinking Water:	
Good and Bad	194
Small But Mighty: Trace Ions in Drinking Water	196
Arsenic	196
Lead	196
Lead and Delinquency	197
Nitrate	197
Heavy Elements	198
Organic Compounds	198
Waterborne Diseases	198
Testing for Waterborne Disease Organisms	201
American Drinking Water	201
Water Safety Guidelines	201
EPA Water Standards	204

Which Pollution Problems Are Most Serious?	204
Point Versus Nonpoint Pollution Sources	206
What Is Hazardous Waste?	206
Types of Pollution Sources	207
Chemical Plants/Oil Refineries	208
Pesticides	211
Seawater Incursion	215
Gasoline, Motor Oil, and Other Petroleum Products	216
Farm Animal Waste	219
Salt on Roadways	220
Cemeteries	221
Thermal Pollution	223
Bottled Water	225
Summary	225
Key Terms	226
Stop and Think!	226
References and Suggested Readings	226

Chapter 9

Solid Waste 229

Solid Waste	229
Municipal Solid Waste	229
Sanitary Landfills	232
Landfill Problems	234
Biodegradability	239
When Landfills Become Landfills	241
Hazardous Solid Waste	243
Recycling	245
400,000 Problem Waste Sites	248
Superfund's 35,000 Sites	248
Sewage and Septic Systems	249
Sewage Systems	250
Septic Systems	252
Case Study: Tracing Sewage	252
Summary	254
Key Terms	254
Stop and Think!	254
References and Suggested Readings	255

Chapter 10

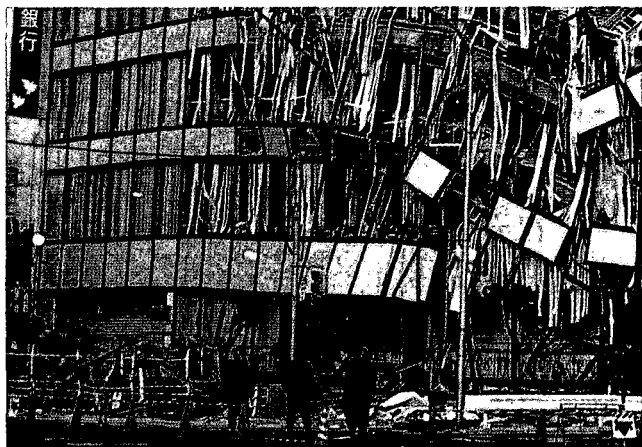

Shorelines, Erosion, Wetlands, and Pollution 257

The World Ocean	257
The Shifting Shoreline	257
The Nearshore Zone	258
Waves and Coastal Currents	259
Longshore Currents	260
Rip Currents	261
Tides and Tidal Currents	262
Ocean Currents	263
Upwelling Currents	265
El Niño	266
Hurricanes	267
Eroding the Shore	270
Tsunami (Earthquake-Generated Waves)	270
Sea Level Change	273
Migrating Shorelines	273
Subsiding Land	274
Rate of Change	276
Sea Level and Small Islands	277
Coastal Erosion	277
Pacific Coastline	277
Atlantic and Gulf Coastlines	278
Protecting Shorelines	279
Wetlands	280
Value of Wetlands	281
Case Study: Ruining Florida's Everglades	283
Case Study: Rethinking Holland	284
Estuaries and Pollution	286
Case Study: Chesapeake Bay	286
Ocean Pollution	289
Case Study: Polluting the Mediterranean Sea	289
Open-Ocean Dumping	290
Crude Oil	291
Radioactive Waste	293
Summary	294
Key Terms	295
Stop and Think!	295
References and Suggested Readings	295

Chapter 11

Earthquakes and Plate Tectonics 297

Where Do Earthquakes Occur?	297
Earthquakes at Fault	298
Earthquake Magnitude and Intensity	303
Richter Magnitude (Energy Released)	303
Mercalli Intensity (Damage Level)	306

- Locating an Earthquake** 306
- Earthquakes and Plate Tectonics** 307
 - Convection in the Mantle 308
- Plate Boundary Earthquakes** 311
 - Case Study: Loma Prieta, California Earthquake 312
 - Case Study: Northridge, California Earthquake 313
 - Case Study: Kobe, Japan Earthquake 316
- Earthquakes in Plate Interiors** 317
- Manmade Earthquakes** 319
 - Earthquakes at the Rocky Mountain Arsenal 319
 - Earthquakes at Water Reservoirs 320
 - Earthquakes at Geothermal Power Stations 320
 - Intentional Earthquakes 321
- Earthquake Forecasting: Can We?** 322
 - Can Animals Sense Impending Quakes? 322
 - The Science of Forecasting 322
 - The Japanese on Earthquake Forecasting 324
 - Fossil Paleoquakes 324
 - The Parkfield Prediction 326
- Protecting Yourself from Earthquakes** 327
 - Building Construction and Insurance 327
 - Personal Preparation 328
- Official Forecasts and Public Response** 328
- Summary** 331
- Key Terms** 332
- Stop and Think!** 332
- References and Suggested Readings** 332

