Part 1 The Grand Amateurs

1 Amateur astronomy in the Romantic Age	3
2 Gentlemen and players: amateurs and professionals in 1840	13
Greenwich, Oxford and Cambridge	13
The influence of Germany	18
Other professional observatories in Britain	20
England	20
Durham, Liverpool and the Cape of Good Hope	20
Scotland	23
Ireland	24
British 'Grand Amateur' observatories	26
Amateur observatories in Europe and America	27
William Pearson and the Royal Astronomical Society	29
3 An inheritance, a wife, a benefice, or a brewery: financing fundamental research	33
Grand Amateur priorities and interests	34
Paying for instrumental innovation: the astronomical circle	35
Stephen Groombridge	36
John Pond	37
William Pearson	37
Richard Christopher Carrington	40
New discoveries in positional astronomy: stellar proper motions and binary stars	42

viii **Table of contents**

	Sir James South	44
	William Rutter Dawes	46
	George Bishop	47
	Edward Joshua Cooper of Markree	48
	The American amateurs	50
4	Sir John Herschel: a model for the independent scientist	53
5	An astronomical house-party: the Bedford–Aylesbury axis	75
6	The brotherhood of the big reflecting telescope	93
	William Parsons, Third Earl of Rosse	96
	William Lassell	100
	Lassell’s collaboration with James Nasmyth	102
	Nasmyth’s telescopes	104
	The swan-song of speculum	109
7	The new sciences of light: spectroscopy, photography, and the Grand Amateurs	113
	William Huggins	114
	Warren De La Rue	117
	The American connection	118
	Lewis Rutherfurd	118
	Henry Draper	119
	Photography and the economics of astronomical working time	121
	Joseph Norman Lockyer	122
	Lord Crawford’s Dun Echt Observatory	133
	Two engineers and a master builder: McClean, Common and Roberts	135
	The Irish photometrists: Minchin, Monck, Wilson and Fitzgerald	139
	George Higgs: a shopkeeper spectrometrist	141
	The escalation of costs: towards professionalisation	141
8	The astronomers’ gentlemen: the Grand Amateurs’ professional assistants	145
 Part 2 Poor, obscure and self-taught: astronomy and the working class		
	Prologue	161
9	A penny a peep: the astronomical lecturers of the people	165
10	Astronomy and the modest master-craftsman	181
	Johnson Jex: the learned blacksmith of Letheringsett	183
	James Veitch: the ploughwright of Inchbonny	185

	John Leach: the cobbler of Frodsham	188
	Thomas William Bush: the baker of Nottingham	200
11	The day-labourer astronomer	205
	John Robertson: the railway porter of Coupar Angus	206
	John Jones: the slate counter of Bryngwyn Bach	209
	Roger Langdon: a village Station Master astronomer	213
	Astronomers in isolation	217
	Part 3 The rise of the leisured enthusiast	
	Prologue	221
12	A goodly pursuit for a Godly mind: Thomas Webb and his influence	225
	Thomas William Webb	225
	The amateur astronomer's telescope	228
13	That clubbable passion: the amateur astronomical society	243
14	Now ladies as well as gentlemen	273
15	Conclusion and postscript: the amateur astronomer into the twentieth century	295
	Notes and references	305
	Index	409
