Contents

PREFACE	xi
ACKNOWLEDGMENTS	xiii
INTRODUCTION I: INSTRUMENTATION SYSTEMS	1
I.1 Introduction	1
I.2 Measurement Systems	1
I.2.1 Basic Electronic Measurement Systems	2
I.2.2 Multiple-Data Measuring Systems	3
I.2.3 Telemetry Systems	4
I.3 Analyzing Systems	10
I.4 Data Conditioning, Processing, and Display	11
I.4.1 Analog Data	11
I.4.2 Digital Data	12
I.5 Control Systems	14
Bibliography	16

- II.1 Nomenclature and Terminology 18
- II.2 Transduction Principles 20
- II.3 General Characteristics 24
 - II.3.1 *Measurand characteristics* 24
 - II.3.2 *Electrical Design Characteristics* 25
 - II.3.3 *Mechanical Design Characteristics* 27
 - II.3.4 *Performance Characteristics* 28
- II.4 General Criteria for Selection 51
- Bibliography 53

1 SOLID-MECHANICAL QUANTITIES

- 1.1 Basic Concepts 55
 - 1.1.1 *Length, Angle, and Motion* 55
 - 1.1.2 *Vibration* 57
 - 1.1.3 *Mass, Force, and Torque* 58
 - 1.1.4 *Elasticity, Strain, and Torsion* 59
 - 1.1.5 *Units of Measurement* 60
- 1.2 Acceleration and Vibration 64
 - 1.2.1 *Sensing Method* 64
 - 1.2.2 *Design and Operation* 65
 - 1.2.3 *Performance Criteria* 77
- 1.3 Attitude and Attitude Rate 79
 - 1.3.1 *Sensing Methods* 79
 - 1.3.2 *Design and Operation* 80
 - 1.3.3 *Performance Criteria* 88
- 1.4 Displacement, Position, and Motion 89
 - 1.4.1 *Sensing Methods* 89
 - 1.4.2 *Design and Operation* 90
 - 1.4.3 *Design and Performance Characteristics* 117
- 1.5 Force, Mass, and Weight 120
 - 1.5.1 *Sensing Methods* 120
 - 1.5.2 *Design and Operation* 122
 - 1.5.3 *Performance Characteristics* 130
- 1.6 Torque 131
 - 1.6.1 *Sensing Methods* 131
 - 1.6.2 *Design and Operation* 132
 - 1.6.3 *Performance Criteria* 140

1.7	Speed and Velocity	142
1.7.1	<i>Sensing Methods</i>	142
1.7.2	<i>Design and Operation</i>	145
1.7.3	<i>Design and Performance Characteristics</i>	154
1.8	Stress and Strain	155
1.8.1	<i>Sensing and Transduction Methods</i>	155
1.8.2	<i>Design and Operation</i>	155
1.8.3	<i>Design and Performance Characteristics</i>	163
1.8.4	<i>Gage Installation</i>	164
1.8.5	<i>Strain Measurement Circuits</i>	165
	Bibliography	169

2 FLUID-MECHANICAL QUANTITIES

171

2.1	Basic Concepts	171
2.1.1	<i>Flow, Density, and Viscosity</i>	171
2.1.2	<i>Humidity and Moisture</i>	172
2.1.3	<i>Pressure, Vacuum, and Liquid Level</i>	172
2.1.4	<i>Units of Measurement</i>	173
2.1.5	<i>Pressure-Depth and Pressure-Altitude</i>	175
2.2	Density	176
2.2.1	<i>Sensing Methods</i>	176
2.2.2	<i>Design and Operation</i>	176
2.2.3	<i>Performance Characteristics</i>	177
2.3	Flow	178
2.3.1	<i>Sensing Methods</i>	178
2.3.2	<i>Design and Operation</i>	187
2.3.3	<i>Design and Performance Characteristics</i>	203
2.3.4	<i>Installation Precautions</i>	204
2.4	Humidity and Moisture	204
2.4.1	<i>Sensing Methods</i>	204
2.4.2	<i>Design and Operation</i>	210
2.4.3	<i>Design and Performance Characteristics</i>	216
2.5	Liquid Level	218
2.5.1	<i>Sensing Methods</i>	219
2.5.2	<i>Design and Operation</i>	229
2.5.3	<i>Design and Performance Characteristics</i>	240
2.6	Pressure	241
2.6.1	<i>Sensing Methods</i>	243
2.6.2	<i>Design and Operation</i>	248
2.6.3	<i>Design and Performance Characteristics</i>	270

- 2.7 Vacuum 272
 - 2.7.1 Sensing Methods 272
 - 2.7.2 Design and Operation 281
 - 2.7.3 Performance Characteristics 287
- 2.8 Viscosity 288
- Bibliography 289

3 ACOUSTIC QUANTITIES

291

- 3.1 Basic Concepts 291
 - 3.1.1 Basic Definitions 291
 - 3.1.2 Defining Relationships 293
 - 3.1.3 Units of Measurement 294
- 3.2 Sensing Method 295
- 3.3 Design and Operation 295
 - 3.3.1 Microphones 295
- 3.4 Microphone Performance Characteristics 299
- 3.5 Sound-Pressure Measurements 301
- 3.6 Sound-Level Measurements 303
- 3.7 Underwater Sound Detection 304
- 3.8 Ultrasonics 305
- Bibliography 306