Chapter 12

Volcanoes and Eruptions 335

- Our Heated Planet** 335
- Where Do Volcanoes Occur?** 336
 - Tectonic Plate Boundaries 336
 - Hot Spots 338
- The Secret Is in the Lava** 339
 - How Gassy Is a Magma? 339

- How Viscous Is a Magma? 340
- Volcanic Plumbing 341
- Volcano Shapes 341
- The Surface of Lava Flows 341
- Hazards of Explosive Eruptions 341
- Hazards of Nonexplosive Eruptions 344
- How Many Eruptions Occur Each Year?** 346
- Eruption Duration** 346
- Eruption Forecasting: Can We?** 348
 - Forecasting's First Step: Classifying Volcanic Activity 349
 - What Do Volcanologists Measure to Forecast an Eruption? 349
 - A Prediction that Fizzled 351
 - The Prediction Dilemma 352
- Case Study: Mount Saint Helens, Washington, 1980 Eruption** 353
- Case Study: Mount Pinatubo, Philippines, 1991 Eruption** 356
- Hazard Assessment** 358
- Case Study: Fighting an Eruption in Iceland** 360
- How Volcanoes Affect Climate** 361
- Benefits from Volcanoes** 362
- Volcanic Eruptions and Airline Safety** 363
- Summary** 363
- Key Terms** 365
- Stop and Think!** 365
- References and Suggested Readings** 365

Chapter 13

Nonfuel Mineral Resources and the Environment 367

- What Are Mineral Resources?** 367
- How Are Mineral Resources Formed?** 370
 - Resources from Igneous Rocks 370
 - Resources from Metamorphic Rocks 371
 - Resources from Sedimentary Rocks 371
- How Abundant Is Each Mineral Resource?** 374
 - Is Any Country Self-Sufficient in Mineral Resources? 375
 - Can We Run Out of Resources? 376
 - How Much Do We Really Have of Each Mineral Resource? 378
- Mining: Surface and Underground** 378
- Surface Mining** 378
 - Case Study: Copper Mining at Bingham, Utah 379
 - Case Study: Copper Smelting in Ducktown District, Tennessee 381
- Waste and Pollution from Mining and Processing** 382
 - Waste Rock 382
 - Water Pollution 382
 - Pollution from Smelters 384

- Underground Mining 384**
- The Allure of Gold 385**
 - Thar's Gold in Them Thar Hills! 385
 - Placer Deposits 387
 - Placers and Environmental Setting 387
 - Stream Placers and Gold 388
 - Gold Mining and Mercury Pollution 388

- The Allure of Diamonds 389**
 - The Diamond Market 390
 - Beach Placers and Diamonds 391
- Mining Nonmetallic Rock and Minerals 392**
 - Crushed Stone (Aggregate) 393
 - Sand and Gravel 394
 - Politics, Economics, and Stone 396

- Maps Help Locate Resources 397**
- Summary 397**
- Key Terms 398**
- Stop and Think! 398**
- References and Suggested Readings 398**

Chapter 14

Energy from Fossil Fuels 401

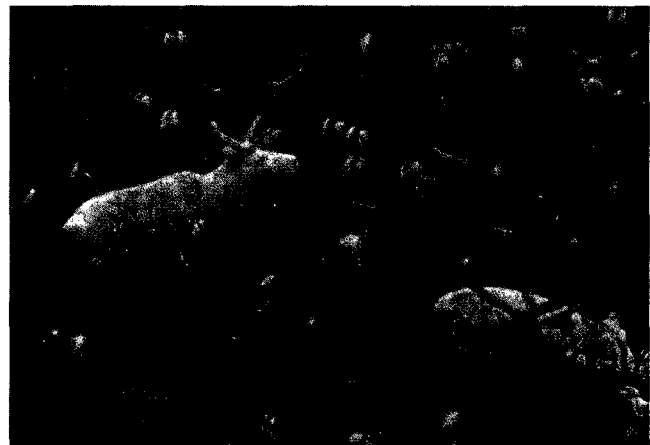

- Everything We Do Takes Energy 401**
 - Types of Energy 401
 - Converting Energy from One Form to Another 403
 - Energy Is Empowerment 406
- Petroleum and Natural Gas 407**
 - How Does Petroleum Form? 408
 - How Do Oil and Natural Gas Migrate and Accumulate? 409
 - How Are Oil and Gas Discovered? 409
- Is the U.S. Running Out of Oil? 410**
 - The Arab Oil Embargo of 1973: Taste of the Future 411
 - Improving Automobile Efficiency 412
 - Electric Cars 413
 - Oil in the Future 413
- Is the U.S. Running Out of Natural Gas? 414**
 - Natural Gas Hydrates 415
- Petroleum Removal and Land Subsidence 415**
- Oil-Impregnated Rocks: A Solution? 415**
- Oil Shale: A Solution? 416**
- Coal: The Rock that Burns 418**
 - How Does Coal Form? 418
 - Searching for Coal Deposits 419
- Mining Coal 420**
 - Surface Mining 420
 - Underground Mining 421
 - Mine Safety 423
 - Sulfur Content of Coal 425
- Energy Conservation 425**

