Abbreviations and Symbols	iii
1 Introduction	1
1.1 Scope of this Thesis	2
2 Theoretical Background	5
2.1 Simple Couette Flow	5
2.2 Rotating Parallel Plates	7
2.2.1 Edge Guards	9
2.3 Poiseuille Flow	10
2.4 Corrections	12
2.4.1 Rabinowitsch-Weissenberg Correction	13
2.4.2 Wall Slip Correction	14
2.5 Non-Colloidal Suspension Rheology	16
2.5.1 Fundamental Properties	16
2.5.2 Apparent Wall Slip	18
2.5.3 Particle Migration	21
2.5.4 Structured Layers	25
3 Experiments & Simulation	29
3.1 Pressure Dependence	29
3.1.1 Materials	29
3.1.2 Slit Die Setup and Procedure	31
3.1.3 Numerical Model	33
3.2 Rheo-PIV	37
3.2.1 Materials	37
3.2.2 Photometry	42

3.2.3	Parallel Plate Setup and Target	44
3.2.4	Velocimetry Image Processing	49
3.2.5	Concentration Mapping	55
4	Results & Discussion	65
4.1	Suspension Properties	65
4.1.1	Samples for Slit Die Experiments	65
4.1.2	Samples for Optical Measurements	67
4.2	Pressure Dependent Apparent Wall Slip	73
4.2.1	Basic Slit Die	73
4.2.2	Slip Velocities	75
4.2.3	Flow Restrictor	80
4.3	Guard Ring Influence	82
4.3.1	Velocity Profile Approximation	84
4.3.2	Effect of Experimental Parameters	87
4.4	Formation of Particle Layers	92
4.4.1	Influence of Shear Rate	95
4.4.2	Layering Under Various Confinement Ratios	98
5	Conclusions	101
	List of Figures	105
	List of Tables	109
	Bibliography	111
	Appendix	125