4 THERMAL QUANTITIES

309

- 4.1 Basic Concepts 309
 - 4.1.1 Definitions 309
 - 4.1.2 Related Laws 311
 - 4.1.3 Temperature Scales and Units of Measurement 313
- 4.2 Thermometry 315
 - 4.2.1 Sensing Methods 315
 - 4.2.2 Design and Operation 340
 - 4.2.3 Design and Performance Characteristics 357
 - 4.2.4 Considerations for Selection 363
 - 4.2.5 Measurement Circuits 373

- 4.3 Radiation Pyrometry 376
 - 4.3.1 Sensing Methods 376
 - 4.3.2 Design and Operation 379
 - 4.3.3 Performance Characteristics 386
- 4.4 Heat Flux 387
 - 4.4.1 Calorimeters 388
 - 4.4.2 Radiometers 391
 - 4.4.3 Surface Heat-Flow Sensors 394
- Bibliography 394

5 OPTICAL QUANTITIES

397

- 5.1 Basic Concepts 397
 - 5.1.1 Light Intensity 397
 - 5.1.2 Color 399
 - 5.1.3 Light Interaction with Substances 400
 - 5.1.4 Units of Measurement 401
 - 5.1.5 Performance Characteristics of Light Sensors 402
- 5.2 Visible, Ultraviolet, and Infrared Light Intensity 404
 - 5.2.1 Sensing Methods 404
 - 5.2.2 Design and Operation 408
 - 5.2.3 Specification Characteristics 429
 - 5.2.4 Sensing Systems 430
- 5.3 Color 437
 - 5.3.1 Sensing Methods 437
 - 5.3.2 Design and Operation 437
 - 5.3.3 Performance Criteria 438
- 5.4 Light Interaction with Substances 438
 - 5.4.1 Sensing Methods 438
 - 5.4.2 Design and Operation 441
 - 5.4.3 Performance Characteristics 449
- Bibliography 450

6 NUCLEAR RADIATION

452

- 6.1 Basic Concepts 452
 - 6.1.1 Related Fundamental Constants 453
 - 6.1.2 Related Laws 455
 - 6.1.3 Units of Measurement 455

6.2	Sensing Methods	456
6.2.1	<i>Radiation Detection Using Ionization</i>	457
6.2.2	<i>Radiation Detection Using Scintillation</i>	458
6.2.3	<i>Electron Detection</i>	459
6.3	Design and Operation	459
6.3.1	<i>Ionization Chambers</i>	459
6.3.2	<i>Proportional Counters</i>	461
6.3.3	<i>Geiger Counters</i>	463
6.3.4	<i>Semiconductor Detectors</i>	464
6.3.5	<i>Scintillation Counters</i>	469
6.3.6	<i>Electron Multipliers</i>	470
6.3.7	<i>Neutron Detectors</i>	474
6.3.8	<i>Signal-Conditioning and Display Equipment</i>	475
6.4	Design and Performance Characteristics	477
6.5	Selection Criteria	478
	Bibliography	479

7 ELECTRICAL AND MAGNETIC QUANTITIES 480

7.1	Basic Concepts and Units	480
7.2	Sensing Methods and Devices	482
7.2.1	<i>Voltage Sensors</i>	482
7.2.2	<i>Current Sensors</i>	483
7.2.3	<i>Power Sensors</i>	485
7.2.4	<i>Electrostatic-Charge Sensors</i>	486
7.2.5	<i>Frequency- and Time-Sensing Devices</i>	486
7.2.6	<i>Magnetic-Flux-Density Sensors</i>	487
	Bibliography	489

8 CHEMICAL PROPERTIES AND COMPOSITION 490

8.1	Basic Concepts	490
8.1.1	<i>Units of Measurement and Underlying Concepts</i>	491
8.2	Electrometric Analyzers	496
8.2.1	<i>Conductivity Sensors</i>	497
8.2.2	<i>pH Sensors</i>	503
8.2.3	<i>ORP (Redox) Sensors</i>	506
8.2.4	<i>Specific-Ion Sensors</i>	506
8.2.5	<i>Coulometric Instruments</i>	508
8.2.6	<i>Polarographs</i>	509
8.2.7	<i>Electrometric Gas Analyzers</i>	510

8.3	Resistive Gas Sensors	512
8.4	Thermal Analyzers	512
	8.4.1 DTA, DSC, and TGA	513
	8.4.2 Thermal Conductivity Cells	514
	8.4.3 Heat-of-Combustion Sensors	515
8.5	Ionization Analyzers	516
8.6	Photometric Analyzers	517
	8.6.1 Flame Photometers	517
	8.6.2 Nondispersive Infrared Analyzers	518
	8.6.3 Chemiluminescence Analyzers	520
	8.6.4 Polarimeters	520
8.7	Chromatographic Analyzers	521
	8.7.1 Gas Chromatographs	521
	8.7.2 Liquid Chromatographs	523
8.8	Spectroradiometric Analyzers	524
	8.8.1 Spectrophotometers	525
	8.8.2 Infrared Spectroradiometers	532
	8.8.3 Interferometer Spectrometers	533
	8.8.4 Beta-, Gamma-, and X-Ray Spectrometers	534
	8.8.5 X-Ray Fluorescence Spectrometers	537
	8.8.6 Atomic Absorption and Flame Emission Spectrometers	538
	8.8.7 Submillimeter and Microwave Spectrometers	539
	8.8.8 Raman Spectrometers	539
8.9	Magnetic Resonance Spectrometers	541
	8.9.1 Magnetic Resonance Spectrometers	541
	8.9.2 Electron Spin Resonance Spectrometers	542
8.10	Mass Spectrometers	542
8.11	Surface Analysis Instruments	544
	Bibliography	549