- Energy Need: Degree-days 426
- Improving Fossil Fuel Efficiency 426
- Summary 428**
- Key Terms 428**
- Stop and Think! 429**
- References and Suggested Readings 429**

Chapter 15

Energy from Alternative Sources 431

- Kinetic Energy from Moving Water 432**
 - Hydroelectric Power 432
 - Tidal Power 434
 - Ocean Wave Power 435
- Thermal Energy from Groundwater and Seawater 436**
 - Hot Groundwater (Geothermal Energy) 436
 - Oceanic Thermal Energy Conversion (OTEC) 439
- Energy from the Wind 440**
- Energy from Biomass 442**
 - Biogas 443
 - Bioliquids 444
 - Biomass Pros and Cons 444
- Energy from the Sun 445**
 - Solar Heating 445
 - Electricity from Solar Energy 448
- The Best Energy Mix 451**
- Social Cost of Power Generation 451**
- Fossil Fuels Versus Renewable Energy Sources: The Public's View 452**
- Summary 452**
- Key Terms 452**
- Stop and Think! 453**
- References and Suggested Readings 453**

Chapter 16

Energy from Nuclear Power 455

What Is Radioactivity? 456

- Discovering the Invisible 457
- Types of Radiation 458
- Natural Radiation Sources 459
- Get a Half-Life! 460

What Is the Biological Impact of Radiation? 461

- The Hazards of Ionizing Radiation 462
- Radiation Sickness 463

Uranium: Our Source of Nuclear Energy 464

- Why Uranium? 464
- Nuclear Fission (Splitting Atoms) 465
- Inside a Nuclear Reactor 466
- Breeding Fuel and Bomb Material 467
- Fossil Nuclear Reactors in Africa 468
- Uranium Miners, Smokers, and the Radiation Risk 469

How Safe Are Nuclear Power Plants? 469

- Case Study: Three Mile Island, Pennsylvania 469
- Case Study: Chernobyl, Ukraine 470

What Do We Do with Old Nuclear Power Plants? 473

Can We Ever Dispose of Radioactive Waste? 476

- Low-Level Waste Repositories 477
- High-Level Waste Repositories 478

Why Is Radon Gas a Health Hazard? 480

- Radon in the Home 480
- How Much Radon Is Safe? 480
- Testing for Radon 482

Summary 483

Key Terms 484

Stop and Think! 484

References and Suggested Readings 484

Chapter 17

Our Air and Its Quality 487

What Is in the Atmosphere? 487

How Solar Energy and the Atmosphere Interact 489

Carbon Dioxide and the Greenhouse Effect 491

- Other Greenhouse Gases 491
- Sulfate Aerosols and Global Cooling 492

Global Warming: Is It, or Not? 493

- Global Warming: Most Scientists Are Convinced 493
- An Alternate View: What Global Warming? 494
- Has Earth's Surface Temperature Always Varied? 495
- Global Warming: Hype City 495

- Who Wins and Who Loses in Global Warming? 496
- Winners in Global Warming 496
- Losers in Global Warming 497

Ozone 498

- The Troubled Ozone Layer 499
- Ozone and CFCs 499
- Is There a Solution to the Ozone Problem? 502
- Ozone Depletion, Cancer, and You 502
- Eye Damage 502
- Protective Measures 503

Air Quality and Pollution 504

- Sulfur Dioxide (SO₂) 505
- Particulate Matter 506
- Nitrogen Dioxide (NO₂) 507
- Carbon Monoxide (CO) 508
- Ozone (O₃) 508
- Lead (Pb) 509
- Non-Automotive Pollution Sources 510
- Temperature Inversions 510

Acid Precipitation 512

- What Are Acid Precipitation's Effects? 514

Is Air Quality Improving? 515

Civilization's Microclimates 515

- Urban Heat Island 516
- Humidity and Comfort 518
- Windchill 519

Those Other Pollutants 519

- Pollen, Molds, and Allergies 519
- Smoldering Tobacco: Air Pollution Indoors 520
- Turn It Down! 522

Summary 522

Key Terms 524

Stop and Think! 525

References and Suggested Readings 525

Glossary 526

Index 535
